I. Letter to Shareholders

Dear Shareholders:

First of all, thank all shareholders for full support of the company in the past year. The operating performance in 2020 and the business plan for 2021 are reported as follows:

1. Operating Performance in 2020

The consolidated sales revenue of Ablerex is NTD 2,361,923 thousand in 2020, which decreased 4.08% comparing to the sales revenue NTD 2,462,390 thousand in 2019. The consolidated net income is NTD 42,626 thousand in 2020, which increased 5.11% compared to the net income NTD 40,555 thousand in 2019. (As the following table)

Unit: NT\$ thousands

Item	2020	2019	Growth Rate (%)
Sales Revenue	2,361,923	2,462,390	-4.08%
Gross profit	576,822	573,933	0.50%
Operating income	52,953	25,864	104.74%
Net income	42,626	40,555	5.11%
Profit attributable to parenting company	41,917	39,500	6.12%
EPS(NTD) – After tax	0.93	0.88	5.68%

2. Implementation of business plan in 2020

Revenue, from sales and service in 2020 totaling NTD 2,361,923 thousand, decreased NTD 100,467 thousand (4.08%), comparing to the annual revenue NTD 2,462,390 thousand in 2019. In comparison of sales revenue from the five main product categories in 2 years, PV inverter, project, and other (components, batteries, etc.) categories have grown compared to the year of 2019. Categories Others of all have both the highest revenue growth and growth rate, followed by PV inverter. Both UPS and APF showed declined. The revenue of project business fell by more than NTD180 million, which mainly caused the total revenue declined compared with it in 2019.

The operating costs in 2020 totaling NTD 2,308,970 thousand, decreased NTD 127,556 thousand (5.24%), comparing to NTD 2,436,526 thousand in 2019. Among them, the operating cost decreased by NTD 103,356 thousand along with the decrease of operating income, and the operating expenses decreased by NTD 24,200 thousand compared with 2019. The decreasing of operating expenses was mainly due to the decreasing of sales expenses as well as management expenses.

The company's 2020 major business performance indicators are as follows:

Unit: NT\$ thousands

Item	2020	2019	Growth Rate(%)
Return on Assets	1.63%	1.62%	+0.01 ppts
Return on Shareholders' Equity	2.88%	2.69%	+0.19 ppts
Operating Income to Capital Stock	11.77%	5.75%	+6.02 ppts
Profit before Tax to Capital Stock	13.49%	9.63%	+3.86 ppts
Net Profit Margin	1.80%	1.65%	+0.15 ppts
EPS (NTD)-after tax	0.93	0.88	5.68%

Although the company's revenue has declined in 2020, sales gross profit margin (24.42%) increased slightly by 1.11% than in 2019 (23.31%), and the operating expense ratio decreased by 0.08% than in 2019, resulting in an increasing in the overall business profit. It results in an increase in both the net profit and the net profit rate for the whole year, and the performance of related assets and management performance indicators were better than in 2019.

3. Business Plan for 2021

A. Business guidelines

The Group continued its local business strategy, implemented localized operations, provided products, technical services and maintained customer relationships with nearby marketing locations around the world. In product development, strengthen the concept of "design for mass production" to increase manufacturing cost advantages; and in response to market trends, integrate products and products in various fields of the company and partners to become a customer solution provider; in manufacturing, continue to optimize Supply chain management ensures the stability and quality of materials and parts, and improves inventory status; introduces Industrialization 4.0, adjusts production processes, and introduces intelligent production control to improve production efficiency and maintain product quality.

B. Sales Forecasts and basis

The company is a professional power electronics product and service provider. In addition to continuing to expand the ODM and OBM sales business of the international market of uninterruptible power systems, it is also actively participating in domestic uninterruptible power system project engineering bids and providing maintenance services, and selling its own brands Solar power converter. According to research by research institutes, there is room for growth in the global uninterruptible power system market and the domestic solar market. The company will aim to increase overall profitability, increase sales and sales of various products, and actively increase the sales of various products market share.

C. Major production and sales strategy

1. Production strategy :

Integrate manufacturing quality and design quality to improve product reliability.

Establish strategic material management to ensure the diversity and optimization of

the supply, and effectively reduce the stock of materials. Optimize the production process, increase the proportion of automation/intelligent manufacturing/intelligent quality monitoring, introduce industrialization 4.0, and improve order response, production efficiency and product quality.

2. Sales strategy :

Adopt strategies tailored to local conditions, implement localized operations, strive to be close to the market, strengthen potential customer development and relationship maintenance, and quickly respond to customer needs and strengthen after-sales service, improve customer satisfaction, and stabilize the market position.

D. Research and Development Status

The company upholds the belief of "technical independence" and strengthens the concept of "design for mass production" to enhance the market-oriented thinking of R&D people. The R&D department continues to cooperate with the school to carry out the application research and development of three-phase, high-end, large-capacity power electronic technology, and is also committed to technology commercialization and mass production design to ensure that the company's power quality improvement and enhancement, and energy storage technology Leading, and help achieve timely provision of high value-added and cost-effective products, in order to quickly respond to market trends and meet customer needs.

4. The impact of the External Competitive Environment, Regulatory Environment, and Macroeconomic Conditions

A. External Competitive Environment

UPS is a mature and highly competitive industry. The mid and high-end product market is monopolized by a few large European and American brands and continues to consolidate its market position through mergers and acquisitions. The low-end product market is a highly competitive red ocean market; As for PV Inverter, although the green power industry will be affected by the epidemic in 2020, the construction of many solar energy projects will be delayed, but in 2021, driven by the new and old projects, the forecasted installation volume is expected to have strong double-digit growth. Taiwan has entered the GW-level solar market, and will need to add about 2.5 to 3 GW each year by 2025. Although it is not easy to obtain land for the site, the government is actively negotiating with inter-ministerial meetings. The Vice President of the Executive Yuan R.J. Shen also formed a "Photovoltaic Project Steering Group" to promote Industrial Development. Looking forward to 2021, many large-scale cases have entered administrative procedures, and more bids are expected to be released. The overall industry outlook is optimistic.

B. Regulatory Environment

Ablerex follows national policies and laws and international norms, executes various operating activities, and does grasp changes in important policies, laws, and regulations. It adjusts the company's internal systems and operating activities in a timely manner to meet the specifications and ensure the smooth operation of the company. At present, the company has no significant impact on finances and business due to changes in domestic

and foreign regulations.

C. Macroeconomic Conditions

Based on the perspectives of international institutions on the outlook for 2021, although IMF, EIU and IHS Markit and other institutions predict that the global and major countries' economies will turn from recession to growth, it is still important to note that the pace of economic recovery in various countries is different. The world's important role in the consumer market, its recovery momentum has also affected the performance of global trade, and half of the company's revenue comes from overseas, so the uneven recovery of various regions will have an impact on the company's 2021 revenue performance.

In addition, due to the relocation and adjustment of manufacturers' production capacity caused by the US-China trade war, the return of Taiwanese businessmen to invest in Taiwan has been one of the important drivers of Taiwan's domestic demand growth in the past two years. As the U.S. election has ended, and whether sanctions against China will continue after the party's rotation is still unclear, if the U.S.-China trade conflict continues or further rises, it may affect the global manufacturers' operating layout and China's economic performance, and it will also become 2021. Another important factor that affected the company's operating performance during the year.

5. Development Strategy

Facing the global raging COVID-19 pandemic in 2020, AblereX adhered to the principle of maintaining stable operations and profitability, implemented the "Strengthen Fundamental Reinforcement" program, actively implemented the base and reengineering projects of R&D and production units, and continued to strengthen the company's manufacturing process and improve production quality and efficiency. Looking forward to 2021, the company will continue to optimize mature products and provide customers with cost-effective products; and follow the development trend of the energy industry, show the company's long-term rooted R&D strength and application experience in the power electronics field, and provide renewable energy power generation equipment (PV and wind energy power converters), battery monitoring systems, energy storage systems (ESS), etc., continue to approach the goal of "AblereX, Experts in Power Conversion".

All the best,

Chairman and CEO

Wen Hsu

II. Company Profile

2.1 Date of Incorporation: Apr. 27, 1998.

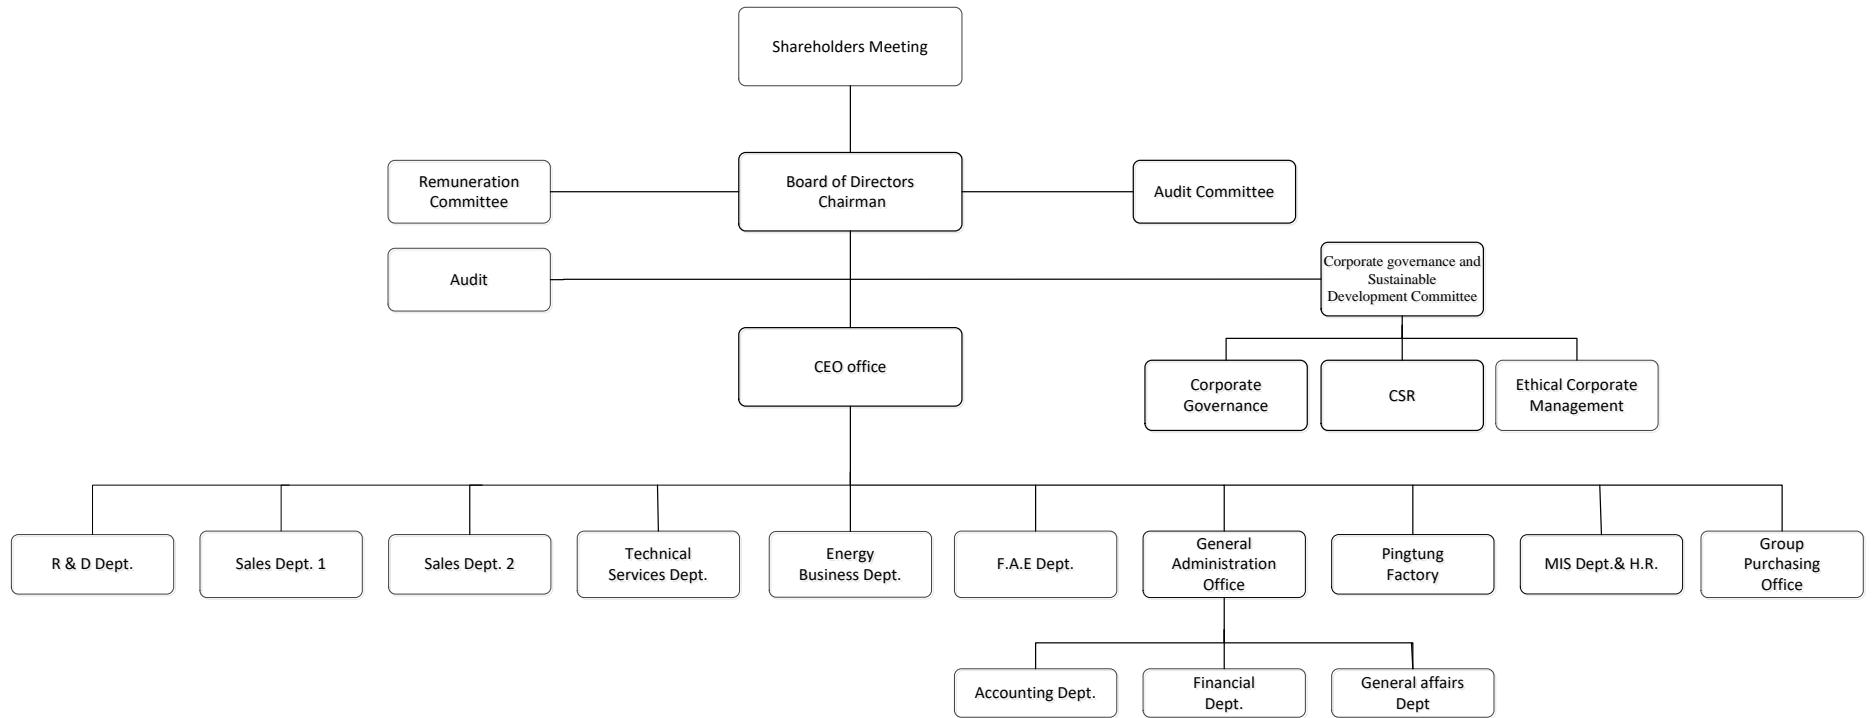

2.2 Company History

2018	Set up Ablerex Latam Corp. in US for Latin America market
2017	Invest Ablerex Electronics (Thailand) Co., Ltd. for own branded products in Thailand
2016	Set up Wada Denki Co., Ltd. in Japan
2016	Invest New Office for Xinchu office
2013	Set up New Building for U.S. Office
2012	New Factory at Pingtung Taiwan for 3 phase product.
2010	Public Listed on OTC market Increased Capital to USD 15M (NTD450M)
2009	Set up Beijing office and Italy office Listed on Emerging Stock Market
2008	Set up RD center in Kaohsiung Invest Singapore Company Set up 2nd-owned Factory in Suzhou, China Public offering in Taiwan Stock Market
2006	Set up USA office.
2005	Set up 1st-owned Factory in Suzhou, China.
2004	Increased Capital to USD 10 M (NTD 310 M)
2002	Merged with UIS Abler Electronics Co., Ltd. and rename Ablerex Electronics Co., Ltd.
2001	Start to set up Production facility in Suzhou, China
1994	Set up PEC TECHNOLOGY CO., LTD

2020.5.8	the 22 nd meeting of the 7 th term	1. Approved the ratification of new loan of USD106,130 to Ablerex Latam Corp. on 2020.3.31 2. Approved the proposed transfer of 30 shares of the Japanese subsidiary Wada Electric Co., Ltd. (accounting for 1% of the issued shares) to the subsidiary manager Yoshihiro Wada for 10,000 yen per share	No other issue in the meeting	Follow the resolution

Note : The company established the Audit Committee on 2020.6.19. Subsequent proposals shall apply the provisions of Article 14-5 of the Securities and Exchange Act. Please refer to the committee's meeting resolutions.

- (2) resolutions of the directors' meetings objected to by independent directors or subject to qualified opinion and recorded or declared in writing, the dates of the meetings, sessions, contents of motion, all independent directors' opinions and ,the company's response should be specified :

Date	Term	motion	Independent Director's opinion	Follow up
Jan 20, 2020	the 1 st Board meeting in 2020	Report items	Y.J. Ding/ Independent Director: The company needs to collect the performance and profitability of the industry for the reference of the remuneration committee.	The company will follow the advice.
Mar 19, 2020	the 2 nd Board meeting in 2020	Discussion Items	Y.J. Ding/ Independent Director: According to the resolution of the remuneration meeting, although the remuneration of employees and the remuneration of directors and supervisors is lower than in previous years, the allocation ratio is still reasonable. This proposal is approved. In this case, the chairman	The company will follow the advice.

Date	Term	motion	Independent Director's opinion	Follow up
			consulted all the directors present, and approved that the remuneration of directors and supervisors was distributed equally to the directors and supervisors. The remuneration of employees was paid in cash and submitted to the shareholders meeting.	
		Other Matters and Motions	Y.J. Ding/ Independent Director: How does the company respond to the coronavirus?	The company places anti-epidemic measures such as alcohol disinfection and temperature measurement at the door, and pays attention to relevant laws and regulations of the competent authority, and conducts internal reviews and cooperates with the implementation.
May 8, 2020	the 3 rd Board meeting in 2020	Discussion Items	Y.J. Ding/ Independent Director and J.H. Ho/Supervisor: Please provide an explanation of the average bank interest rate from the Finance Department.	The company will follow the advice.
Nov 9, 2020	the 6 th Board meeting in 2020	Other Matters and Motions	Y.J. Ding/ Independent Director: What measures does the company have to respond to the impact of the recent appreciation of the New Taiwan dollar on export revenue?	In Taiwan, because part of both income and expenditure are in U.S. dollars, the monthly net position is about USD 1 million, and the risk exposure still not high. Therefore, natural hedging is mainly adopted for the fluctuation of the exchange rate of New Taiwan dollar to U.S. dollar. We also attach importance to the impact of the appreciation of RMB against the US dollar, because the Suzhou plant receives US dollars and pays RMB. Once the RMB appreciates too much, it will erode the profit of the group. In response to this part of the possible risks, we will conduct remote exchange operations on the mainland.

2. If there are directors' avoidance of motions in conflict of interest, the directors' names, contents of motion, causes for avoidance and voting should be specified:

(1) On Aug 10, 2020, the Board of Directors reviewed the distribution of managerial staff bonuses for the year 2019. During the voting for the review, due to Chairman Wen Hsu, Director Y.A. Chen/CSO, and Director J.K. Sung/V.P. are the managers of the company, they resolved to issue their own interests in accordance with the regulation and avoided discussion and did not participate in the discussion. Vote and appoint Y.J. Ding as the sole director to vote on the matter. The chairman consulted the remaining attending the three directors and agreed to pass the case.

(2) On Dec 28, 2020, the Board of Directors reviewed the year-end bonus for the year 2020. During the voting for the review, due to Chairman Wen Hsu, Director Y.A. Chen/CSO, and Director J.K. Sung/V.P. are the managers of the company, they resolved to issue their own interests in accordance with the regulation and avoided discussion and did not participate in the discussion. Vote and appoint Y.J. Ding as the sole director to vote on the matter. The chairman consulted the remaining attending the three directors and agreed to pass the case.

3. Information on the evaluation cycle and period, evaluation scope, method, and evaluation content of the board's self (or peer) evaluation should be disclosed, and the board's evaluation of the board should be completed.

Cycle time (Note1)	Peiod (Note 2)	Scope (Note 3)	Method (Note 4)	Content (Note 5)
Once a year (by end of the fiscal year)	Evaluation of the performance of the Board of Directors from January 1- December 31, 2020	includes the performance evaluation of the board of directors, individual director members and functional committees	The annual internal evaluation system adopts the questionnaire self-evaluation method. The evaluation is carried out by the deliberating unit, including the internal self-evaluation of the board of directors, the self-evaluation of directors, the remuneration committee and the internal self-evaluation of the Audit Committee.	Board performance evaluation, individual director member performance evaluation and functional committee performance evaluation

Note 1 : Fill in the execution cycle of the board evaluation, for example: once a year

Note 2 : Fill in the period covered by the evaluation of the board of directors, for example: evaluate the performance of the board of directors from January 1, 2019 to December 31, 2019

Note 3 : The scope of evaluation includes performance evaluation of the board of directors, individual director members and functional committees.

Note 4 : The evaluation methods include internal self-evaluation by the board of directors, self-evaluation by board members, peer evaluation, appointment of external professional organizations, experts, or other appropriate methods for performance evaluation.

Note 5 : The evaluation content includes at least the following items according to the evaluation scope:

(1) Evaluation of the performance of the board of directors: At least including the degree of participation in the company's operations, the quality of board decisions, the composition and structure of the board of directors, the selection and continuous training of directors, internal control, etc.

(2) Performance evaluation of individual director members: At least including the grasp of company goals and tasks, the professional and continuous training of directors, internal control, etc.

(3) Functional Committee Performance Evaluation: Participation in company operations, functional committee responsibilities, quality of functional committee decisions, functional committee composition and selection of members, internal control, etc.

Implementation for Evaluation of the performance of the Board of Directors :

Self-Evaluation of the performance of the Board of Directors : As of 2020, the board of directors actively promoted corporate governance and effectively performed the functions of the board of directors, and evaluated that all indicators reached a good level, which was sufficient to show that the company has achieved remarkable results in the operation of the board of directors, the improvement of participation in operations, the quality of decision-making and the enhancement of efficiency. The directors gave positive comments on the operational efficiency and effectiveness of the board of directors, remuneration committee and audit committee.

4. Measures taken to strengthen the functionality of the board: (Ex. The Board of Directors has established an Audit Committee and a Remuneration Committee to assist the board in carrying out its various duties.)

(1) Goal of strengthening the functionality of the board: Ablrex established "Rules of Procedure for Board of Directors Meetings and Management Procedures for the Operation of Board Directors Meetings", which regulates the managerial systems of the board of Ablrex and strengthens the board's function of supervision and management, to let the procedures of board's meeting to follow.

(2) Implementation evaluation: The convention and process of board of directors' meeting of Ablrex is fully followed the regulation of "Rules of Procedure for Board of Directors Meetings and Management Procedures for the Operation of Board Directors Meetings". Remuneration Committee exercises its duty of review the remuneration of directors, supervisors, and managers, and provides evaluations and

suggestions about the relevant policies and internal regulations for the reference of board of directors.

- (3) Referring to “the Corporate Governance Best-Practice Principles for TWSE/TPEX Listed Companies” and related regulations, the amendment of “Corporate Governance Best Practice Principles” has been approved by board of directors and by shareholders’ meeting. The amendment states that it adopts the candidate nomination system for election of directors (including independent directors) and supervisors. The composition of the board of directors shall be determined by taking diversity into consideration and should include, but not limited to, gender, age, culture and professional
- (4) The Company refer to the “Corporate Governance Best-Practice Principles” and ahead of deadline of regulation, the Board of Directors had passed the proposal to appoint Corporate Governance Officer on Aug 5, 2019. The officer shall be in charge of the matters for Corporate Governance and strengthen Board of Directors function.
- (5) After the directors were re-elected at the shareholders meeting on 2020.06.19, the company established the Audit Committee and operated in accordance with the "Audit Committee Charter" and "Management of Operation of Audit Committee" to strengthen the functional committees of the board of directors and improve corporate governance.

3.4.2 Audit Committee Operations or Supervisors' Participation in Board Operations:

Note 1: Regardless of whether the check box is "Yes" or "No", it should be stated in the summary description field.

Note 2: Board diversity goals and implementation

Professionalism and independence of the board of directors:

The Company set forth "Corporate Governance Best-Practice Principles" and "Procedures for Election of Directors and Supervisors". The selection of directors of a company shall take into consideration the overall configuration of the board of directors. In order to achieve the ideal goal of corporate governance, the members of the board of directors should generally have the knowledge, skills and accomplishments necessary to perform their duties. Their overall capabilities should be as follows:

1. Ability to make operational judgments.
2. Ability to perform accounting and financial analysis.
3. Ability to conduct management administration.
4. Ability to conduct crisis management.
5. Knowledge of the industry.
6. An international market perspective.
7. Ability to lead.
8. Ability to make policy decisions.

Directors shall have majority seats and shall not have a kinship relationship such as a spouse or second relative. The company may set up more than two independent directors in accordance with the articles of association, and it shall not be less than one fifth of the number of directors.

Board diversity Goals

Article 20 of the "Corporate Governance Best-Practice Principles" and Article 3 of the "Procedures for Election of Directors" states that the composition of the board of directors should consider diversity and formulate an appropriate diversification policy based on its own operations, operating patterns and development needs, should include but not limited to the following two major aspects:

1. Basic conditions and values: gender, age, nationality and culture.
2. Professional knowledge and skills : such as professional background (law, accounting, industry, finance, marketing or technology), professional skills and industrial experience.

The company set up its goals based on the board's diversification policy. It hopes that the background of future board members will include one seat for female directors, one-third for independent directors, one-third for directors with employee background, and one for legal or scientific professionals so as to improve board diversity and

corporate governance.

The term of current directors is from June 19, 2020 to June 18, 2023.

The company currently has 9 seven directors, including three employee directors (one third directors 'seats) and three independent directors (one third directors' seats). The members have extensive experience in business management, industrial knowledge, financial accounting, and environmental protection. Hope to realize the diversity goals of female directors and board of directors with a major in law and risk management in future. Please refer the table below :

3.4.5 Corporate social responsibility and Best-practice implementation status deviation and reason for TWSE/TPEX Listed Companies:

Evaluation Item	Implementation Status ¹			Deviations from “the Corporate Social Responsibility Best-Practice Principles for TWSE/TPEX Listed Companies” and Reasons
	Yes	No	Abstract Explanation ²	
1. Does the company conduct risk assessments of environmental, social and Corporate Governance issues related to the company's operations in accordance with the materiality principle, and formulate relevant risk management policies or strategies?	V		In order to improve and implement the management functions for the operating environment, society and Corporate Governance, the company has set up a "Corporate Governance Sustainable Development Committee", which has Corporate Governance teams, corporate social responsibility teams and Ethical Management teams to promote and evaluate related affairs. Developed the "Code of Corporate Governance Practices", "Code of Corporate Social Responsibility Practices" and "Code of Supplier Social Responsibility" as the basis for Corporate Governance and performance of social responsibilities, and tracked the implementation situation. Annual audit plans are included in the audit Times to ensure implementation and effectiveness review or improvement of reference basis. The company has formulated the "Risk Management Policies and Procedures" and approved by the board of directors on Nov 9, 2020, also completed the 2020 annual risk assessment by the end of December, 2020 and published it on the company website. As per https://www.ablerex.com.tw/ch/CSR/4.4.1-109 年度風險評估.pdf	In accordance with Article 1, 3 of “Corporate Social Responsibility Best Practice Principles for TWSE/TPEX Listed Companies.”
2. Does the company establish Full-Time (or Part-Time) units, which are authorized by and report to the Board of Directors, to be in charge of proposing and enforcing the corporate social responsibility policies?	V		Under the supervision of the Board of Directors, the Company set up the “Corporate Governance and Sustainable Development Committee” in accordance with the Corporate Governance Evaluation Indicators on 2018.5.2. The Company set up a Corporate Governance Officer from 2018.12.1 and approved by Board of Directors	In accordance with Article 7 and 9 of “Corporate Social Responsibility Best Practice Principles for TWSE/TPEX Listed Companies.”

Evaluation Item	Implementation Status ¹			Deviations from “the Corporate Social Responsibility Best-Practice Principles for TWSE/TPEX Listed Companies” and Reasons
	Yes	No	Abstract Explanation ²	
			and the officer shall be in charge of all relative provision amendment of “Corporate Social Responsibility Best-Practice Principles” and all promotion of the relevant business. After the implementation of the announcement, the previous tasks will continue to arrange education training or promotion operations, so as to promote the implementation of corporate social responsibility policies for all employees and related parties, and continue to report the results of compliance in the board of directors every year, so as to implement corporate social responsibility. Reported to the board of directors on Dec 28, 2020 on the implementation of the company's 2020 corporate social responsibility. (Note 1)	
3. Environmental issues (1).Does the company establish an appropriate environmental management system based on its industrial characteristics?	V		(1).The company establishes and obtains ISO14000 environmental management system certification according to industry characteristics, strengthens the management of environmental and environmental protection in the plant area, and implements management and treats the environment with actions. In addition, wastes, scraps, and waste generated during the production process are subject to relevant regulations and the competent recyclers are required to recycle the waste. And issue the supplier/outsourcer's social responsibility commitment letter to reply, in order to invite the upstream manufacturers to jointly establish and coordinate the implementation of environmental protection, and move toward the green concept.	In accordance with Article 13 and 14 of “Corporate Social Responsibility Best Practice Principles for TWSE/TPEX Listed Companies.”

Evaluation Item	Implementation Status ¹			Deviations from “the Corporate Social Responsibility Best-Practice Principles for TWSE/TPEX Listed Companies” and Reasons
	Yes	No	Abstract Explanation ²	
(2). Is the company committed to improving the utilization efficiency of various resources and using recycled materials with low impact on the environment?	V		(2). The company is committed to the production and development of energy-saving products. In 2019, AblereX estimated three main products, a single-phase uninterruptible power system and a three-phase uninterruptible power system, which can help customers save 1,226,692.2 kWh in total, which can reduce about 624.4 Tons of greenhouse gas emissions. Due to the increase in shipments of single-phase UPS and three-phase UPS in 2019 compared with the previous year, and new estimates of the energy-saving benefits of solar inverters, the energy-saving assistance for customers in 2019 increased compared with 2018 957,895.2 kWh of electricity. In addition, the energy storage system (ESS500KW) launched by AblereX in 2019 belongs to the first generation product, and there is no consistent international regulatory energy efficiency standard, so it is not included in the aforementioned quantitative range of energy saving efficiency; however, this model is an integrated two-way power conversion system, The energy storage cabinet system solution of energy storage battery, system controller and cloud energy management system can coordinate with grid dispatching for real/virtual power adjustment. Its two-way power converter efficiency can reach 98.3%, and it can be scheduled according to time and electricity price. Discharging at peak times and charging at night can help reduce the power contract capacity on the user side and improve energy efficiency. Please refer to the 2019 CSR Report P.30.~36.)	In accordance with Article 12 of “Corporate Social Responsibility Best Practice Principles for TWSE/TPEX Listed Companies.”

Evaluation Item	Implementation Status ¹			Deviations from “the Corporate Social Responsibility Best-Practice Principles for TWSE/TPEX Listed Companies” and Reasons
	Yes	No	Abstract Explanation ²	
(3) Does the company assess the potential risks and opportunities of climate change for the company now and in the future, and take measures to respond to climate-related issues?	V		(3). Corporate sustainable development and social responsibility have always been our commitments and obligations since the company was founded. For the potential risks and opportunities of climate change, the company introduced greenhouse gas inventory operations in 2018, and formulated response measures such as greenhouse gas inventory, wastewater and waste management, and compliance with environmental regulations to analyze the status of greenhouse gas generation and analyze The data is used for subsequent setting of greenhouse gas reduction performance. The current and future potential risks and opportunities of climate change to the company will be assessed and discussed on the impact of climate change, disaster types and impacts, risks and threats, responses and opportunities, etc., please refer to the company's P.48~P.50 of Chinese version of CSR report in 2019. https://www.ablerex.com.tw/ch/CSR/CSR20200918.pdf	In accordance with Article 17 of “Corporate Social Responsibility Best Practice Principles for TWSE/TPEX Listed Companies.”
(4) Does the company statistical analysis the greenhouse gas emissions, water consumption and total weight of waste in the past two years, and formulate policies on energy conservation and carbon reduction, greenhouse gas reduction, water consumption or other waste management?	V		(4). Since 2016, the company began to conduct greenhouse gas inventories in Taipei office and Pingtung factory with reference to ISO14064-1. The main sources of greenhouse gas emissions identified are electricity, transportation vehicles (diesel), refrigeration equipment (refrigerants), etc. The greenhouse gas emissions in 2019 were 442.4 tons of CO ₂ e, a decrease of 16.9% from the previous year. We actively implemented the company's energy-saving plan to improve energy efficiency. The greenhouse gas	In accordance with Article 16 and 17 of “Corporate Social Responsibility Best Practice Principles for TWSE/TPEX Listed Companies.”

Evaluation Item	Implementation Status ¹			Deviations from “the Corporate Social Responsibility Best-Practice Principles for TWSE/TPEX Listed Companies” and Reasons
	Yes	No	Abstract Explanation ²	
			emissions from 2017 to 2019, the annual greenhouse gas emissions decrease year by year. You can refer to the company's 2019 CSR report P.48~P.50) https://www.ablerex.com.tw/ch/CSR/CSR20200918.pdf In order to cooperate with the promotion of energy saving and carbon reduction policies, the company has focused on and implemented a number of Energy saving and carbon reduction measures. Example: The office controls the temperature of the air conditioner. Male colleagues do not wear ties. In summer, the company issues short-sleeved breathable shirts and encourages colleagues to wear the same type of clothing. It is required to turn off the lights, replace water-saving shower faucets, use energy-saving lamps, implement garbage classification, and promote the concept of caring for the earth. Also refer to relevant regulations and formulate specific improvement goals based on actual conditions.	
4. Social issues (1). Does the company formulate relevant management policies and procedures in accordance with relevant regulations and international human rights conventions?	V		(1). In accordance with the Labor Law and related labor laws and regulations, the company formulates "Work Rules", "Corporate Social Responsibility Best Practice" and other relevant rules and methods, provide management units and employees to follow, and provide stable and preferential treatment, complete education and training, promotion and development System and create a safe and hygienic working environment to protect the legitimate rights and interests of employees. In addition, the "Human Rights Policy" (Note 2) clearly stipulates the prohibition of illegal employment of child labor, forced labor,	In accordance with Article 18 of “Corporate Social Responsibility Best Practice Principles for TWSE/TPEX Listed Companies.”

Evaluation Item	Implementation Status ¹			Deviations from “the Corporate Social Responsibility Best-Practice Principles for TWSE/TPEX Listed Companies” and Reasons
	Yes	No	Abstract Explanation ²	
			inhumane treatment, and discrimination. In addition, suppliers and contractors should abide by the relevant human rights provisions of the Labor Law and stipulate that "suppliers Social Responsibility Best Practice" so as to be followed.	
(2). Does the company formulate and implement reasonable employee welfare measures (including compensation, vacation and other welfare, etc.), and appropriately reflect operating performance or results in employee compensation?	V		(2). The company has formulated the "Working Rules" in accordance with the Labor Standard Act, which summarizes the chapters on salary, bonuses, working hours, vacations, attendance and assessment, and welfare measures, as well as the company's articles of association. If the company's annual profit is obtained, it should be based on that year. The performance situation provides 6% to 10% for employee compensation. In addition, the salary and remuneration committee considers the company's relevant policies, employee performance evaluation system and corporate social responsibility policy, and considers the salary and remuneration policies, systems, standards and structures into the salary and remuneration policy.	In accordance with Article 21 of “Corporate Social Responsibility Best Practice Principles for TWSE/TPEX Listed Companies.”
(3). Does the company provide safe and healthy work environments for its employees, and organize training on safety and health for its employees on a regular basis?	V		(3). The company has set labor safety and health objectives and implementation plans, regularly organize employee health checks in accordance with regulations, and provide sports and leisure rooms and nursing rooms for employees. The production workshop regularly checks the noise intensity. It involves wearing safety shoes, labor safety propaganda, fire drills and drills in the heavy object area, and places relevant safety guidelines in the work	In accordance with Article 20 of “Corporate Social Responsibility Best Practice Principles for TWSE/TPEX Listed Companies.”

	Yes	No	Abstract Explanation ²	
			environment, and provides protective equipment and emergency medicine to maintain employees. Safe. (For details, please refer to web site and the 2020 Annual Report)	
(4). Does the company have an effective career development training program for employees?	V		(4). The company provides professional training and timely adjustment of work content according to the nature of the employees' work, so as to increase their experience in applying what they have learned, and requires them to participate in external continuing or qualified refresher courses in accordance with laws and regulations to obtain relevant certificates or professional skills and strengthen their career Development capabilities. In addition, in the personnel evaluation and promotion, we also refer to the training and performance of employees, and actively encourage self-study and function enhancement to enable further integration between individuals, families, and work, and to cultivate talents, retain talents, and grow personally. Get a virtuous circle.	In accordance with Article 21 of “Corporate Social Responsibility Best Practice Principles for TWSE/TPEX Listed Companies.”
(5). Regarding the health and safety of customers of products and services, customer privacy, marketing and labeling, does the company comply with relevant laws and regulations and international standards, and formulate relevant consumer protection policies and appeal procedures?	V		(5). The laboratory established by the company's research and development center cooperates with certification units to meet international energy efficiency standards to ensure that products can be legally sold in various regions around the world and meet customer and market energy-saving product specifications. Because the laws and regulations of different countries are different, the access methods of various electronic products must submit test reports or certificates in accordance with relevant local regulations. The company has established customer complaint processing procedures to provide transparent and	In accordance with Article 23 and 24 of “Corporate Social Responsibility Best Practice Principles for TWSE/TPEX Listed Companies.”

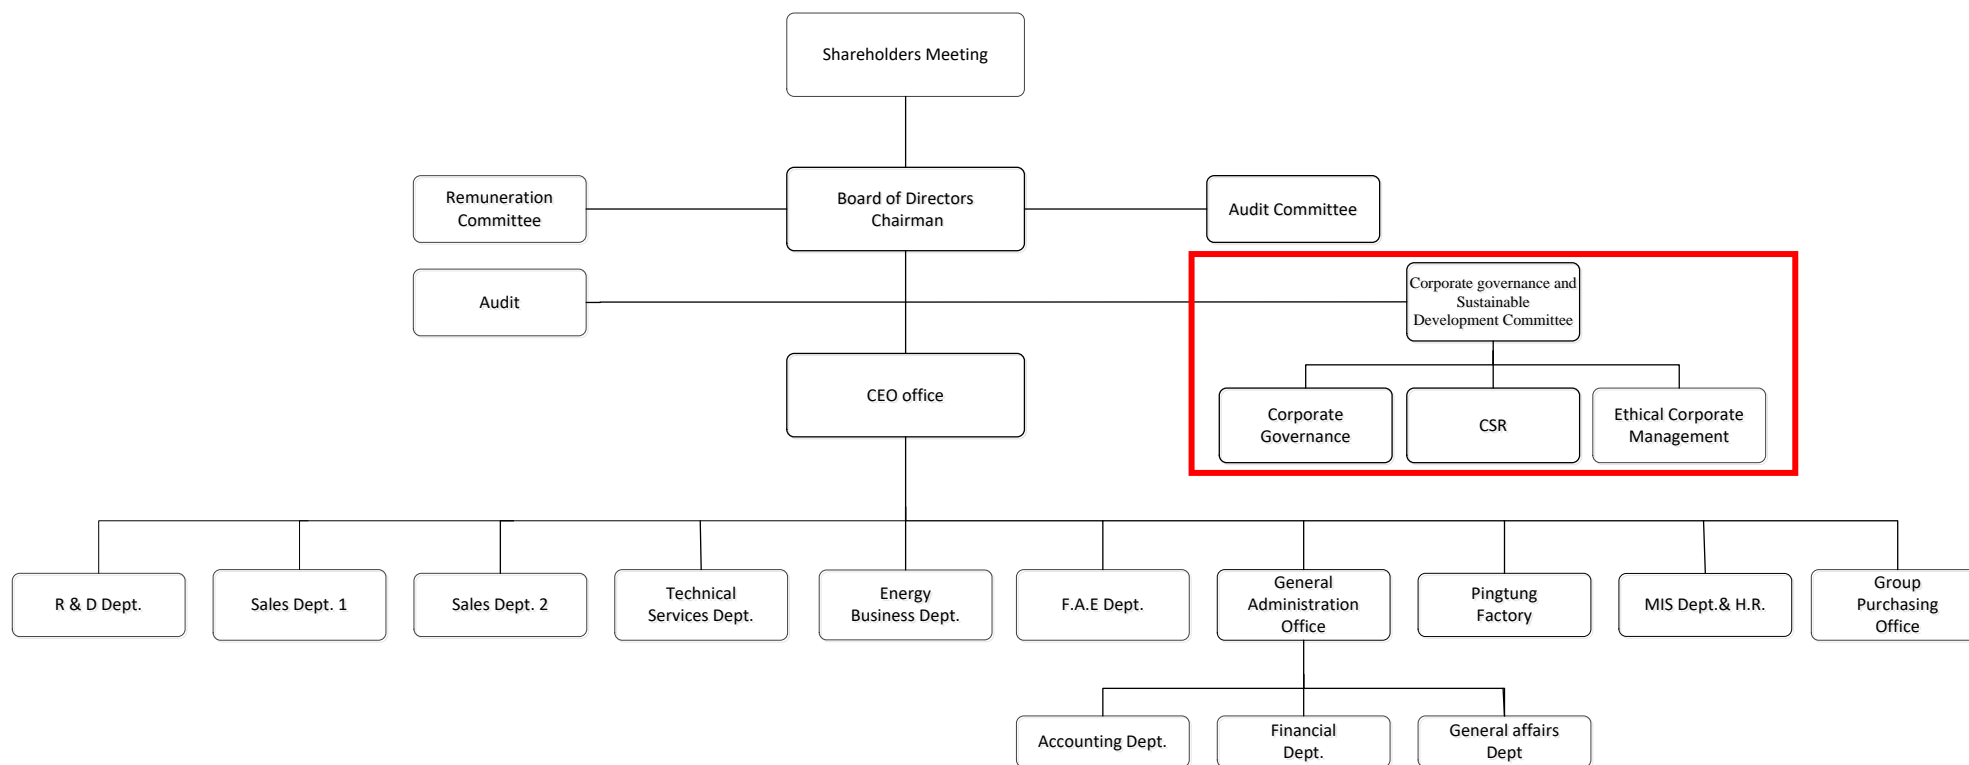

Evaluation Item	Implementation Status ¹			Deviations from “the Corporate Social Responsibility Best-Practice Principles for TWSE/TPEX Listed Companies” and Reasons
	Yes	No	Abstract Explanation ²	
			effective consumer complaint procedures for products and services. In addition, the Corporate Social Responsibility Area is set up on the company's website, which includes the establishment of a stakeholder communication channel to facilitate consumer complaints and opinions expressed by various stakeholders. From 2016 onwards, the English Corporate Social Responsibility Area website is also available for foreign language stakeholders to think of a platform for further understanding of the company's business situation and providing complaints. Each year, we regularly implement customer satisfaction surveys, analyze and improve the results of the investigations, and conduct internal audits on these operations to ensure the implementation of this policy and related operations.	
(6). Does the company formulate a supplier management policy that requires suppliers to follow relevant regulations and issues regarding environmental protection, occupational safety and health, or labor rights?	V		(6). The company originally planned to have procedures such as "Supplier Evaluation Operating Procedures" and "Supplier Environmental Impact Operating Procedures", to evaluate the quality and environmental impact situation before trading with suppliers, and to confirm the actual situation. Separately set the "Corporate Social Responsibility Code" and "Supplier Social Responsibility Code", and evaluate new suppliers in accordance with regulations to determine whether they have affected the society in the past, and follow-up planning will further increase manufacturers' impact on environmental and social assessment bonus items(ISO -9001 & 14001, OHSAS18001, etc.), as an important reference for business dealings. By cooperating with suppliers and	In accordance with Article 26 of “Corporate Social Responsibility Best Practice Principles for TWSE/TPEX Listed Companies.”

Human rights policy

Updated on 2020.12.28

In order to value the promotion of labor and business ethics policies, the company has adopted the principles and spirit of the Global Reporting Initiative's (GRI Standards) in 2016. In addition to the implementation of human rights related policies, and in accordance with the government's "Labor Standards Act" and other related laws and regulations, the "work rules" are established to regulate the company's rights and obligations related to the human rights of employees. In order to protect the basic human rights and related rights and interests of employees, it is believed that every employee should be treated with fair humane treatment and respect, and established "control measures and punitive measures against sexual harassment" and provided a complaints pipeline to safeguard the rights and interests of female employees.

Human rights assessment

The company is committed to the sustainable development and operation of the company, and also value people and the environment, and assumes and promotes social responsibility for employees, consumers and the overall environment. In order to reflect the commitment to providing a safe and healthy workplace, an environmental engineering and health management unit has been set up to deploy occupational safety and health personnel to manage the occupational safety and health of employees, and regular health inspections for in-service employees are held. And work together with partners to formulate a "Supplier Social Responsibility Code" and sign a corporate social responsibility commitment to expand its influence.

Human rights concerns and practices

Comply with relevant local government regulations and international guidelines

The company has a detached ethical standard and must comply with relevant local government regulations and international standards and regulations. When implementing business activities, it should adopt standards that can provide employees with the greatest guarantees.

Eliminate discrimination and reasonably ensure equal job opportunities

The company ensures equal treatment in employment, salary and welfare, training opportunities, promotion, dismissal or retirement and other labor rights and interests, and does not discriminate on the basis of age, gender, physical and mental disabilities, race, ethnicity, nationality, religion or other status, etc. Factors are treated unfairly.

Prohibition of child labor

The company must not illegally employ child labor (15 to 16 years old according to Enforcement Rules of the Labor Standards Act), and it is absolutely prohibited that child workers work from 8 p.m. to 6 a.m. or engage in heavy and dangerous work in order to comply with the norms of the ILO Convention No. 138 and the UN Convention on the Rights of the Child. .

Prohibition of Inhuman treatment

The company prohibits personal injury, improper physical punishment, threats of physical, sexual and other harassment, verbal violence, or any other form of intimidation.

Prohibition of forced labor

The company stipulates that working hours (including overtime) should not exceed local laws and regulations and one day off during the seven days of work. The attendance system is set to list abnormal attendance situations, and special personnel are set to review abnormal records, and the relevant unit supervisors are notified to understand the work status of colleagues. Properly work arrangements to take care of the health of colleagues and the quality of family life.

Respect employees' freedom of association and right of collective bargaining

The company respects the freedom of assembly and association of employees and the right to collective bargaining. According to China's trade union law, employees have the right to organize and join trade unions.

Provide a working environment with safety and health

The health of employees is the greatest wealth of an enterprise ! To the company, the health promotion can provide a complete health and safety plan, enhance the sense of honor and responsibility of the company, establish a corporate image, and implement corporate social responsibility; for employees, it's not only provides a safe and healthy working environment, It can also increase morale, improve health, increase job satisfaction, extend its benefits to families and communities, and create a win-win situation.

Physical and mental health and work balance

The company has a gymnasium and washrooms to provide colleagues to strengthen their bodies during their leisure time. In addition, all employees at work provide general health check every three years, and the cost of the aforementioned check is borne by the company. In terms of safety, the company organizes labor safety and health and fire safety training once every six months. In order to supervise the quality of the office environment, we

implement office area cleaning and maintenance and environmental disinfection operations in accordance with the annual plan, and regularly appoint professional organizations to conduct drinking water quality checking for drinking fountains. It is for all to provide employees with a healthy, safe and hygienic environment.

Human rights risk mitigation measures

● **Human rights protection training practices**

- Provide relevant laws and regulations for newcomer training
The company will arrange new recruit training for new recruits, summarizing company profile, business philosophy, quality policy, work rules, employee code of ethics and conduct, management of personal data protection, employee environmental safety and hygiene introduction, Ethical Management code, corporate social responsibility Codes, supplier social responsibility codes, human rights policies, major internal information processing and insider transaction management measures, product introductions, information security risk management, respect for intellectual property rights, welfare courses, etc., to understand the company’ s corporate culture, vision and working environment, And put the relevant measures on the company website and internal staff system for all colleagues to follow.
 - Provide employee opinions or appeal channels
The company prohibits personal injury, improper corporal punishment, threats of physical, sexual and other harassment, verbal violence or any other forms of intimidation. Set up internal and external feedback or appeal channels.
 - Occupational Safety Training
The company organizes labor safety and health and fire safety training every six months to enhance the awareness of environmental work and health. Occupational safety and health personnel may retrain in accordance with the regulations of the competent authority to ensure continuous improvement.
- **Number of participants in training related to promoting human rights protection**
In 2020, there will be a total of 200 hours of internal staff education and training with 50 people.

Price / Dividend Ratio = Average Market Price / Cash Dividends per Share

Cash Dividend Yield Rate = Cash Dividends per Share / Average Market Price

Note 1: Earnings distribution of 2020 has been approved by Board of Directors and will be proposed in Shareholders' meeting.

Note 2: Reviewed by CPAs.

4.1.6 Dividend Policy and Implementation Status

A. Dividend Policy stated in the Articles of Incorporation:

- (1) As regulated in Article 25-1 of Articles of Incorporation in operation, when the annual final accounting statement shows earnings, the Company shall contribute 6-10% of earning as employee compensation and not more than 2% of earning as compensation as remuneration to directors and supervisors. But the company still has accumulated losses, should be made up. The remuneration to directors shall be Cash. Employees' compensation shall be made by stock or cash. It shall be held by the board of directors by attending more than two-thirds of the directors and attending a majority of the directors 'consent, and report to the shareholders' meeting. In addition to the employees of the Company, the employees of the Company shall pay the employees of the Company who meet certain conditions.

As regulated in Article 26 of Articles of Incorporation in operation, when the annual final accounting statement shows earnings, the Company shall contribute tax and compensate the accumulated loss of previous years, and then contribute 10% of earnings as legal reserve unless the accumulated legal reserve reached the amount of the capital of the Company. Secondly, the Company shall contribute to special reserve based on the laws or regulations of administrations, together with accumulated undistributed earnings as distributable earnings. If earnings remain, the Company shall retain part of earning before Board of Directors make a distribution proposal according to the operation conditions and submit the proposal to shareholders' meeting for resolution.

The distribution proposal proposed by the Board of Directors shall, under the consideration of no other special occasion, be no less than 65% of the after-tax earnings of current year in principles. As regulated in Article 26-1 of Articles of Incorporation in operation, distribution of shareholders' dividend could be in the form of cash or shares, which the cash distribution proportion to shareholders shall no less than 20% of shareholders' dividend.

The form and proportion of such earning distribution is based on the future fund needs of the Company and the long-term operation plan, which could be proposed by Board of Directors under the consideration of the current operation status with the balance of taking care of shareholders' rights, dividend policies, and planning fund demand, and submit to shareholders' meeting for adjustments and resolutions.

(2) Proposed Distribution of Dividend for this meeting of shareholders

Unit : NTD

Items	Amount	Description
2020 Net income	41,916,559	
Add/Less: 2019 Retain earnings adjustments	122,416	Old-version pension actuarial difference, 1% share loss with sold AblereX-JP.
2020 Net profit subtotal	42,038,975	
Less: provision of legal reserve (10%)	-4,203,898	
Add: Special surplus reserve	173,620	Reversal of Other equity interest -Financial statements translation differences of foreign operations
Add: 2019 undistributed earnings	39,563,128	
2020 Distributable earnings	77,571,825	
Less: cash dividend to shareholders	45,000,000	NTD 1.0 cash dividend per share (Note: The allocated amount already includes special surplus reserve.)
Undistributed earnings	32,571,825	

Note:

1. This proposal of Profit distribution has been approved by Board of Directors' resolution on Mar 19, 2021.

(3) Expectation of significant change on dividend policies: None.

4.1.7 Impact of the proposed stock dividend in shareholders meeting on business performances and EPS:

Board of Directors decided to distribute cash dividend from profit in 2020 and no stock dividend. The Company did not have financial forecast, so this clause is not applicable.

4.1.8 Compensation to employees, directors and supervisors

1. Information of dividend to employee and remuneration to directors and supervisors was stated in the Articles of Incorporation:

As stated in Article 25-1 of the Articles of Incorporation, the Company shall contribute not less than 6% of its annual earning as employees' compensation and not more the 2% as remuneration to directors and supervisors. But the Company shall compensate its accumulated losses first.

In addition to the employees of the Company, the distribution of employees' bonus could include the employees of subsidiaries who meet certain conditions.

2. Accounting process applied to the estimation base of dividend to employees and

remuneration to Directors, Supervisors, and employees, outstanding shares computing base for stock dividend distribution, and the spread between amounts distributed and estimated:

Compensation to employees estimated to be NTD 3,263 thousands and to Directors and Supervisors to be NTD 1,088 thousands is estimated 6% and 2% of annual profit in 2020, accordingly. The differences between actual distribution amount resolved by Board of Directors and the estimated amount will be adjusted as changes in accounting estimates.

3. Dividend distribution of employees resolved by the board of directors

a. Distribution amount of cash dividend and stock dividend to employees and remuneration to directors and supervisors:

Board of Directors has approved to distribute NTD 3,270 thousands as employees' remuneration in 2020 and NTD 1,080 thousands as remuneration to directors and supervisors. The distribution amount aforementioned is NTD 1 thousands less than the estimated amount reported in 2019. The main consideration is the need of adjustments in actual distribution operation. The differences between actual distribution and estimated amount reported will be regarded as changes in accounting estimates and be calculated in profit or loss in 2021.

b. Proposed stock dividend to employees and its ratio to total net income of individual financial report and to total employees' remuneration:

Board of Directors has approved to distribute employees' compensation by cash, and no stock dividend is distributed to employees, so the ratio of stock dividend distributed to employees to total net income of individual financial report and to total employees' remuneration is zero.

4. Actual distribution of employees' bonus and remuneration of Directors and Supervisors:

The actual earning distribution of 2019 is as stated aforementioned. The differences NTD 113 thousands less than the recognized employees' compensation is mainly due to the distribution changes with profit, which has been adjusted in the profit or loss of 2020.

2018 Earnings Distribution

Item	Shareholders' Meeting approved on Dec. 31, 2019	on Board of Directors approved on Mar. 19, 2020	Difference	Cause of Difference
Remuneration of Directors and Supervisors	\$906	\$870	-\$36	Distribute practice tolerance
Employees' cash compensation	\$2,717	\$2,640	-\$77	Distribute practice tolerance

4.1.9 Buyback of Treasury Stock : None

4.2 Bonds : None

4.8 Financing Plans and Implementation : None

V. Operational Highlights

5.1 Business Activities

5.1.1 Business Scope

(1) Main areas of business operations

- (1) Manufacturing and distribution of uninterruptible power system (UPS).
- (2) Manufacturing and distribution of active power filter.
- (3) Manufacturing and distribution of photovoltaic power inverter system.
- (4) Agent of large capacity UPS through project distribution and services.
- (5) Offering maintenance and technical services.

(2) Revenue distribution

Unit ; NT\$ thousands; %

Major Divisions	2019		2020	
	Total Sales	Total Sales	Total Sales	(%) of Total Sales
UPS	986,409	40.06%	805,863	34.12%
APF	124,413	5.05%	110,008	4.66%
PV	32,670	1.33%	55,873	2.37%
Project	958,810	38.94%	979,076	41.45%
Others	360,088	14.62%	411,103	17.41%
Total	2,462,390	100.00%	2,361,923	100.00%

(3) Main Products and Services

- (1) Independent R&D, manufacturing, and distribution of single-phase uninterruptible power system (commonly known as single-phase UPS or small UPS) at 20KVA (and below).
- (2) Independent R&D, manufacturing, and distribution of three-phase uninterruptible power system (commonly known as three-phase UPS or mid/large UPS) at 10KVA (and above).
- (3) Agent distribution of Europe's SOCOMEC three-phase uninterruptible power system (commonly known as three-phase UPS or mid/large UPS) at 15KVA (and above).
- (4) Independent R&D, manufacturing, and distribution of power quality improvement equipment – active power filter (abbreviated as APF, also known as active power harmonics conditioner).
- (5) Independent R&D, manufacturing, and distribution of green energy system photovoltaic inverter (PV Inverter), also known as solar inverter.
- (6) Design and manufacturing services for OEM/ODM/OIM (Original Innovative Management) models.
- (7) Maintenance and technical services for the aforementioned products.

(4) New Products Planned for Development

- (1) Development of new multi-function UPS technologies that incorporate features of miniaturization, intelligent, networking, and distribution.
- (2) Mid-sized and large three-phase high frequency parallel UPS

- (3) Power quality management technology
- (4) Hybrid system PV Inverter
- (5) Power management software technology
- (6) SmartGrids application related PDU
- (7) Wireless BMS
- (8) Energy storage system

5.1.2 Industry Overview

(1) Macroeconomic Environment

① Uninterruptible Power Supply (UPS)

With the rapid development of high-tech electronic products in recent years, the operation of procedure-control workstations computer and precision instruments at high-tech production facilities relies heavily on quality and reliable power supply in order to maintain normal operation. Poor power quality could result in erroneous action for precision equipment or even disruption of the manufacturing process, leading to severe losses. Common problems relating to power quality include voltage distortion, overvoltage, under voltage, power disruption, and so forth. And as such, ensuring high quality and reliable supply of power has become a vital issue for the power company and all users. In order to prevent issues of power disruption or unstable voltage, most users would incorporate uninterruptible power supply (UPS) systems to ensure power quality and in turn enhance the reliability of precision equipment operation.

Within their given electricity storage capacity, UPS is designed with power converter interface to supply the required power in the event of anomalies with the AC mains supply. And as such, UPS systems have been extensively used as the backup power solution for information, communication, and precision instruments to prevent sudden power failure from halting equipment operation, thereby improving the reliability of equipment operation. And as such, the demand for UPS has been continually growing.

UPS systems can generally be separated into three major categories: Off-line, On-line and Line interactive. These three types of UPS systems each has their own strengths, weaknesses, and suitable applications. Common Off-line UPS are typically single-phase low capacity products with relatively few functions, therefore are available at cheaper price points. Such products are generally used for PCs and other peripheral equipment. Designed with hot standby functionality, when AC mains supply is normal, the switch between the UPS and load would be activated in order to prevent the circulation of electrical current between the AC mains supply and the UPS system. However, should the main supply fail, the load would be exposed to a few milliseconds of power failure due to the transition of the switch. This would in turn lower the operating efficacy of the load. On-line UPS system operates by converting the AC power from the AC mains supply into DC power through a DC/AC inverter. A percentage of the DC power is stored into the battery charger while a part of the DC power is sent through a DC/AC inverter to be converted to steady, reliable AC power to be fed to the load. When in operation, an On-line UPS system features a two-stage power inverter between the load and AC mains supply. And as such, the quality of power from the load would not be susceptible to the influence of AC mains supply, making the On-line UPS the best

power protection solution for the load equipment. This explains why On-line UPS systems are frequently deployed for instruments and equipment that require power of better quality. However, since the power carried by the load on such UPS systems requires conversion through a two-stage inverter, the circuitry design would be more sophisticated and have lower efficacy. As for Line interactive UPS systems, such systems feature paralleled operation of the power inverter and AC mains supply as their technological basis, with the power inverter responsible for charging and discharging the battery at the same time. In other words, when the AC mains supply is working normally, its power will be directly sent to the load and charge the battery through the power inverter. When the AC mains supply fails, the stored power on the battery would be sent to the load through the power inverter. Such UPS systems feature relatively simpler system architecture and are relatively cheaper in cost. And since the load is directly powered from the AC mains supply when it is working normally, there will be no recurrent energy loss. However, the issue of conversion time still remains.

In recent years, in an effort to improve the efficiency of On-line UPS systems, in addition to adopting three-stage power inverters to handle the task of conversion, the system also features a new economic operation mode. In this mode, the DC/AC inverter of the UPS system would be set to hot standby, with the AC mains supply providing power directly to the load.

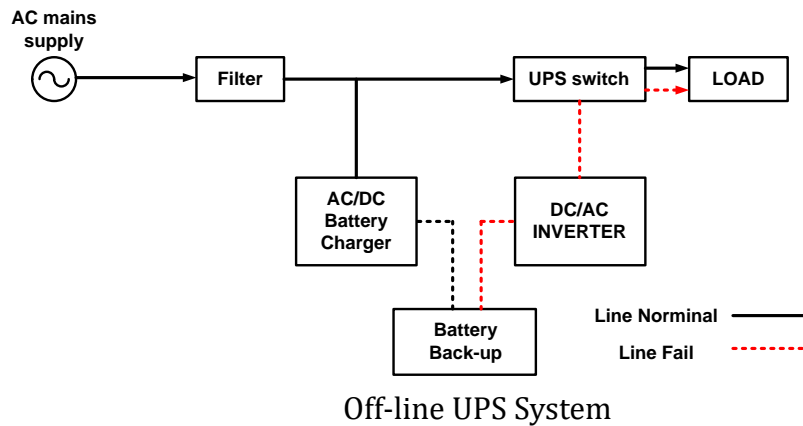

Table 1 Strengths and Weaknesses of the three UPS System Architectures

Type	Strengths	Weaknesses
Off-Line	<ol style="list-style-type: none"> 1. Simple circuitry 2. Higher power efficiency 3. Low cost, compact form factor 	<ol style="list-style-type: none"> 1. Brief power disruption (~1ms) 2. Lacks voltage stabilization function; power quality is susceptible to the effects of AC mains supply
On-Line	<ol style="list-style-type: none"> 1. No brief power disruption 2. Improves upon literally all existing issues of power quality with AC mains supply 	<ol style="list-style-type: none"> 1. Higher cost 2. Sophisticated control circuitry 3. Inferior efficiency
Line Interactive	<ol style="list-style-type: none"> 1. Simple circuitry 2. Low cost 	<ol style="list-style-type: none"> 1. Brief power disruption 2. Sophisticated control mechanism

A. Off-line

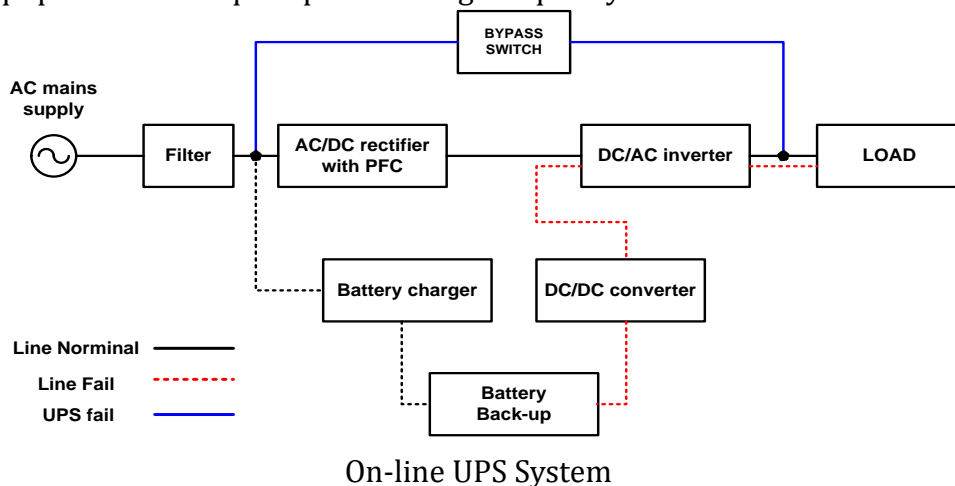

The architecture of an off-line UPS system primarily features an AC/DC charger, a battery, and a DC/AC inverter. When the line is normal, the required power comes directly from AC mains supply while a portion of the power goes through the AC/DC battery charger to charge the battery. Since the inverter is running without load, the quality of the power of load is determined directly by the AC mains supply. When the line fails, the inverter will convert the power from the battery to AC current and keep connected equipment running. Typical off-line UPS systems only provide backup power but do not improve power quality. In addition, when the line fails, the system will have a momentary lapse of switch transition. And as such, off-line UPS systems are not truly “uninterruptible” in the truest sense of the term due to its “instantaneous disruption”. When the voltage falls below the permitted value, the system will

automatically switch over to providing power from the battery, enabling the user to continue with equipment operation without noticing the disruption. The reaction time of this “instantaneous disruption” before the battery kicks in is under 0.1 seconds. Additionally, off-line UPS systems provide square waves and are therefore suited only for PCs. And as such, the product is mostly used in smaller systems or for equipment that are less important.

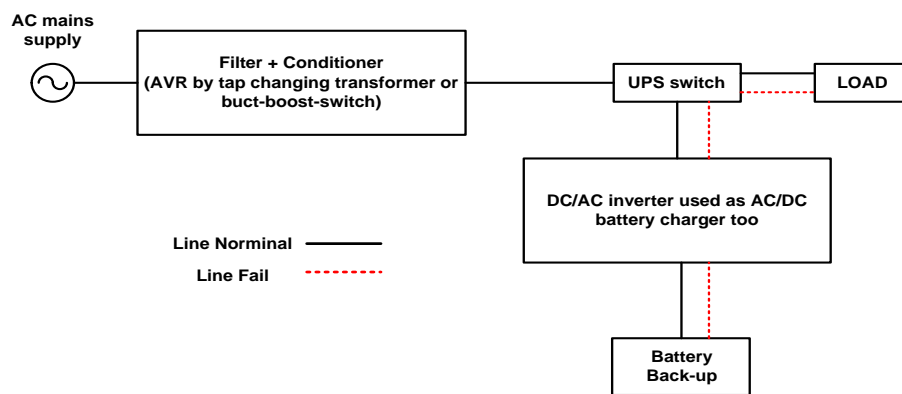

B. On-line

On top of having a more sophisticated architecture compared to off-line UPS, on-line UPS systems are most distinctively different due to their means of power control. When the line is normal, the power will go through the AC/DC rectifier, with a portion of the DC current going to the battery charger to charge the battery while the other portion is converted to AC current to power the connected equipment. When the AC mains supply fails, the inverter will continue to supply power, which will come from the battery. This means that there will be no disruption of power and since the connected equipment is isolated from the AC mains supply by the on-line UPS system, power quality is essentially controlled by the UPS. This makes it possible to resolve issues of over/under voltage, surge, electromagnetic interference, or frequency drift. Not only that, on-line UPS has sine wave output, making it suitable for all equipment. As such, on-line UPS systems are typically used for precision equipment that require power of higher quality.

C. Line-interactive

Line-interactive UPS systems operate on similar principles as off-line UPS systems, with the most distinctive feature of having a multi-tap variable-voltage autotransformer (i.e. operating as both an AC/DC inverter and a rectifier). In addition to charging the battery during normal operation, the autotransformer will automatically function as an inverter when AC mains supply fails to deliver power from the battery to the connected equipment. Since the product design did not include a bypass switch between the AC mains supply and the load, such system will still experience “instantaneous disruption” in the event of a power failure (with an extremely short response time between the disruption to battery power supply under 0.04 seconds). As line-interactive UPS systems output sine waves, they can work with more equipment compared to off-line UPS systems. With functionalities falling between off-line and on-line UPS systems, line-interactive UPS systems are more suited for the needs of small enterprises or website servers.

Line-Interactive UPS System

Within their given electricity storage capacity, UPS is designed with power converter interface to supply the required power in the event of anomalies with the AC mains supply. And as such, UPS systems have been extensively used as the backup power solution for information, communication, and precision instruments to prevent sudden power failure from halting equipment operation, thereby improving the reliability of equipment operation. Therefore, such products have definitive values in the market. Furthermore, with more and more electronic equipment and applications emerging in consumers' lives (such as cable TV, broadband internet access, wireless communication base stations, surveillance systems, security systems, and telematics), the UPS market that once did not exist, is now seeing gradual growth in demand. One can anticipate significant potential for growth for the UPS market in the near future. Ablerex has been specializing in the development and manufacturing of UPS ever since its foundation, with a focus centered on the development of high-end on-line UPS that requires extensive technical know-how and great effort on continual improvement on the functionalities of our line-interactive UPS. We strive to

satisfy our customers' needs by achieving maximum performance with lower costs. This would prevent the company from engaging in a price war with other manufacturers in the low-end offline UPS product market.

② Active Power Filter (APF)

Due to the rapid development of power semiconductor component manufacturing technology and power electronic applications, power electronic equipment have been extensively used in different domains. Nevertheless, power electronic equipment have the inherent flaws of high input current harmonics and low input power factor, with harmonic currents being responsible for the deterioration of power quality. In recent years, precision equipment has been extensively used in different industries and such equipment has relatively high requirement for power quality. Consequently, the power company had to establish harmonics regulation standards to limit the amount of harmonic current generated by users in order to maintain the quality of power from the electricity distribution system.

Traditionally, passive power filters are designed with passive components such as inductors and capacitors. Due to their low price points, such products have been extensively used to mitigate harmonic currents. However, passive power filters have the following shortcomings: (1) Change of impedance in a power system could severely affect the characteristics of the filter. (2) Parallel resonance could occur between the power reactor and passive power filter and consequently amplifying the load's harmonic current, resulting in even greater harmonic current distortion. (3) Serial resonance could occur between the power reactor and passive power filter, which may in turn cause harmonic currents from other non-linear load to enter the passive power filter, resulting in an overload of the passive power filter. (4) Filter parameters are difficult to design due to the changes in system status or deviations of filter capacitance or inductance. (5) Filter characteristics cannot be fixed due to changes in load. Given these aforementioned shortcomings, active power filter had been developed in recent years as an alternative. An active power filter features a power transducer built with power semiconductor switching components such as GTO, IGBT, or power transistors. Active power filter not only solves the problem of harmonics but also compensates virtual work to convert the input current of AC mains supply to pure sine waves of the same phase as the AC mains supply voltage. An active power filter comprises three components: a converter, an energy storage component and a control circuitry. In the past, passive power filters have been used as a means to mitigate harmonics but the product still has notable drawbacks that current technologies cannot overcome. In contrast, active power filter was developed in recent years due to the advancement in power electronic technologies as to suppress harmonics while regulating harmonics and improving power factor.

Presently, there are three types of filters that are designed to suppress harmonics: 1. Traditional passive power filter (PPF), 2. Active power filters (APF) and 3. Hybrid power filters (HPF). The following section will provide brief descriptions for each type of power filter.

A. Passive Power Filter

Traditionally, passive power filter (PPF) comprises passive components including capacitors, reactors, and resistors. However, due to the characteristics

of specific passive components, PPFs do suffer from inherent drawbacks. For example, the result of harmonic absorption of a PPF may change along with any change in the system's impedance. In addition, when unknown external harmonic current enter the system or any change of the systems' load/additional harmonic load could cause the existing PPF to overload or resonate, thereby leading to accidents. In addition, power capacitors and inductors in PPFs have error margins. Increases in usage duration and temperature changes could cause the values of the power capacitor or inductor to shift and thereby impede its filtering capabilities. Not only those, the passive components are heavy and bulky, making PPFs requiring more physical space.

B. Active Power Filter

Active power filter (APF) is an AC/DC conversion equipment that applies relevant power electronic technologies. Depending on the load demand, APF would create a harmonic current that is of the opposite phase of that from the load and send it to the power system. The harmonic currents would cancel each other and achieve the filtering of harmonics. APF is therefore used to resolve destructive issues caused by harmonic currents, such as transformer overheat, voltage distortion, and machine failure. However, power electronic components of high power are restricted by their switching frequencies, and this result in specific limit of power capacity for APF.

C. Hybrid Power Filter

As both passive and active power filters have their limitations that are hard to overcome, products that combine features of both active and passive power filters were developed as a result. Such products are known as hybrid power filters (HPF). HPF incorporates a power transducer to improve upon the characteristics of PPF while resolving the issue of resonance. Compared to APFs, PPFs make it possible to reduce the capacity of the power transducer, rendering its application on larger capacity filter systems.

The exclusive technology we have developed for our APF feature immediate response control, which enables real-time compensation at any point during each current cycle to create a harmonic current that is the opposite of that of the load and send it to the power system. This harmonic current would cancel the harmonic current at the load, thus resulting in a current wave that is close to sine at the power system and thereby achieving harmonic filtering. Such rapid response capabilities make our APF ideal for equipment with substantial load changes, such as pumps used to maintain water or barometric pressure, high-end passenger/cargo elevators, and other high-tech industries. Presently, the world's APF market is dominated by US and Japanese manufacturers including FUJI, TOSHIBA, MERLIN, ABB and so forth, with no other leading manufacturers in Taiwan. With our immediate response control technology, our APFs have outstanding transient response capabilities that enable immediate compensation at any point during each current cycle, unlike other products designed for Fast Fourier Transform (FFT) that only output response after the load has changed and delayed for two cycles. In addition to breaking through the existing limits of current product architecture and technological deployment,

this technology is also compliant with pertinent international safety regulations, thereby allowing the company to distribute the products more extensively. We have essentially debunked the misconception that conventional high-spec products will inevitably fail in their safety regulation compliance and our APFs have proven to have a great competitive edge in the domestic market. Coupled with the latest 150A European/US standard series we have developed in 2012, our APFs are expected to bring positive boost to the company's operational growth in the near future.

③ PV Inverter

A. Current status of the global solar power market:

Compared to 2011, the demand for PV inverter in Europe has fallen significantly. But thanks to the explosive growth of the Chinese market, Ablere managed to achieve a total of 31 GW in sales in 2012, translating to a growth margin of 5%. Nevertheless, the drastic decline in market prices has resulted in a decrease in real revenue for manufacturers.

According to IMS Research's prediction, the market for PV inverter will continue to grow, with more noticeable growth in demand in 2017. The demands for small business building PV system (usually between 10~100kW) and PV stations (typical installation of 500kW or higher) are expected to grow more significantly while the demand for residential PV system will be less apparent.

It is estimated that approximately 60% of the PV system installation in the future will take place in Asia, mainly China, and the majority of them would be PV stations. As for residential PV systems, Japan will be the only market that may promise some potential.

B. Types of solar PV systems

1. Stand-Alone System

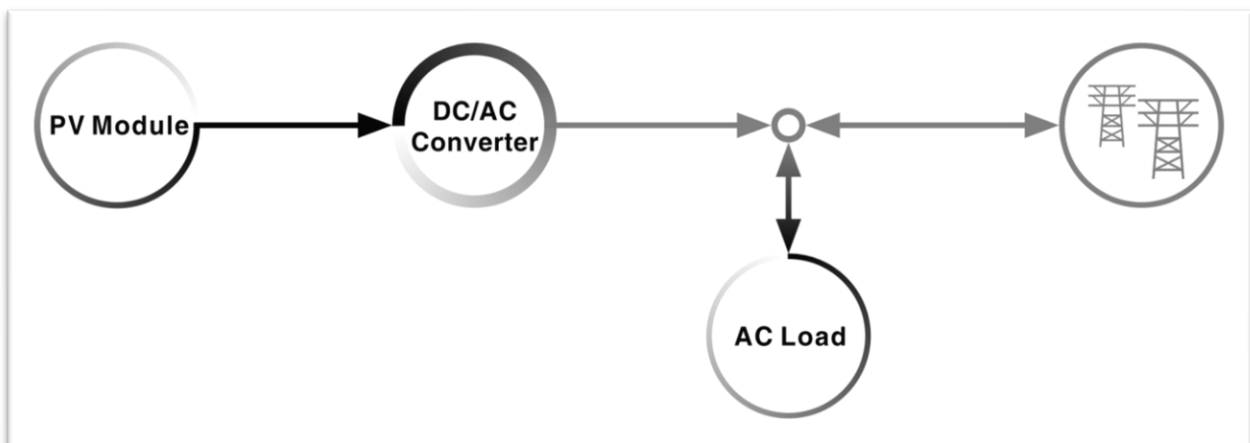

As its name implies, a stand-alone PV system is capable of generating the power that is required without having to be connected to the power distribution grid of the power company. Since the system will not be able to generate electricity in the absence of sunlight at night or in poor weather, stand-alone systems have incorporated battery banks that store power when there is ample sunlight in order to ensure stable supply of power. Stand-alone systems are primarily installed in regions where the power grid is hard or unable to reach (i.e. remotely populated mountainous regions or offshore islands). Such systems are also commonly installed to function as small power systems for road displays, billboards, road lights, and other illumination equipment.

Architecture of Stand-Alone System

2. Grid-Connected System

A Grid-connected system generates power in a parallel connection with the city power grid. The system would generate power for the load and the power company will cover the insufficient part of power. With such system, the city power grid can be perceived as an infinitely large and everlasting free battery bank.

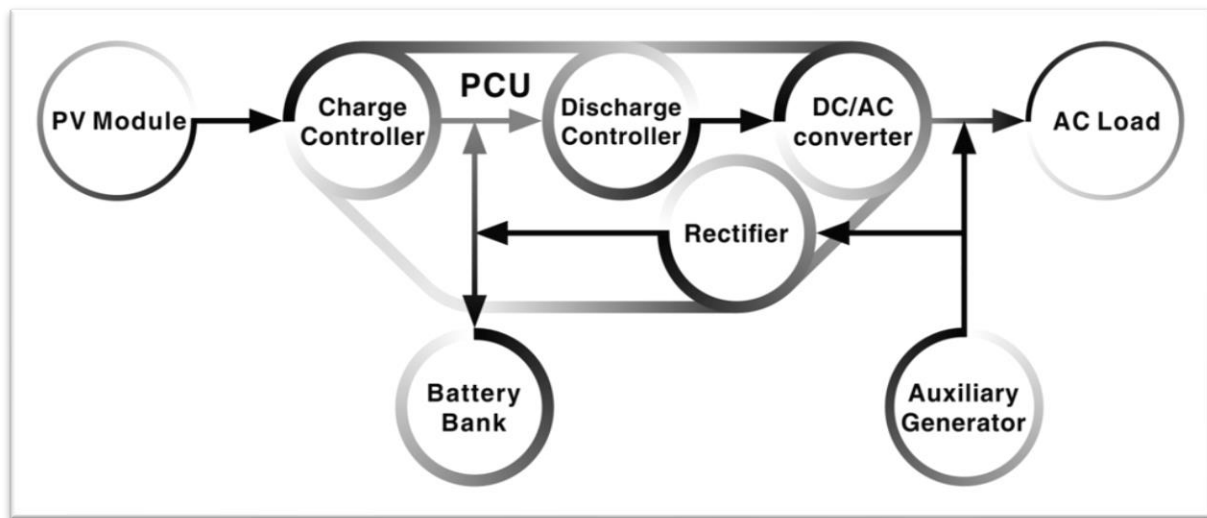

Architecture of Grid-Connected System

3. Hybrid System

A PV hybrid system operates in conjunction with the city power grid and a battery bank. During normal operation, the system is connected to the city power grid, responsible for supply power to the load, and charging the battery bank and at night, power supplied by the grid will take over. In the event of disasters such as typhoons or torrential rains that resulted in a

power outage, the battery bank would still have adequate power in reserve so that relevant rescue operations can take place before the city power grid is restored.

Architecture of Hybrid System

Current Status and Future Development of PV

The following section is a summary of Ablerex's primary application and breakthrough in the area of PV inverter development:

(1) Anti-islanding technologies

Islanding refers to the condition in which a PV inverter continues to power a location when the electrical grid power has been disrupted. When this happens, it would result in an isolated power generation system that may cause partial power instability for users. Not only that, as the PV inverter continues to deliver power, the connected electrical grid (PV and city power grid connected in serial or parallel connection) may remain powered. This can be dangerous to the utility workers as they run the risk of electrocution. And as such, in the event of a power failure, PV inverters must be designed to immediately disconnected from the grid so that even if they remain operational and deliver power, the city power grid will stay unpowered to protect relevant electronic systems and the safety of operators. Presently, the islanding detection feature offered by typical products involves passive detection, which suffers from the shortcomings of poor sensitivity and interference. Due to these issues, such products offer very limited stability. Through the integration of hardware and software, Ablerex have achieved breakthrough of existing technological bottleneck with solutions that integrate the strengths of both active and passive detection through DSP control algorithm.

(2) Maximum Power Point Tracking

Output power of solar panels are affected by a number of external factors, such as the intensity of sunlight, temperature, component aging, PV material, and so forth. In order to ensure optimal performance of the PV cell,

PV inverter must be subjected to appropriate control so that it can ensure maximum power output from the PV cell regardless of the operating environments. Such control method is known as maximum power point tracking.

(3) Grid Connection Control Technology

As solar PV generation system takes the energy generated by the solar panels and sends it directly to an electrical grid through a parallel circuit, it is imperative that relevant protective measures be thoroughly developed. Specific technical and legal issues (such as power system stability) that may arise from the operation of sending power to an electrical grid must be addressed. Designing a multi-functional solar PV system involves power conversions of different functions. Naturally, the design process has to take the issue of corresponding controls into consideration. Therefore, we have taken advantage of the high computing power of digital signal processing (DSP) as the solution for PV-inverter control.

④ Energy Storage System for Home

As sources of intermittent energy, solar energy is not continuously available and can be easily affected by numerous environmental factors. Thus the output power of solar energy can be described as unstable and unpredictable power source. When a large quantity of grid connected PV systems are installed on the electrical grid, the intermittency characteristics of solar energy will have given a serious impact on the electrical grid such as the fluctuation of voltage and frequency, safety, stability, and electrical power quality. Therefore, the development of grid connected PV system has been limited. In order to deduct intermittency characteristics of solar energy cause impact on the power grid, the transmittance of solar PV system must be developed. At the same time, the battery storage system can solve the fluctuation of voltage and poor electrical power quality caused by over capacities of grid connected renewable energy system. Since the Smart Grid was established, liberalization of the electricity market has rapidly accelerated the business from various sectors have been selling electricity by time-of-use pricing. Users allow to purchase the lowest price of electricity at the off-peak period and storage into the battery bank. and discharge the saved energy at the peak period, which the electricity price is extremely high, to avoid the consumption of electricity or even sell back to the utility. Other than functions mentioned above, if the utility grid is ordinary condition, users can operate charging/ discharging the power from our battery module during the night. When the utility grid has unpredictable problem occurred, our system would disconnect with the utility automatically and continuously provide power to loads by using storage energy.

(2) Relationship with Up-, Middle- and Downstream Companies

① UPS manufacturing process (Up, Mid-, and Downstream)

Upstream		Mid-stream	Downstream
Raw material		Manufacturing	End user
Wire material	PCB	UPS Power Provider Manufacturer	Medical equipment
Packing material	IGBT		Public infrastructure
Cabinet			Aviation Equipment
Battery			Military equipment
Transformer			Business entities
Transistor			Telecommunication equipment
Capacitor			PC equipment
Software design			Household appliances
			Other

Ablrex specializes in the design and manufacturing of UPS products. Our upstream vendors are primarily suppliers of relevant components (transformer, cabinet, wire material, capacitor, PCB, etc), battery supplier and software developer. Distributed through our network channels, our products are sold to end users in different sectors, including medical care, aeronautics, military equipment, finance, security, nuclear power, petrochemical, telecommunication, PC equipment, and so forth.

With the boisterous growth of the Internet and ICT sectors, the requirements for power supply quality have been steadily increasing. This has attracted more enterprises to adopt UPS solutions to protect their PC equipment, thereby propelling the demand for UPS. Consequently, such trends promise substantial potential for our business growth in the future.

② APF

Upstream		Mid-stream	Downstream
Raw material		Manufacturing	End user
Wire material	PCB	APF manufacturer	Steel plant/machinery factory
Packing material	IGBT		Telecommunication equipment
Cabinet			Large industrial equipment
Battery			Taipower distribution grid
Transformer			Applications where harmonics improvement are required
Transistor			Applications where harmonics improvement are required
Capacitor			Other
Software design			

Ablerex specializes in the design and manufacturing of APF. Our upstream vendors are primarily suppliers of relevant components (transformer, cabinet, wire material, capacitor, PCB and etc), battery supplier and software developer. Distributed through our network channels, our products are sold to end users in different sectors, including steel machinery factories, telecommunication, large industrial equipment, Taipower distribution grid and applications where harmonics improvement are required.

With various sectors demanding higher power quality, more and more businesses found themselves needing APF to improve power quality and reduce power loss. Due to the technical threshold required for the product, there are few local or foreign manufacturers for the product. And as such, our APF are rather competitive in the market and it is one of our key products that we promote aggressively.

③ Solar PV inverter manufacturing process (Up, Mid-, and Downstream)

Upstream	Mid-stream	Downstream
Raw material	Manufacturing	End user
Silicon material Silicon wafer Solar cell cutting Solar cell Software design	PV Inverter System	Construction industry Telecommunication industry Public infrastructure High-tech fabrication plant PC equipment Household power supply Other

In the solar PV industry, Ablerex assumes the role of a designer and manufacturer of PV inverter in the area of system and inverter. Distributed through our network channels, our products are sold to end users in different sectors for system integration, including construction industry, telecommunication industry, public infrastructure, high-tech fabrication plants, and so forth.

The solar PV industry promises vast business opportunities in the foreseeable future. Due to the high technological threshold, we have few domestic competitors. Our PV inverter have definitive competitive advantages in terms of quality and pricing, and Ablerex has in fact become a global leading manufacturer in this area and a designated ODM partner for several major brands around the world. PV inverter has been the product that has generated substantial revenues for Ablerex.

④ESS for home manufacturing process (Up, Mid-, and Downstream)

Upstream	Mid-stream	Downstream
Raw material	Manufacturing	End user
Silicon material Silicon wafer Solar cell cutting Solar cell Software design Battery cell	Residential Energy Storage System	Construction industry Telecommunication industry Public infrastructure High-tech fabrication plant PC equipment Household power supply Other

In the Energy Storage industry, Ablerex specializes in the area of system and inverter technologies and assumes the role of a designer and manufacturer of inverter for ESS. Distributed through our network channels, our products are sold to end users in different sectors for system integration, including construction industry, telecommunication industry, public infrastructure, high-tech fabrication plants, and so on.

Energy Storage industry promises vast business opportunities in the foreseeable future. Due to the high technological threshold, there are only few competitors seen in the domestic market. Our inverter for ESS definitely have competitive advantages in quality and pricing of the product. In fact, Ablerex has become a leading manufacturer in domestic industry and has been designated as an ODM partner by several major domestic companies. Our ESS has already brought substantial revenues for Ablerex.

(3) Product Trends

① For UPS

A. Trend for modular design to prevent over allocation

Modular UPS comprises multiple modules in order to achieve easy scalability. One of the issue with traditional UPS is the over allocation of power system. For example, when a user's actual power load is at 12KVA, he would end up purchasing a traditional UPS at 20KVA to save himself from the hassle of expansion in the future. This would result in an over allocation of the system, which a modular UPS would be able to overcome.

B. Diversification of product design and electronic consumption

In the future, UPS systems will continue towards the path of becoming more compact, lightweight, high efficiency, and low noise. With these characteristics, UPS systems will gradually shift from large server rooms and find a place in normal office space. And as such, we should dedicate more attention to exterior design and usability in order to deliver a more pleasant user experience.

C. Heading towards intelligent and network development

With constant innovations in technology today, users have become accustomed to expecting more from UPS products in terms of their quality and functionality. Traditional analog power control UPS has been ousted by full

digital control, which enables the user to schedule and control specific machine parameters through the CPU of the UPS, which can now be simultaneously connected to multiple PCs. Not only that, the user can also take advantage of its communication interface and PC, along with smart monitoring software and network protocol to manage and analyze his PC and UPS system locally or even remotely with greater convenience and efficiency.

D. High reliability and safety

The development UPS systems will be steered towards higher reliability and safety

(a) Automatic detection: Upon start-up, the UPS will perform a check on all component (inverter, battery and so forth) load in order to detect potential issues.

(b) Self-protection: Through designs of self-protection, the UPS system will automatically shut down in the event of UPS overload, short circuit or overheat to prevent other hardware damages that might otherwise have been caused by UPS failure.

② APF

Harmonics suppression has always been a vital issue when it comes to power quality improvement. Following the rapid growth of non-linear load that has resulted in deteriorating power quality, the power company had no alternatives but to establish harmonics control standards in order to limit the amount of harmonics generated by users so as to maintain the quality of power for the whole system. Therefore, in addition to the development of high power APFs, the product will also have multiple functions such as virtual work compensation and voltage suppression. At present, APFs are more expensive than PPFs and the discrepancy is even greater when the load exceeds 500KW, at which point APF becomes no longer economical. And as such, hybrid filters have been created with an architecture that combines the advantages of both the active and passive types. In the future, hybrid power filters will become a trend in the domain of harmonics improvement technology.

③ PV Inverter

In addition towards high power development for PV inverters, it would be viable to pursue other alternative energy development such as wind power generation to expand the market further. In 2008, Ablerex has obtained the Intertek GS certificate – the first ever issued in Taiwan. Not only that, the company has received certifications from nations including Germany, Spain, France, Italy, Belgium, England, USA and Japan. The company shall continue to stay abreast with the latest market trends and submit more applications to other countries, and this will be beneficial to the expansion of the PV inverter market in the future.

④ Energy Storage System

The future of Energy Storage System(ESS) will not only develop in high efficiency and for commercial use, but also it will be able to resolve the renewable energy problem of intermittent electricity generation for wind power and solar power. The development of this system allows problems to be solved while

expanding its potential market further. From 2016, AblereX has continuously been applied for certifications in Germany, Australia, and Japan. We strongly believe these certifications from different regions would be beneficial to expand the ESS market and has generated substantial revenue for AblereX.

(4) Product Competition

Presently, our main product lines include UPS, APF, and PV inverter. Their characteristics and whether they are replaceable will be covered as follows:

① UPS

As its name implies, an uninterruptible power supply (UPS) functions by delivering power to connected equipment in the place of AC mains supply during a power outage, similar to way emergency lighting works. However, an UPS features more sophisticated design that dramatically reduce the switching duration from AC mains and battery/inverter to make up for the shortcoming of significantly longer power outage duration with typical fuel-powered generators or other emergency power source, without creating the issues of noise and air pollution that fuel-powered generators have. Unless conventional power generators achieve significant improvement in their speed of power supply while minimizing environmental pollution, they will not be able to fully replace UPS.

② APF

Power filters are equipment primarily used to improve power quality and suppress harmonics. Presently, such products fall under three categories: active, passive, and hybrid. Each has its distinctive advantages and weaknesses. At present, the development of power filter is headed for higher power and multi-functionality designs. Barring the invention of new harmonic suppression equipment in the future, there are no existing products that could replace APFs.

③ PV Inverter

PV inverter is primarily used to convert the AC current stored in solar panels to DC power for direct usage and connection to the city power grid. Barring the invention of new conversion equipment or new solar cells that could convert DC current to AC current by themselves, there are no existing products that could replace PV inverters.

④ Energy Storage System

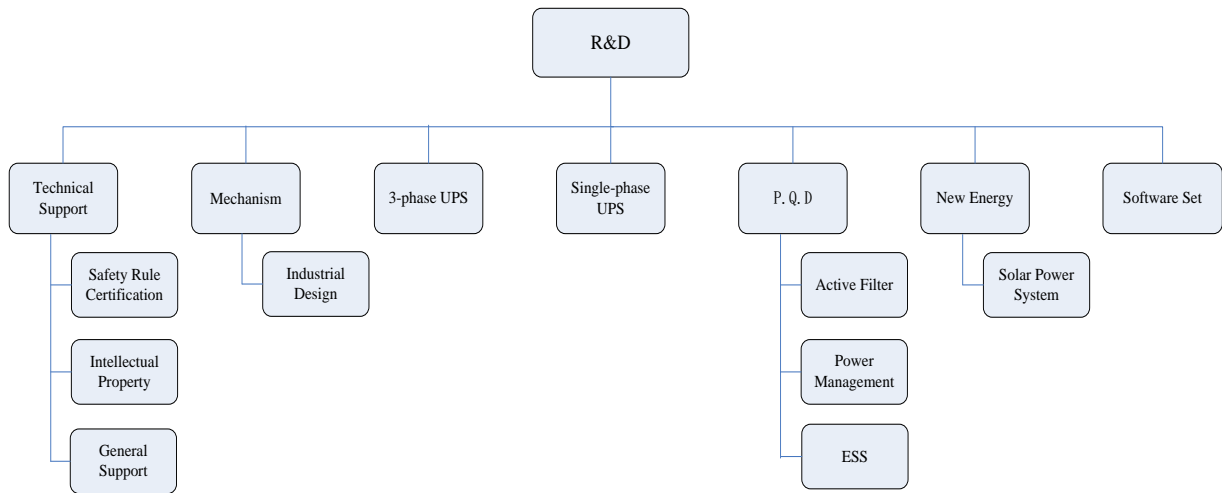

ESS is mainly used to convert the AC current stored in solar panels to DC power or to save the generated power in the battery bank for direct usage and connection to the power grid. Unless the new invention of conversion equipment or new solar cells that could convert DC current by itself, otherwise, there are no other alternative products.

5.1.3 Research and Development

(1) Technical level and R&D of our business

Right from the initiation of the company, AblereX has established its R&D unit, which focused on the research and development of small UPS. With the development of new products and technologies, the R&D unit has also expanded in scale. At present, the R&D Department can be separated into smaller units based on their respective product lines, including Single-phase UPS, Three-phase UPS, PQD and New Energy. In addition, sections such as the Mechanical structure, Technical support, Software and Technical research

have also been established to provide relevant support for the three aforementioned sections. Through the planning, development, design and safety regulation control for new product development handled by each corresponding section, the R&D Department endeavors to provide products and services that are precisely aligned to existing market demands. The following will cover the organization of our R&D Department and their corresponding responsibilities:

Department	Section	Primary job description
R&D	Single-Phase UPS Section	Responsible for the development of single-phase UPS product and technology.
	Three-Phase UPS Section	Responsible for the development of three-phase UPS product and technology.
	P.Q.D Section	Responsible for the development of APF, power management system product, Energy storage system and technology research.
	New Energy Section	Responsible for the development of green energy and smart grid product and technology.
	Mechanical Design Section	Responsible for all products' exterior and mechanical designs.
	Technical Support Section	Responsible for the general support (i.e. construction of BOM, patent and safety regulation application, document management, acquisition of R&D samples and so forth).
	Software Section	Responsible for the development of software bundled with products and the system platform for Cloud computing.

The accumulation of know-how that we have grasped from pre-development, development, and post-development of various products enabled the R&D Department to accrue its IP assets. Strengthening innovative R&D and acquiring patents have become a vital strategy for businesses to remain competitive in the market. During the past few years, Ablerex has experienced significant growth in the number of local and foreign patents received and these patents brought concrete benefit to the improvement of our technical capabilities. With relevant deployments in place, our IP assets enabled us to engage in technical exchanges with major international players and even take part in collaboration models of licensing patent rights through technical exchanges. This not only enhanced the company's reputation in terms of its technical capacity and brand value in the industry but also boosts customers' confidence in our technical capabilities.

Consequently, our IP assets offer profound positive impacts on our business expansion.

Paper

The publication of technical papers not only brings exposure to the company but also represents the company's level in terms of innovative technology. Through the participation in various conferences and paper publication, we aim to draw more opportunities for collaboration.

Looking towards the future with numerous competitors in the global market, given our existing resources, we ought to dedicate more attention to innovation so as to propel business growth. Through commitment of resources to patent and paper strategies and deployment, we shall gradually accumulate AblereX's IP asset, which will no doubt prove invaluable to the company's overall competitiveness in the future.

(4) The following is an overview of the technologies and products that AblereX has successfully developed:

Year	Product Category	Successfully developed technology or product	Description of characteristics/purpose
2020	UPS	Line-interactive UPS PSA4 500VA~1500VA	Featuring new full-bridge architecture, the new model offers the following advantages: 1. Improved efficiency. 2. Compact PCB 3. Low cost 4. Higher power wattage 5. Autonomy time longer than Glamor 6. Support dual channel of communication Simultaneously (Wife, RS232 and USB)
		Line-interactive UPS PST4 350VA~850VA	Power strip form factor 1. higher efficiency 2. Compact size 3. Low cost
		On-line UPS ARES 1K~3K RT / Tower Model for 230Vac System	1. Increased product capacity (power factor increased from 0.9 to 1.0) 2. Wifi Adopted for friendly interface 3. Versatile battery bank configurations (1K: 2-3 batteries; 2K: 4-6 batteries; 3K: 6-8 batteries)
		Line-interactive UPS Clumbus 750VA~3kVA For 230Vac system	1. Increased product capacity (power factor increased from 0.6 to 0.7) 2. New added SNMP and DryContact Card 3. LCD panel display function
		Line-interactive single phase UPS Clumbus 750VA~3kVA For 120Vac system	1. Improve power factor of current product from 0.6 to 0.7. 2. Increase SNMP and DryContact Card 3. LCD panel function 4. UL certified model
		A.T.S. (Auto Transfer Switch) iTS with CAM	1. Switching time from 21ms~16ms. 2. Support firmware update of USB 3. Initial output relay at N.O. position 4. Support Emergency power off function 5. High MTBF design
		Three-phase UPS TAURUS 10K~100K	1. Adopted a new three-level architecture to significantly improve the unit's overall operating performance 2. Output power factor increased to PF=1.0 3. New accelerated ECO operation mode with transferring speed < 3ms
		Three-phase UPS Kronos 10K~40K	1. Adopted a new three-level architecture to significantly improve the unit's overall operating performance 2. Output power factor decreased to PF=0.9 to be highly competitive 3. New accelerated ECO operation mode with transferring speed < 3ms
		Three-phase UPS for UL Kronos 10K~20K	1. A new three-level architecture adopted to improve the unit's operating performance significantly. 2. Output power factor increased to PF=1.0 3. A new accelerated ECO operation mode with

Year	Product Category	Successfully developed technology or product	Description of characteristics/purpose
			transferring speed < 3ms 4. UL certified model
	Power Management Development	Battery Management System BMSIII plus RF Receiver	In addition to the wireless transmission functionality that is also featured in the previous generation, the product has also been designed with battery voltage equalizer technology to prevent battery overvoltage with greater precision. We have designed with additional function that allows determine battery condition, remaining discharging time, and diagnosing life cycle of deteriorated battery.
		Raspberry Pi Intelligent HMI	Adding a wifi function; moreover, to strengthen the development of Green Product related application software.
		AC PDU2.0 Power System Management	According to the market demand for DC current communication server, we have developed AC PDU power management systems with applications similar to our previous AC PDU, but The main difference is the improvement of measurement accuracy, and its monitoring interface is upgraded from the 7-inch touch panel to the Raspberry Pi intelligent interface.
	APF	APF ESD34 150/100A	Features immediate response control that delivers outstanding transient response for the APF by enabling immediate compensation at any point during each current cycle. We have also increased product compensation capacity and catered to the demands for IP00/IP20.
		APF 480V UL	In addition to the breakthrough of existing product architecture and technology utilization, the product is more compliant with existing international safety regulations, making its distribution more extensive.
		APF 80A Rack Module	Next-gen product that offers significant improvement in power density to reduce spatial requirement for installation. Next-gen hot swapping technology. New controller that adds all-level harmonics compensation and load balancing mechanism. Adopting a multi-level switching structure, the product reduces IGBT switching loss while increasing the number of harmonics compensation while correcting power factor.
		APF 80A Wall Mount	Next-gen wall mounted product that offers significant improvement in power density to reduce spatial requirement for installation.
		APF 60A/100A	In addition to improving the current product architecture and technology, adding different capacity parallel applications makes this product portfolio more flexible.
		SVG 70kVAR	Speed up the Reactive Power Compensation response in half cycle (10ms) to reach the target of requiring compensation of load
		ESS	Single Phase Residential ESS
	Energy Storage System ESS5000/4000/3300		Through the smart meter interface, the user can command the Self-consumption function based on the

Year	Product Category	Successfully developed technology or product	Description of characteristics/purpose
			<p>calculation of voltage, current, and power factor through out the controller. The controller will automatically order the command to the rectifier to adjust power generation from solar panel and battery discharge/ charge power. This system also fits to time-of-use pricing program users that throughout the setting of smart meter, users will be able to control discharging or charging electricity by adjusting the setting of off peak and on peak time-of-use periods. Users can buy electricity in the off peak period to storage into the system and sell these storage electricity in the on peak period to accomplish the goal of saving energy resource and the most efficiency way of use.</p> <p>Our ESS inverter can use any batteries as long as the voltage of inverter matches the voltage of battery bank within the range of 40~60V. The customer can consider choosing our ESS Li-ion battery module option which includes the Battery Management System in it. Our system is suitable for the Lead-acid, Lit-ion, LiFePO4, SiC, Seawater battery, etc.</p>
		Energy Storage System	<p>A new generation of ESS with a single unit capacity from 20kW to 85kW. The capacity of the system can be expanded in parallel according to user needs, up to 2MW; and it is equipped with high energy density lithium battery modules.</p> <p>The smart meter (ESS-MET), which can integrate with PCS and PV inverter device to perform complete dispatch function of energy storage system, includes following function as Time of use price, auto schedule control, peak cut, self-consumption, emergency power ... etc.</p>
	GPS	Three-phase PV inverter ES 52000	This three-phase 52kW PV product can be used with solar modules, and the number of parallel units can reach the best operating point to achieve the best cost of the solar power system; intelligent MPPT tracking can effectively increase the overall power generation of the solar system. Products will be higher competitive.
Three-phase PV inverter ES 60000		This three-phase 60kW PV product is used in the 480Vac system, and further provides PV inverter energy density to make the product more competitive.	
Three-phase PV inverter ES 66000		This three-phase 66kW PV product can be used with solar modules, and the number of parallel units can reach the best operating point to achieve the best cost of the solar power system; intelligent MPPT tracking can effectively increase the overall power generation of the solar system. Products will be higher competitive.	
Three-phase PV inverter ES 75000		This three-phase 75kW PV product is used in the 480Vac system, and further provides PV inverter energy density to make the product more competitive.	

Year	Product Category	Successfully developed technology or product	Description of characteristics/purpose
		Single-phase PV inverter ES7200HC	As the solar panel production improves year after year, panel efficiencies continue to improve as well. To apply to the improvement of solar panel and market's needs, we have developed a new inverter of 7.2kW model. This new inverter is designed with single MPPT function and 1000V DC input, in order to rise power density and to make the product lighter.
		Taiwan CNS15382 Grid regulation	In response to Taiwan's enactment of national grid-connected regulations, the full range of PV inverter models sold in Taiwan are about to reach the requirements of the standard.

5.1.4 Long-Term and Short-Term Business Development Plans

(1) Short-term business development plan

① Product strategy

- a. A low-end single-phase UPS product line launched to meet the needs of the low-price market.
- b. Renew the high-end products from generation to generation to maintain the advantage in the market.
- c. Integrate products from different products to provide total solutions.
- d. Development-oriented "designed for simplified mass production" for manufacturing cost advantages.

② Production strategy

- a. Optimize the process, increase the percentage of automation/intelligent manufacturing/ intelligent quality monitoring, adapted Industrialization 4.0, and improve order response, production efficiency and product quality.
- b. To establish strategic material usage management and Supply chain management in order to ensure the diversity and optimization of supply and reduce the stock of materials effectively.
- c. Integrate manufacturing quality and design quality to improve product reliability.

③ Marketing strategy

- a. Adopt to adapt measures to local conditions, implement localized operations, strive to stay close to the market, and strengthen potential customer development and relationship maintenance.
- b. Quickly respond to customized needs, strengthen after-sales service, improve customer satisfaction, and stabilize market position.

④ Financial coordination

Based on the principle of stable operation, the company uses its own funds and operating surplus as the main working capital, but will also use bank financing in a timely and appropriate amount to seek the optimization of ROE.

(2) Long-term business development plan

(A) Product strategies and goals

In terms of product development, the company shall adhere to the following strategies:

- ① Make the existing product series more complete, and continue to complete products with different prices to meet multiple choices.
- ② To refine and deepen our ODM/OEM collaboration models with leading manufacturers around the world and jointly development mainstream products so that we could become the main supplier or partner of strategic alliance with leading manufacturers. This will allow us to expand our scale of production, improve product quality, lower our costs and in turn make the company more competitive as a whole.
- ④ Close integration between new product development, our core technologies, and patented technologies to boost our products' competitive edges and enhance our lead against other competitors in terms of technical capabilities.
- ④ Close coordination with the development of new energy technologies and foray into the research and development of relevant products for green and renewable energies such as solar PV and fuel cells so as to enhance their applications in "smart power grid".

(B) Production strategies

- ① Improve upon existing manufacturing processes to achieve compliance with relevant eco-friendly standards and green product development by launching pollution-free processes.
- ② Continue to deepen the application of Industrialization 4.0, coupled with big data analysis, to increase production efficiency, improve quality and achieve the goal of reducing costs at the same time.
- ④ Implement total quality management to maintain optimal internal operation at all times.

(C) Marketing strategies

In order to attain continual improvement in the company's sales, expand the market share of our products and increase the value of AblereX in the global supply chain, we shall adhere to the following marketing strategies:

- ① To deliver the best services in all our processes and all aspects of our operation.
- ② To demonstrate AblereX's existing core technologies and capabilities and our determination and drive to carry onward in our improvement of technical capabilities.
- ③ To fortify our search and collaboration with other leading companies around the world and foster partnerships so that we could become one of the primary suppliers of mainstream products in the business.
- ④ To expand our original product and establish distribution channels for specific products in appropriate region/territory.
- ⑤ To collect information of local market, connect with our customers and deliver prompt services through our offshore locations.

(D) Financial strategies

- ① To strengthen exchange management and make appropriate use of financial hedging tools to ensure our costs and revenues, thereby reducing the risks and losses from foreign exchanges.
- ② To make appropriate use of financial leveraging to lower operating costs.

- ③ To expand our fundraising channels into the capital market so that we can obtain funding at lower costs and facilitate relevant expansion plans.

(E) R&D strategies:

- ① To focus on development continuously for products about power quality improvement and power supply reliability.
- ② To inject more R&D resources for new energy, renewable energy, energy recycling, and energy conservation so that we could develop relevant products for the market in the future.
- ③ To insist on technological innovation and continue with aggressive patent deployment so that we can strengthen our technical competitiveness.
- ④ Under the consideration of manufacturing feasibility, customization flexibility, and diversity of function choices, make products to meet market needs at a cost.

5.2 Market and Sales Overview

5.2.1 Market analysis

(1) Sales (Service) regions

Unit: NT\$ thousand, %

Item	Year	2020	
		Amount	%
Domestic operating income		1,124,709	47.62%
International operating income	Asia	29.14%	32.08%
	America	5.76%	3.80%
	Europe	17.36%	19.94%
	Others	0.11%	0.50%
Total		2,361,923	100.00%

(2) Market share (%) of Major Product Categories in the Last Two Years

Ablerex is primarily involved in the production and distribution of UPS, APF, PV Inverters, and the subcontracting of power related projects. Presently, we have many competitors in the domestic market, including PCM, Delta Electronics, CyberPower and so forth. However, our products and products from these competitors are distinctively different and as most of these products are customized products, relevant information have been difficult to obtain. This renders a precise calculation of market share to be impossible.

(3) Supply & demand and potential growth of market in the future

① UPS

Despite the long history of the UPS industry, the sector still has much room for growth waiting for businesses to commit and cultivate. Even though the migration of local businesses may significantly reduce the quantity of factory equipment in Taiwan, UPS manufacturers will still be able to locate new market and point of entry. With the prevalence of PC systems and the growing sophistication of machinery functions, end users will grow to better appreciate the necessity and importance of UPS systems. In addition to enterprises and

server rooms where UPS have long played a vital role, UPS products have gradually found their way to general consumers. Between large and sophisticated home multimedia entertainment systems and personal PCs, the demand for UPS is starting to stem from even the average consumers.

② APF

With the rapid development of high-tech industries, literally all of their precision instruments require high quality power systems in order to maintain normal operation. However, as most of the high-tech instruments run non-linear load (such as the semiconductor industry), they generate substantial amount of harmonics current pollution that has adverse impact on power quality, leading to issues such as voltage distortion, overvoltage, and even equipment failure. Consequently, APFs have been installed to mitigate the harmonic currents generated by the load and have therefore been perceived as valuable investments.

In the mid-year update of “Semiconductor Applications Forecaster” published by the American market research organization IDC in 2011, the global semiconductor sales in 2012 will achieve an annual growth of 5% to reach US\$ 318 billion and by 2015, the global semiconductor sales will reach US\$ 378 billion, with compound annual growth rate at 6% spanning from 2010 to 2015. It is therefore natural to predict that the demands for APF will increase as the

Fig. 1: Global Semiconductor Revenue Forecast

Source : iSuppli · 2009年09月

③ PV Inverter

According to IMS Research’s prediction, the market for PV inverter will continue to grow, with more noticeable growth in demand in 2020. The demands for small business building PV system (usually between 10~100kW) and PV stations (typical installation of 500kW or higher) are expected to grow more significantly while the demand for residential PV system will be less apparent.

It is estimated that approximately 60% of the PV system installation in the future will take place in Asia, mainly China, and the majority of them would be PV stations. As for residential PV systems, Japan will be the only market that may promise some potential.

④ Energy Storage System

According to Energytrend’s prediction, the ESS market will continuously grow in future. Especially clear and more needs after 2018 to 2020. We estimate the demand of ESS converter (normally 5kW) will likely increase in the

foreseeable future.

(4) Competitive niche

Factors such as the yield rate of UPS, productivity and specifications have become the key criteria that global leading brands and channel operators use as guidelines in their selection of UPS supplier. Presently, Ablerex has the following competitive edge in terms of its marketing, product development, and manufacturing process:

① Marketing

The company has been actively taking part in major local and international electronics fairs in recent years and has achieved significant exposure in the global sector chains. In addition, our products have received safety certifications in numerous countries and this helps to facilitate the expansion of our business. We also offer a comprehensive selection of small and micro UPS products that can satisfy customers' varying needs. With our positive image and solid R&D capabilities, the company has proven itself to be capable of developing new products in accordance with customers' needs and this has in turn made Ablerex a preferred partner of collaboration for international brand names compared to other local competitors. Consequently, this will be beneficial in our search for ODM/OEM collaboration opportunities.

② Product development

With UPS products becoming more compact and more intelligent with modular and network functionalities, Ablerex has shifted its core technologies towards the development of high speed and high precision. In terms of product development, the company not only has adequate capacity for relevant software and hardware design but also managed to reach top class level when it comes to product development speed and design quality. We are capable of working with customers' needs to make relevant changes and technological reforms to launch new products at the right timing so that we are able to compete in the market with products of better performance, superior quality at lower costs.

③ Manufacturing process

Manufacturing process improvement is an important factor in the control of production costs, while quality stability functions as a critical criterion of customer satisfaction and future business expansion. And as such, we have carefully planned and mapped out the entire manufacturing process for the development of new products and have been making continual improvement on our process and quality control so as to facilitate manufacturing processes while lowering relevant costs and enhancing quality. Ablerex has the professional manufacturing capacity to handle independent product development, software design, manufacturing, automated assembly, and testing. Not only that, we deliver products of outstanding quality, punctual shipping schedules and comprehensive after sales services to stay competitive in the market.

(5) Favorable and Unfavorable Factors in the Long Term

① UPS and APF

Favorable factors

- A. Continual upgrading of high-tech industries to propel the continual increase in the demand for UPS and power quality improvement

As high-tech industries upgrade their production capabilities, they would inevitably use more expensive manufacturing processes of higher precision. As a result, their demand for power quality would grow in proportion, thereby driving up the demand for UPS and APF to improve their power quality.

- B. Superior R&D capabilities to achieve stable product quality

After accumulating years of experience and expertise from independent research, Ablerex has obtained 131 patents, and 128 of which are invention patents that have been featured on our key products. Not only that, we have also been accredited to ISO 9001 and ISO14001 standards that speak for our high product quality. At the same time, we have also improved our productivity and expanded our production capacity to satisfy the needs of our customers.

Unfavorable factors

- A. Product diversification may impede the improvement of production efficiency

With different equipment requiring different capacities and power factors for UPS and APF products, our product lines have become more diverse and this is disadvantageous to the improvement of production efficiency.

Counter-strategy:

We shall improve our production-distribution coordination to achieve precise control of product delivery schedules and monitor changes in market demand at all times through information systems. The manufacturing department will also make flexible adjustments to its production plan in order to better manage the delivery schedule and satisfy our customers' needs without compromising the benefits of concentrated batch production.

- B. Low energy storage density that is unable to cater to the need for long operation duration

The greatest drawback of battery banks used for normal UPS systems is their low energy storage density. In order to construct a large scaled energy storage system, the batteries would take up substantial physical space.

Counter-strategy:

Due to cost considerations, normal UPS systems use lead-acid batteries. In the future, lithium batteries that offer higher storage density and longer lifecycle might become a viable alternative. Although lithium batteries are significantly more expensive, with the advancement in battery technology and development of electric car batteries, its development in the future is still worth looking forward to.

② PV Inverter

Favorable factors

- A. Continual demand for energy keeps international oil prices up

With the rise of emerging nations such as China, India, Brazil and the ongoing growth of US and European economies, the global demand for energy has continued to grow. In addition, as the global petroleum reserve declines over the years, international oil prices have remained high and thus driving

nations around the world to seek for alternative energies to mitigate the rising energy costs and energy shortage. Among the alternative energy sources, solar power has received the most abundant investments. With the certainty of growing energy demands in the future, the use of renewable energy will become more prevalent.

B. Growing awareness for environmental protection

The Kyoto Protocol prescribes specific targets of greenhouse gas reduction and is supplemented with multiple flexible operating regulations such as emission trading clean development mechanism and joint implementation. The protocol also touched on the issues of environmentally harmful subsidy reform. The Copenhagen UN Climate Change Conference also involved negotiations of greenhouse gas emission goals with specific carbon reduction objectives and discussions on assisting developing nations to combat global warming. These events have gone to show that the issue of environmental protection is of primary concern to nations around the world and due to the considerations for sustainability, governments will no doubt actively develop renewable energy industries.

C. Government subsidies to reduce installation costs

Due to the low conversion factor of solar power at present, the cost of solar PV generation is still higher compared to other traditional means of power generation. The relatively expensive costs of solar PV system installation will no doubt create additional economic strains on the general public that wishes to have solar PV systems. And as such, governments around the world have promulgated subsidy policies, causing the solar PV market to experience explosive growth and continual increase in market demand.

Unfavorable factors

A. Increase in the number of competitors, leading to intense price competition

With the demands gradually growing, there will inevitably be more competitors in the business, only to be followed by price wars and struggle for orders with lower pricings. This would in turn impact the profit margin for products.

Counter-strategy:

The company shall continue to research and innovate in the future so that we can develop products of higher efficiency and functions and other high-end products to differentiate from the low-cost market. In addition, we will also commit more resources to the development of other alternative energies to stay competitive.

B. The industry is susceptible to the impact of government policies

As the solar PV industry is susceptible to the impact of government policies, product demand may become limited during period of depression when the government is likely to cut down on subsidies to reduce spending.

Counter-strategy:

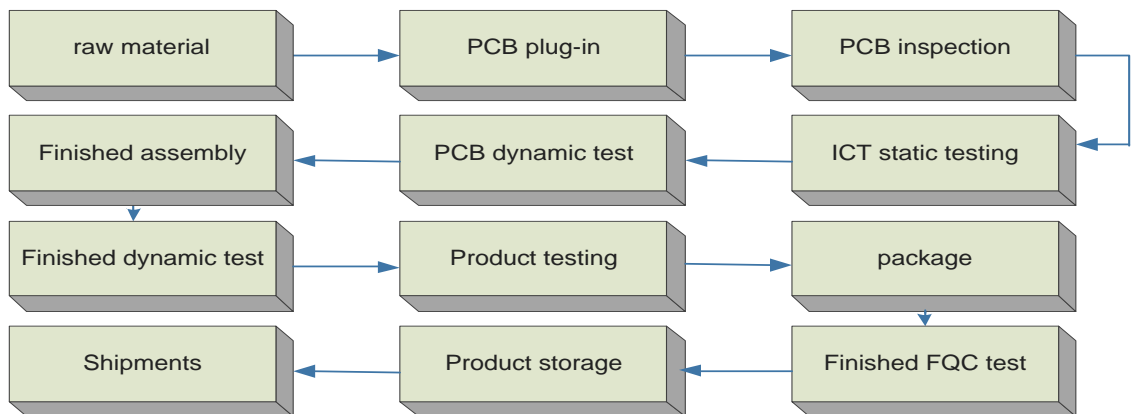

We will continue to develop new customers and cultivate new customer base in different countries to better understand the needs of our future clients. In addition, we will foray into the respective markets to lower the risks of being overly dependent on the distribution in specific regions.

5.2.2 Production Procedures of Main Products

(1) Primary purpose of main products

Main product categories	Purpose & Functions
UPS	At the moment of power failure, the UPS will temporarily supply power from its battery bank to prevent damages on PC, communication device, consumer electronics, high tech products medical equipment and so forth due to power disruption or power surge.
APF	Generates a compensatory current that is of the opposite phase of the harmonics at the load to effectively improve power quality while preventing excessive harmonic currents from causing interferences or damages on power equipment or production processes.
PV Inverter	Utilizes DC current from solar PV cell and converts it to AC currents similar to the power from city power grid for direct usage or parallel connection to the power grid. PV inverter is a key component in solar PV generation systems.
ESS	The ESS includes smart meter (ESS-MET), inverter (ESS-INV), and battery module (ESS-BAT).

(2) Major Products and Their Production Processes

(3) Supply Status of Main Materials

The main raw materials used for our products include battery, transformer, semiconductor parts, plastic materials, metal cased PCB, wire materials, and so forth and these are sourced by a number of suppliers. However, the ratio of supply for these materials have been carefully managed to prevent over-concentration of order for specific suppliers. In addition, Ablerex has maintained positive collaboration with most suppliers over the years and in an effort to ensure supply stability, we have made an effort to stay in touch with other suppliers. And as such, supply status has been positive for Ablerex and no incident of short supply or supply disruption has occurred.

(4) Major Suppliers and Clients

A. Major Suppliers (10%) in the Last Two Calendar Years

Unit: NT\$ Thousand; %

Year	2019				2020					2021Q1				
Item	Name	Amount	%	Relation with issuer	Item	Name	Amount	%	Relation with issuer	Item	Name	Amount	%	Relation with issuer

5.3 Human Resources Analysis

Number of employees, average seniority of service, average age and education distribution ratio for the last two years and as of April 30, 2021

Apr. 30, 2021, Unit: people, age, %

Year		2019	2020	2021/4/30
Number of Employees	Direct Labor	129	143	132
	Indirect Labor	84	94	86
	Administrative staff	432	410	432
	Total	645	647	650
Average age		35.90	37.2	38.36
Average seniority of service		7.03	6.8	7.52
Education (%)	Ph. D.	0.31%	0.31%	0.31%
	Masters	12.87%	13.29%	13.08%
	Bachelor's Degree	27.13%	29.52%	30.92%
	College	21.24%	19.78%	20.31%
	Senior High School	23.10%	21.79%	20.15%
	Junior High School and below	15.35%	15.30%	15.23%

Note : The numbers are for all group

5.4 Environmental protection Expenditure

5.4.1 Total Losses and Penalties

According to the law, the applicant shall apply for the establishment of a permit or pollution discharge permit or should pay pollution control costs or the establishment of environmental protection units responsible for the person, the application, payment or establishment of the statement: the company in the production process and No major sources of pollution, but in order to avoid changes in the law also set up environmental protection personnel, and regularly check the status of the law to determine whether the impact of the company's operations.

5.4.2 Major equipment to prevention and their usage and potential benefit : None.

5.4.3 Until the date of publication, any improvement in environmental pollution for past two years : None

5.4.4 (Including remedial measures) and possible expenses (including non-response measures that may occur in the future due to the total amount of the damage suffered by the Company in the last two years and as of the date of publication) Loss, disposition and indemnity, if it is not reasonably possible, it shall state the fact that it can reasonably be estimated. : None

5.4.5 The current pollution situation and its improvement on the company's earnings, competitive position and capital expenditure and the expected impact of the next two years of major environmental capital expenditure: None.

5.5 Labor Relations

5.5.1 Employee's welfare package, education and training, retirement plan, and employee rights

(1) Employee's welfare package:

In addition to following the Labor Standards Act and the relevant regulations, Ablerex provides group insurances covering healthcare, accidents, and health examinations for employees. Ablerex also established the Employees' Welfare Committee which is in charge of employees' welfares including subsidies of weddings, funerals, in hospitals, and birthing, and holds activities regularly, such as birthday parties and domestic/foreign trips, to take care the life of employees.

(2) Education and training:

Ablerex holds internal management and specialist training program and encourage employees to attain courses and training held by professional institutions in order to enhance the proficiency and core competitiveness of employees. The education and training records are as follows:

Item	Courses	Trainees	Hours	Costs
1. Training for New employees	4	50	200	0
2. Specialist training	48	103	337.5	324,987
Total amount	52	153	537.5	324,987

(3) Retirement plan and the implementation:

Ablerex has formulated the retirement and pension plans for employees according to the Labor Standards Act. A certain percentage of salary payment is allocated as retirement reserve funds and if it is not enough for the payment of pension, the additional part will be listed as expense in the financial reports.

Since the implementation of Labor Pension Act in 2005.7.1, for the employees, adopting the defined contribution plan of pension, the pension fund will be paid and deposited in the personal pension fund account for no less than 6% of monthly salary by Ablerex.

(4) Employee rights:

Ablerex has advocated to humane management and set up many channels for employees to communicate with employers. Ablerex thinks highly of all kinds of employees' welfare and feedbacks of communication, so that Ablerex has harmonious relationship between employer and the employees. There is no any dispute on labor relation to be negotiated since Ablerex established. Yet, Ablerex still devote to better employees' welfares to enhance the harmonious labor relation and to prevent any possible labor disputes.

(5) Code of employee's conduct and ethics:

Ablerex has stipulated "Ethical Corporate Management Best-Practice Principles"

and relevant managerial regulations for Directors, Managers, and employees to prohibit unethical behaviors, the chances of pursuing personal interests, bribery, to protect and properly use the assets of the company, to abide by regulations, and to encourage to report any illegal or unethical behaviors.

(6) Working environment and worker's safety protection:

Ablerex considers the importance of the working environment and personal safety protection measures for employees. Use ISO9001 and 14001 management systems to carry out major environmental considerations/occupational safety and health risk control, and use target and plan management to prioritize improvement; while lower risks are controlled by operation control methods. After good operation and improvement, all Obtained obvious results and control, the company's major goals and management plan are summarized as follows:

No.	Target	Solution	Status	Execution
1	Change to lead-free product	10% leaded product change to lead-free product	There are still very few leaded products in the Company, although it still complied with international standard, but also as a goal to go.	Lead-free raw materials and lead-free electrical product development test, the production line has been fully changed accordingly.
2	10% recycling of Office total used	program for A4 paper and laser printer cartridge recycling	Recycling	Set A4 recycling paper dedicated machine, toner cartridges are re-transfer manufacturers to use
3	Energy saving and carbon reduction and improvement	Saving water saving measures	The company set the energy policy in 2019, electricity consumption decreased by 2% compared with 2019,(result is increasing 4.6%) water consumption decreased by 1% compared with 2019, (result is increasing 13.83%)	<ol style="list-style-type: none"> 1. Implement energy conservation and reduce electricity expenses. 2. Central air-conditioning use period control. 3. master the various units of electricity, to review the possible loss of power. 4. Analyze the rationality of electricity and set the optimal contract capacity. 5. The faucet is equipped with a water-saving device to reduce the amount of water. 6. Use water-saving equipment when replacement.

Follow-up activities on environmental and occupational safety and health promotion

A. Harmful substances limit (ROHS)

ROHS came into effect in July 1, 2006, the products sold to the EU shall not contain six hazardous substances includes lead, cadmium, mercury, hexavalent chromium, polybrominated biphenyls and polybrominated diphenyl ether. The Company actively promoted green

production and procurement, to achieve in the process, and has been with the main customers to meet the products without harmful substances, access to customer recognition.

B. Plan for Occupational Disaster Prevention

In order to achieve the goal of zero disaster, the Company plans to prepare the annual occupational disaster prevention plan at the end of each year, and then formulate detailed implementation plans according to the contents of the occupational disaster prevention plan, and will be implemented by the institution according to the planned time and content. The system explores the lack of implementation, at every three months of the safety and health committee or the labor meeting, to fix the occupational disaster prevention plan. In accordance with the resolution of the Safety and Health Committee during the year, we will set down the occupational disaster prevention plan, re-implementation, re-audit, review and revise the plan for the next year. We will continue to reduce the risk of harm to the public through the PDCA The ultimate goal of the disaster. Once an accident occurs, it will require countermeasure. There were 7 accidents for work safety in 2020 and 6 of them are traffic accidents involving employees on the way to and from work. The team is required to understand and improve the working conditions of the employees. Employees are required be careful on the way to and from work. At the same time, Work safety's inspections will also be implemented from time to time, and a total of 10 improvements proposed.

C. Implement the autonomous inspection

Employees in the face of different operating environment, process, operation and operation, may be due to unsafe operations, equipment or management and other factors, resulting in physical harm, to this end, the company is actively promoting the autonomous inspection, this is a measure to promote the discovery of potential hazards, and strive to improve and effectively control. The company carries out autonomous inspection the items, including equipment, the use of raw materials, operating environment, operating machinery and motor vehicles.

D. On-site job environment measurement and personal protection of employees

In the implementation of the operating environment of the Company, the operating environment measurement plan containing the sampling strategy is prepared, and the project is collected from the basic data collection, the process flow and the hazard record. Through the observation, interview record, survey, (CO₂), noise, ... and so on.

Site workplace planning safety line, the protection part of the necessary equipment, such as the protection of protective equipment, earplugs, etc., on the part of the staff assigned to the safety shoes to strengthen the protection. Regular health check every three years, the most recent implementation date 2018.07.27.

E. Strengthen corporate social responsibility to take care of employees

In the spirit of corporate social responsibility, the Company has a

Code of Ethics on Employee Practitioners, which clearly protects employees' work fairly and maintains their work. We also set up the Supplier Corporate Social Responsibility (CSR) Code for Supplier Management and Specifically, they are required to sign back the declaration, the specific requirements of the staff must also protect the rights and interests.

5.5.2 Any current or potential loss resulting from labor disputes and prevention actions for the past 2 years and as of the date of this annual report:

Ablerex values the welfare of all employees and has harmonious relationship between employer and the employees. Ablerex has no major dispute on labor relation in the past 2 years and up to the printing date of this Annual Report. Therefore, there should be no concerns on the loss resulting from labor disputes.

5.6 Important Contracts

Principal current contractual agreements shown below were effective or expired during the most recent reporting period:

Agreement	Counterparty	Period	Major Contents	Restrictions
Equipment Purchasing	Chunghwa Telecom	2020.11.20~2021.11.15	UPS	None

VI. Financial Information

6.1 Five-Year Financial Summary

6.1.1 Condensed Balance Sheet/Income Statement

A. Consolidated Condensed Balance Sheet – Based on IFRS

Unit : NTD in Thousand

Item	Year	Summarized Balance Sheets of Latest 5 years (Note 1)					03-31-2021 (Note 3)
		2016	2017	2018	2019	2020

*In case that the financial information in IFRSs Regulation less than 5 years, the following table (2) shall be prepared separately by GAAP Regulation.

Note 1: All the financial data stated for last 5 years have been reviewed by CPAs.

Note 2: Audited by CPAs.

Consolidated Financial Analysis – Under IFRSs

The causes of the financial ratio change over 20% in the last two years:

1. Solvency : Interest Protection Multiples in 2020 increased 22.52% compared with 2019 due to Income before tax increased.
2. Profitability :
The ratio of Operating profit over paid in capital in 2020 increased 104.7% than in 2019 due to Income before tax increased.
The ratio of Pre-Tax Income over paid in Capital in 2020 increased 40.08% than in 2019 due to Pre-Tax income increased.
3. Cash flow:
Cash flow ratio increased 123.51% than in 2019 due to the increase of net cash inflow from operating activities.
Cash Reinvestment Ratio increased than in 2019 due to the increase of net cash inflow from operating activities.
4. Leverage :
Degree of Operating Leverage decreased 47.82% than in 2019 due to increased of Operating Income.

Financial Analysis – Stand Alone - Under IFRSs

The causes of the financial ratio change over 20% in the last two years:

1. Profitability :

The ratio of Operating profit over paid in capital in 2020 decreased 49.95% than in 2019 due to Income before tax decreased.

The ratio of over paid in Capital in 2020 increased 24.27% than in 2019 due to Pre-Tax income increased.

2. Cash flow :

Cash flow ratio increased 439.13% than in 2019 due to the increase of net cash inflow from operating activities.

Cash reinvestment ratio increased than in 2019 due to the increase of net cash inflow from operating activities.

3. Leverage :

Degree of Operating Leverage increased 91.37% than in 2019 due to decreased of Operating Income.

Note : Financial Analysis Formula

1. Financial structure

- (1) Ratio of Liabilities to assets = total liabilities / total assets.
- (2) Ratio of long-term capital to fixed assets = (net of shareholders' equity + long-term liabilities) / net fixed assets.

2. Solvency

- (1) Current ratio = current assets / current liabilities.
- (2) Quick ratio = (current assets - inventory - prepaid expenses) / current liabilities.
- (3) Times interest earned ratio = before the income tax and interest expense net interest / current interest expense.

3. Operating ability

- (1) Account Receivable Turnover (including accounts receivable and bills due from operations) = Net Sales/Avg. Accounts Receivable (Including Receivables and Receivables due to Operation) Balance.
- (2) Days sales in accounts receivable = 365/receivables turnover.
- (3) Inventory turnover = cost of goods sold/average stock.
- (4) Account Payable Turnover (including accounts payable and bills payable as a result of operations) = balance of cost of goods sold / average payables for each period (including accounts payable and bills payable as a result of operations).
- (5) Average days in sales = 365/inventory turnover.
- (6) Fixed assets turnover = net sales/average net fixed assets.
- (7) Total assets turnover = net sales/average total assets.

4. Profitability

- (1) Ratio of Return on assets = [after tax loss + interest expense × (1-tax rate)] / average total assets.
- (2) Ratio of Return on shareholders' equity = post-tax profit/loss/average shareholder's equity.
- (3) Profit ratio = after-tax profit/loss/net sales.
- (4) Earnings per share = (net profit after tax - special share dividend) / weighted average number of shares outstanding.

5. Cash Flow

- (1) Cash flow ratio = net cash flow from operating activities / current liabilities.
- (2) Cash flow adequacy ratio = net cash flow from operating activities in the last five years / recent five years (capital expenditure + inventory increase + cash dividend).
- (3) Cash reinvestment ratio = (Net cash flow from operating activities - cash dividends) / (Gross fixed assets + long-term investments + other assets + working capital).

6. Leverage :

- (1) Degree of Operating leverage = (net operating income - variable operating costs and expenses) / operating profit.
- (2) Degree of Financial leverage = operating interest / (operating interest - interest expense).

- 6.3 Audit Committee's Report for the Most Recent Year : Please refer to Page 173 of the Chinese annual report.
- 6.4 Consolidated Financial Statements for the Most Recent Years: Please refer to Page 230 to 293 for the details
- 6.5 Parent Company Only Financial Statements for the Most Recent Years: Please refer to Page 174 to 229 for the details.
- 6.6 Impact of financial difficulties of the Company and related party on the Company's financial position: None

VII. Review of Financial Conditions, Financial Performance, and Risk Management

7.1 Condensed Financial Position – Under IFRSs

NTD Thousands; %

Item \ Year	2019	2020	Difference	
			Amount	%
Current assets	1,848,379	2,003,389	155,010	8.39
Non-current financial assets at fair value through other comprehensive income	81,000	81,000	0	0.00
Real estate, plant, and equipment	788,501	753,320	(35,181)	(4.46)
Right-of-use asset	16,267	8,640	(7,627)	(46.89)
Intangible assets	45,162	45,837	675	1.49
Deferred tax assets	45,206	46,040	834	1.84
Other non-current assets	29,806	27,073	(2,733)	(9.17)
Total assets	2,854,321	2,965,299	110,978	3.89
Current liabilities	1,256,452	1,351,434	94,982	7.56
long-term debt payable	5,683	22,691	17,008	299.28
Deferred tax liabilities	81,991	87,337	5,346	6.52
Income from Lease - non current	5,449	1,820	(3,629)	(66.60)
Other non-current liabilities	23,414	22,575	(839)	(3.58)
Total liabilities	1,372,989	1,485,857	112,868	8.22
Shareholders' equity, attributable to owners of parent	1,468,689	1,465,903	(2,786)	(0.19)
Capital stock	450,000	450,000	0	0.00
Additional paid-in capital	734,378	720,878	(13,500)	(1.84)
Retained earnings	336,595	347,135	10,540	3.13
Other equities	(52,284)	(52,110)	174	(0.33)
Non-controlling equities	12,643	13,539	896	7.09
Total shareholders' equity	1,481,332	1,479,442	(1,890)	(0.13)

Analysis of changes in financial ratios, which changes more than 20% and the changed amount is over NT\$10 million:
None

1. Long-term loan : due to the long-term loan provided by the countries of COVID-19 epidemic.

7.2 Financial Performance

A. Condensed Consolidated Financial Performance Analysis – Under IFRSs

		NTD Thousands; %			
Item	Year	2019	2020	Difference	
				Amount	%
Net Sales		2,462,390	2,361,923	(100,467)	(4.08)
Cost of Good Sold		1,888,457	1,785,101	(103,356)	(5.47)
Gross Profit		573,933	576,822	2,889	0.50
Operating Expense		548,069	523,869	(24,200)	(4.42)
Operating Income		25,864	52,953	27,089	104.74
Non-operating Income and Expense		17,481	7,736	(9,745)	(55.75)
Income Before Tax		43,345	60,689	17,344	40.01
Income Tax		2,790	18,063	15,273	547.42
Net Income		40,555	42,626	2,071	5.11

Analysis of changes in financial ratios, which changes more than 20% and the changed amount is over NT\$10 million:

1. Operating Income: mainly due to the decrease in operation income.
2. Income Before Tax: mainly due to decrease in operation income and increase of Expense.
3. Income Tax: mainly due to decrease in operation income and increase of Expense.

B. Estimated sales volume and its basis, the possible impact on the company's future financial business and the response plan:

With the booming development of global communication products, Internet, cable TV, wireless base stations, smart grids and cloud demand, the aging of existing global power infrastructure and power grids has led to end-use applications such as personal desktops. PCs, large-scale data centers for enterprises, large-scale computer equipment for public infrastructure, and other types of electronic digital devices all have stable power supply protection requirements, which makes UPS products almost indispensable standard equipment, so the world The UPS industry has shown a steady growth trend in recent years. According to the 2019 report of the industry survey company, if 2018 is the base period, it is estimated that the global UPS market will grow at a complex growth rate of about 3 to 5% every year from 2019 to 2025, and the market size will reach more than US \$ 13.5 billion in 2025.

PV Inverter is a part of the solar energy industry. According to the research of Energy Trend, Global demand is expected to continue to grow. The solar energy market in Taiwan has become the focus of global attention. The Taiwan government has set the "2025 Renewable Energy Development Goal", which will enable Taiwan to achieve 20GW of cumulative solar installations in 2025. In addition, the Legislative Yuan passed the amendment to the "Regulations on the Development of Renewable Energy" on April 12, 2019, reconfirming this solar installation target, which will ensure a certain proportion of the domestic solar energy industry's stable domestic demand market, which will not fluctuate significantly with the international environment. In the amendment to the Renewable Energy Development Regulations, the green power guaranteed purchase (bulk purchase) system was also introduced

for the first time, gradually leading the green power market to liberalize, and requiring large power users to install renewable energy with a certain capacity to drive the increase in green power demand.

In considering the market development situation and the company's own conditions, besides continuing to expand the ODM and OBM business in the international market of UPS, and actively participate in domestic UPS project engineering projects and provide maintenance services, as well as sales of solar power converters under our own brand. The company will aim to increase overall profitability, increase the sales volume and sales of various products, and actively increase the market share of various products.

7.3 Analysis of Cash Flow

7.3.1 Liquidity analysis of the recent years

Item \ Year	2020	2019	Financial ratio change
Current ratio	9.03	4.04	123.51%
Cash Flow adequacy ratio	50.08	54.23	-7.65%
Cash reinvestment ratio	4.10	0.00	100.00%

Analysis of financial ratio change:

- (1) Current ratio : As the company's net profit before tax increased in 2020, and with the growth of project projects, construction in progress increased, related advance receipts also increased, and income tax paid decreased, making the net cash inflow of operating activities compared with the previous year A substantial increase of 140.08%; and the current liabilities of 2020 only increased by 7.56% compared with the previous year. Therefore, the ratio has increased substantially.
- (2) Cash Flow adequacy ratio : Since the company's net cash inflow from operating activities in the last five years is not enough to cover capital expenditures, inventory increase, and cash dividends during the corresponding period, the ratio is less than 1. Although the net cash inflow from operating activities in 2020 has increased significantly, it is still insufficient To cover the annual capital expenditure and the increase in inventories and the distribution of cash dividends, and the gap ratio was larger than that in 2015, so the ratio declined.
- (3) Cash reinvestment ratio : The amount of net cash inflow from operating activities in 2020 after deducting cash dividends has changed from negative to positive, so there are surplus funds for reinvestment.

7.3.2 Remedy for cash deficit and liquidity insufficient: Operating profits of the company has been stable, still get full support from financial institutions and no liquidity insufficient up to the date of the report printed.

7.3.3 Analysis of cash liquidity in 1 year

Unit: NT\$ thousand

Beginning cash balance (1)	Expected net cash flow from operating activity of the year (2)	Expected cash outflow of the year (3)	Expected cash surplus (deficit) (1)+(2)-(3)	Remedial measures for the expected insufficient cash	
				Investing plan	Financing plan
296,879	116,798	158,725	254,952	-	-

1. Analysis of cash flow change in one year:

- (1) Operating activity : It is expected that the profit will be maintained in 2021. With the A/P and A/R conditions and the control of inventory, it is expected that the business activities will continue to show a net inflow of cash.
- (2) Investing activity : Mainly for research and development equipment purchase and production line equipment updates and upgrades.
- (3) Financing activity : It is expected to repay loans from financial institutions and distribute cash dividends.

2. Remedial measures for the expected insufficient cash and liquidity analysis: N/A

7.4 Impact of major capital expenditure on finance and business : None

7.5 Investment policies, reasons for gain or loss and improvement plan in regard to investment plans in current year and the next year

7.5.1 Investment Policies:

In response to the need to strengthen the company's business development and upstream and downstream integration, the company will be prepared to assess the implementation of the investment plan after the investment.

7.5.2 Reasons for gain or loss and improvement plan in regard to investment plans in current year

Dec. 31, 2018; Unit: NTD thousand

Invested Company	Invested Amount	Investment Policy	Recognition of the investment gain or loss in the latest year	Main reason of gain or loss	Improvement plan
Joint Rewards Trading Corp.	-	Trading Company between AblereX and AblereX-SZ.	NT\$(19)	The dissolution registration was completed on 2020.9.28.	-
AblereX Electronics (SAMOA) Co. LTD.	US\$ 6,635	To set up AblereX-SZ and Holding company of AblereX-BJ.	NT\$(3,763)	mainly recognized profit loss from ABLEREX-SZ	Increase sales and reduce cost
AblereX Corporation	US\$ 250	To promote and sales for America territory.	NT\$7,060	mainly recognized profit loss from ABLEREX-LATAM	-
AblereX International Corp. LTD.	HK\$ 10	Trading Company between AblereX and AblereX-SZ.	NT\$840	Support to expand sales	-
AblereX Electronics(s) PTE. LTD	US\$ 1,480	To promote and sales for EMEA.	NT\$8,071	Expand sales territory	-
AblereX Electronics UK LTD.	GBP 100	To set up Holding company of AblereX-IT.	NT\$6,925	Expand sales territory	-
WADA DENKI CO., LTD.	JPY 30,000	To promote and sales for Japan territory.	NTD7,151	Expand sales territory	-

Note: The Company recognizes the write-down of the investment gains and losses.

7.5.3 Investment Plan in the next year: None

7.6 Risk Management and Evaluation until the report printed

7.6.1 The impact of interest rate, exchange rate, and inflation on the company's income and expense and the responsive measures:

1. The impact of interest rate change:

The Group's financial costs in 2020 and 2019 were NTD 6,143 thousand and NTD 5,497 thousand, respectively. The ratio of financial costs to net operating income for the current period was 0.26% and 0.22%, respectively. The financial cost expenses accounted for a very small proportion of the net operating income of the Group, and Most of the group's financing is short-term fixed-rate loan, so no significant fair value interest rate risk is expected to occur. The Group will maintain a close relationship with the correspondent banks based on the

principle of sound and conservative financial management, so as to immediately grasp relevant information on interest rate changes and reduce the impact of interest rate fluctuations on the Group.

2. The impact of exchange rate fluctuation:

The business of the Group involves a number of non-functional currencies (the functional currency of the Company is NT and the functional currency of some subsidiaries is US \$ and RMB). Therefore, the foreign currency assets affected by the exchange rate fluctuation and liability information and foreign currency market risk analysis as follows.

	<u>2020.12.31</u>			<u>Fiscal 2020</u>		
	<u>Currency</u> <u>(thousand)</u>	<u>Rate</u>	<u>(NTD)</u>	<u>variation</u>	<u>Affect net</u> <u>profit before</u> <u>tax</u>	<u>Affect other</u> <u>comprehensive</u> <u>gains and</u> <u>losses</u>
(currency : monetary assets)						
<u>Financial assets</u>						
<u>monetary items</u>						
USD : NTD	\$5,857	28.4800	\$166,807	1%	\$1,668	\$-
RMB : NTD	3,102	4.3770	13,577	1%	136	-
JPY : NTD	10,427	0.2763	2,881	1%	29	-
USD : RMB	499	6.5067	14,211	1%	142	-
SGD : USD	1,241	0.7570	26,755	1%	268	-
<u>Financial liabilities</u>						
<u>monetary items</u>						
USD : NTD	\$2,063	28.4800	\$58,754	1%	\$588	\$-
USD : RMB	621	6.5067	17,686	1%	177	-
SGD : USD	414	0.7570	8,926	1%	89	-

The Group will maintain close contact with correspondent banks to grasp the relevant information of exchange rate changes in real time and reduce the impact of exchange rate changes on the company.

3. The responsive measures to the risk of exchange rate fluctuation:

- a. Continue to strengthen personnel concepts for exchange hedging, through a greater interaction for real exchange rate system with financial institutions, so as to judge to the impact of exchange rate fluctuations arising.
- b. Before quoting to customer, the company will estimate the trends and factors that influence the exchange rate in future. More comprehensive consideration is required to determine a reasonable pricing and to minimize the effect of changes in the exchange rate.
- c. To achieve a certain degree of natural hedging effect through an offset for regular A/P and A/R.

- d. Under the “Regulations Governing the Acquisition and Disposal of Assets”, the company will effectively reduce the purchase of various assess derivative financial instruments exchange rate risks by hedging part of responsibilities in charge of strict control to prevent inappropriate transactions to reduce exchange rate risks arising from the exchange losses.

4. The impact of inflation

The company has not been inflationary circumstances have a significant impact on profit or loss so far. In addition to pay attention to fluctuations in the market price, and to maintain a good interaction with suppliers and customers, in order to adjust product prices and raw material stocks. It should be able to effectively reduce the impact of inflation on the Company.

7.6.2 Conducting high-risk and high-leveraged investment, granting loans to others, endorsement & guarantee and derivatives policy, main cause of profit and loss, and the responsive measures:

- a. The company has dedicated to the core business since established. No high-risk nor high-leveraged investment has been implemented.
- b. The company conducts loaning funds according to “Regulations Governing Loaning of Funds and Making of Endorsements/Guarantees”. The information of the company and the subsidiaries loaning funds to others up to the date of the report printed is disclosed as the following:

(1) Information of the subsidiaries loaning funds to others up to the date of the report printed :

Date of loan funds	Date approved by BoD	Company Name	Approved loan	Loan balance	Rate	Collateral	Due date	Date approved by BoD
2020/9/22	2020/8/10	Ablerex Latam Corporation	US\$1,500,000	USD500,000	1.0%	Due for repayment	Credit	2021/9/22
2020/10/27				USD500,000				2021/9/22
2021/3/10				USD500,000				2021/9/22

(2) Subsidiary of the company, The Company's subsidiary company funds loans and other information:

Ablerex International Corporation Limited (Ablerex-HK), a subsidiary of the Company, is funded with Ablere Electronics (Suzhou) Co., Ltd. (abbreviation Ablere-SZ) for the development of its operations. The status of loaning is listed below

Date of loan funds	Date approved by BoD	Company Name	Amount	Rate	Repayment	Collateral	Due date	Date approved by BoD
2019/8/23	2019/8/5	Ablerex Electronics (Suzhou) Co., Ltd.	US\$3,000,000	USD2,000,000	2.475%	Due for repayment	Credit	2022/8/22

(3) The company conducts endorsement guarantees according to the internal policy “Procedures for Making of Endorsements / Guarantees”. Information of the company and the subsidiaries making endorsements / guarantees up to the date of the report printed is disclosed as the following:

Unit: US\$

Date of Endorsement / Guarantee	Date approved by BoD	Guaranteed Company	Relationship with Ablerex	Collateral	Guarantee Items	Undertaking Bank	Endorsement/ Guarantee Amount
2020/12/7	2020/8/10	Ablerex-HK	Subsidiary	N/A	Bank financing	China Trust	USD 2,000,000
2020/12/17	2020/8/10	Ablerex-HK	Subsidiary	N/A	Bank financing	Taipei Fubon	USD 2,500,000
2021/4/14	2021/1/25	Ablerex-HK	Subsidiary	N/A	Bank financing	Mega Bank	USD 3,000,000
Total							USD 7,500,000

(4) The purpose of the company engaging in the derivatives trading is to avoid the risk of change in foreign currency assets or liabilities due to the fluctuation of exchange rate. The derivatives trading is focused on forward foreign exchange contract, and the trading procedure is abided by the internal regulation “Procedures for Acquisition or Disposal of Assets”. The risk of derivatives trading is limited.

7.6.3 Future R&D projects and corresponding budget:

It is fundamental for R&D in the electronic industry. So the R&D should provide the plan every year. According to plan provision related to R&D to ensure competitive niche of the Company. The company has always attached great importance to research and development of products, the trend growth of the R&D costs in the following table to know the year, the future will continue to foster outstanding research and development personnel and actively involved in research resources to cope with the changing market trends and improve their own it Competitiveness.

The Company's research and development philosophy is:

- (1) to focus on improving power quality and improve reliability of power supply products
- (2) development and integration of advanced power electronics and digital control technology
- (3) introduced into academic research, access to innovation and key technologies
- (4) the implementation of the patented technology layout, improve the industry barriers to competition
- (5) really grasp technology trends and market demand, real-time development of new products

The company's future research plans and programs as follows:

- (1) down size, intelligence, and other network-oriented and decentralized
- (2) three-phase high frequency parallel among large UPS
- (3) Power Quality Management Technology
- (4) High-power grid-connected PV Inverter
- (5) Power Management Software Technology
- (6) Smart Grid Applications Related Products
- (7) Wireless Battery Monitoring System (Wireless BMS)

Project	Description
Three-phase high frequency parallel among large UPS	1. Solve the issue of flexibly changed output load, to develop a UPS with multiple parallel operation functions, and develop towards modularization and high-efficiency multi-functional use. 2. Propose a fast transfer solution of DC/AC backup power supply to improve the short power-off time problem caused by the backup power system at the moment of power-off transition in the hot standby state.
Power Quality Management Technology	According to the demand of the load end, a harmonic current that is inverse to the load harmonic current is injected into the power system. This harmonic current and the load harmonic current cancel each other, so that the power system end obtains a current waveform close to sinusoidal, and achieves the filtering of harmonics. effect. In order to improve some damage problems caused by harmonic currents, such as transformer overheating, rotating machinery disturbance, voltage distortion, damage to power components and machine failures, etc., to make the power system more stable.
High-power grid-connected PV Inverter	Develop new islanding effect detection technology to break through the existing barriers and patent barriers, and use the three-phase three-phase parallel power conversion interface technology as the green energy of solar energy as its electrical energy, in order to achieve energy saving and carbon reduction the goal.
Power Management Software Technology	Mainly use embedded system development, and its main purpose is to provide a system development platform required for general industrial control applications based on PC-based architecture, with the functions required in general industrial applications, and more; through comprehensive design in advance Consider, provide different equipment for different application requirements.
Smart Grid Applications Related Products	The introduction of smart grid product development can record the power generation/power consumption relationship diagrams at different points in time, which can be used as a household power monitoring system and achieve energy-saving effects. And with the company's current PV Inverter products, as a basis for energy saving, improve the integrity of PV Solution and increase market competitiveness.
Wireless Battery Monitoring System (Wireless BMS)	Developed a database/curve viewing system with wireless transmission function, which can remotely monitor and diagnose battery operation status, save on-site installation costs and use it with UPS to make the product more diversified.

The investment for last three years and the research and development costs expected in 2016 as follows:

Unit : NTD in Thousands

Item / Year	2018	2019	2020	Expected in 2021
R&D invested	151,895	142,655	142,655	170,166
Growth	5.27%	-6.08%	3.34%	19.28%

7.6.4 The impact of domestic and international policies and law change on the company's finance and business and the responsive measures:

The company follows national policies, decrees and international norms, implements various operating activities, and holds the changes in important policies, laws and regulations, and timely adjusts the company's internal systems and operating activities in order to comply with the specifications and ensure smooth operation of the company. Currently, the company has no significant impact on finance and business due to changes in domestic and foreign regulations.

7.6.5 The impact of technology change and industrial change on the company's finance and business and the responsive measures:

Under the trend of cloud computing, the demand for building data centers continues increasing. Because cloud devices are devices with a high energy density, and these devices have important tasks of storing and exchanging data, it is impossible to use only office-level energy management systems. Therefore, a large-scale, high-power and fast-response energy management system has become a key requirement for the new generation of energy systems. Under this trend, UPS (Uninterruptible Power System) has evolved from the past as a corporate energy rescue to energy Management equipment. Under this trend, the ability to produce UPSs with high density, low energy consumption, high stability and long durability will be the key to success in mastering the power management of data centers.

In response to industry development and product application trends, in addition to enhancing the technology of UPS uninterruptible power equipment, the company is also committed to the development of high value-added power quality improvement systems, green energy systems and energy storage systems and other related power electronic products. Every year, the company invests a large amount of research and development manpower and funds for theoretical technology application research and new product design and development, in order to respond to the trend of future electronic products and maintain a competitive advantage.

7.6.6 The impact of industrial image change on business risk management and the responsive measures:

Since the venture has been to uphold the integrity of sound for business purposes, continue to strengthen internal management and improve the quality of management capacity to establish a good corporate image of the company, the company got quite good records on Corporate Governance Evaluation in past years and planning to enter the capital market can absorb more talented people into the company service. Enrich management team strength, operating results will contribute to the society. There was not significant change of corporate image for recent years. The company will be in the pursuit of the largest shareholders' equity and the interests of employees and fulfill the greatest social responsibility in future.

- 7.6.7 The expected effect, potential risk, and responsive measures of merger:
The company's did not have any merger conducted in 2020 and up to the date of the annual report printed.
- 7.6.8 The expected effect, potential risk, and responsive measures of plant expansion:
The company's did not have any plant expansion in 2020 and up to the date of the annual report printed.
- 7.6.9 The risk due to concentration of procurements and sales and the responsive measures:
- a. The risk due to concentration of procurements and the responsive measures:
The main raw materials of the company's products include batteries, steel sheets, transformers, semiconductor electronic components, etc. Due to the large number of suppliers, the purchase amount and proportion of each manufacturer will not be too high or excessively dependent, so there is no excessive concentration of purchases Risk. In order to maintain flexibility in the bargaining of raw material prices, the company has not forced to sign long-term supply contracts with suppliers, but in terms of major raw materials, it maintains the supply of several suppliers, and the company and each supplier All maintain a long-term good cooperative relationship to ensure the stability of the supply source.
 - b. The risk due to concentration of sales and the responsive measures:
The company's main sales target is branded customers and agency distributors all over the world. However, under the trend of global corporate mergers and acquisitions, there is indeed a trend of centralized sales; this trend will make the company face production and revenue vulnerable to a small number of customers. And face greater price pressure. The Company has adopted product diversification and actively expanded its response to emerging markets. It will tend to diversify the products, customers, and regional combinations that are shipped to prevent the risk of excessive sales concentration.
- 7.6.10 The impact of massive stock transfer or change by directors, supervisors, and shareholders with over 10% shareholding, the risk, and the responsive measures:
There was not any massive stock transfer or change by directors, and shareholders with over 10% shareholding in 2020 and up to the date of the annual report printed.
- 7.6.11 The impact of right to operation change on the company, the risk, and the responsive measures:
No right changed on the company up to the date of the annual report printed so N/A for the issue.
- 7.6.12 Legal and non-legal events:
- (1) The result of the judgments settled or ongoing lawsuits, non-lawsuits or administrative lawsuits in the last 2 years up to the date of the report printed, which could cause significant impact on shareholders' equity or security price of the company, should reveal the arguing

facts, amount engaged, litigation starting date, the main parties of the suit, and present situation: None.

(2) Major ongoing lawsuits, non-lawsuits or administrative lawsuits caused by Directors, Supervisors, President, Person in charge, and shareholders with over 10% holdings of the company and subsidiaries in the last 2 years up to the date of the report printed. The result could cause significant impact on shareholders' equity or security price of the company: None.

(3) Anything listed in Article 157 of Securities and Exchange Act had been implemented by Directors, Supervisors, managers, and shareholders with over 10% holdings of the company and the response of the company in the last 2 years up to the date of the report reprinted: None

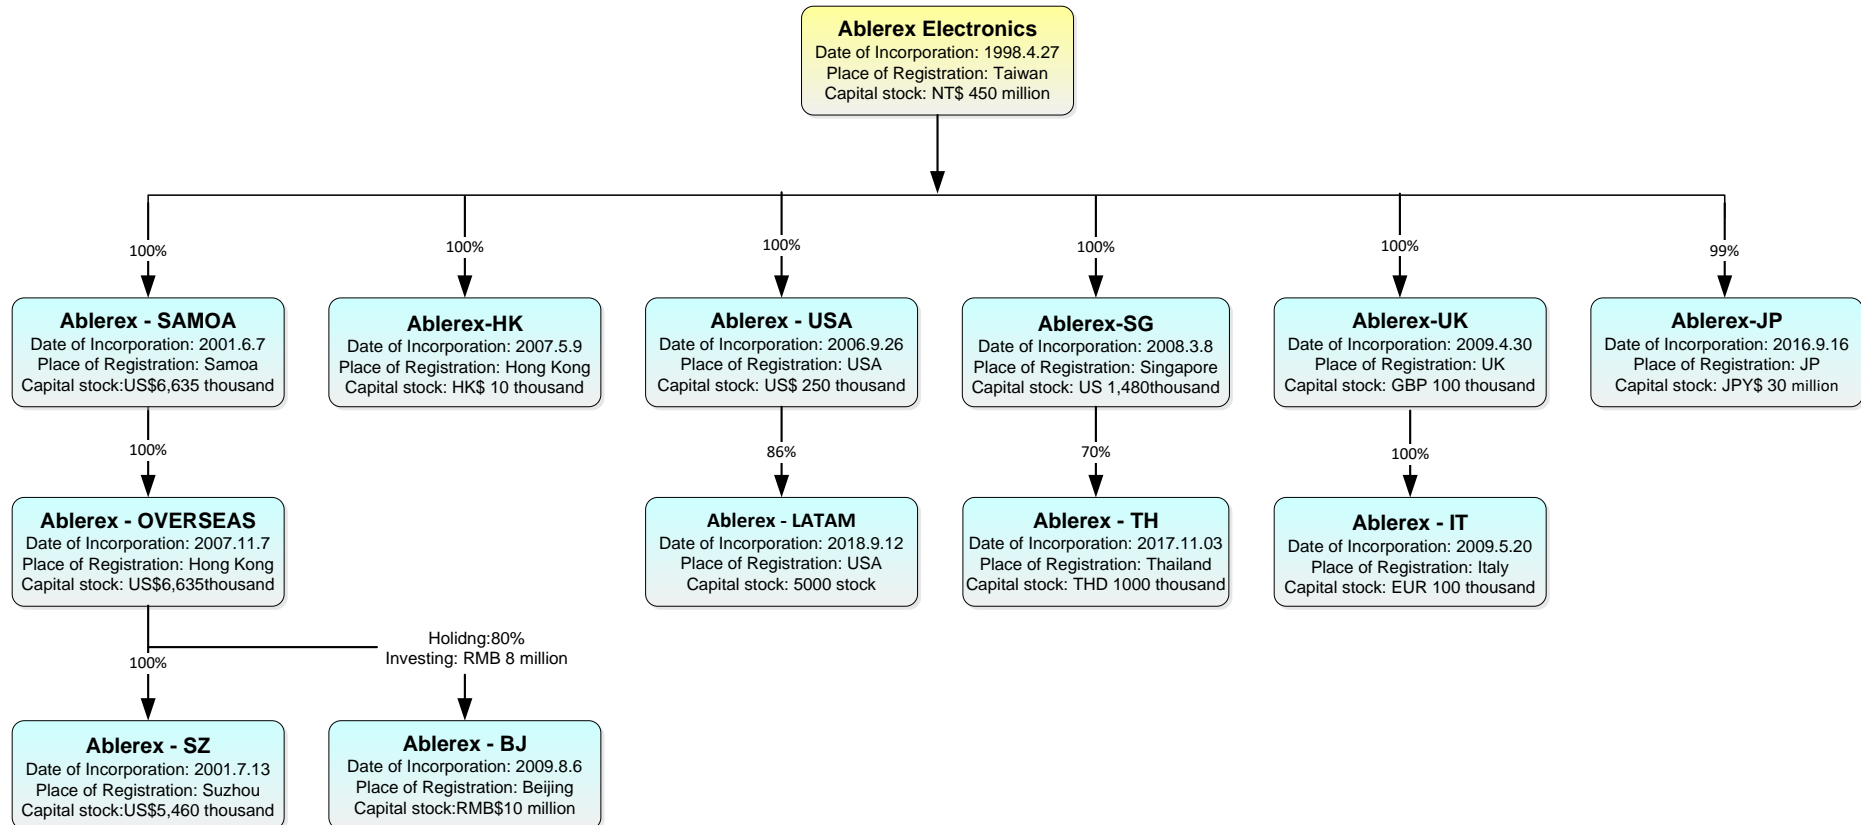

7.6.13 Other significant risks and responsive measures: None

7.7 Other important matters: None

Ablerex Electronics Company Limited

Statement of Internal Control System

Date: March 19, 2021

Based on the findings of a self-assessment, Ablerex Electronics Company Limited (Ablerex) states the following with regard to its internal control system during the year 2020:

1. Ablerex's Board of Directors and Management are responsible for establishing, implementing, and maintaining an adequate internal control system. Our internal control is a process designed to provide reasonable assurance over the effectiveness and efficiency of our operations (including profitability, performance, and safeguarding of assets), reliability of our financial reporting, and compliance with applicable laws and regulations.
2. An internal control system has inherent limitations. No matter how perfectly designed, an effective internal control system can provide only reasonable assurance of accomplishing its stated objectives. Moreover, the effectiveness of an internal control system may be subject to changes due to extenuating circumstances beyond our control. Nevertheless, our internal control system contains self-monitoring mechanisms, and Ablerex takes immediate remedial actions in response to any identified deficiencies.
3. Ablerex evaluates the design and operating effectiveness of its internal control system based on the criteria provided in the Regulations Governing the Establishment of Internal Control Systems by Public Companies (herein below, the Regulations). The criteria adopted by the Regulations identify five key components of managerial internal control: (1) control environment, (2) risk assessment, (3) control activities, (4) information and communication, and (5) monitoring.
4. Ablerex has evaluated the design and operating effectiveness of its internal control system according to the aforesaid Regulations.
5. Based on the findings of such evaluation, Ablerex believes that on December 31, 2020, it has maintained, in all material respects an effective internal control system (that includes the supervision and management of our subsidiaries) to provide reasonable assurance over our operational effectiveness and efficiency, reliability of financial reporting, and compliance with applicable laws and regulations.
6. This Statement will be an integral part of Ablerex's Annual Report for the year 2018 and Prospectus, and will be made public. Any falsehood, concealment, or other illegality in the content made public will entail legal liability under Articles 20, 32, 171, and 174 of the Securities and Exchange Law.
7. This Statement has been passed by the Board of Directors in their meeting held on March 19, 2021, with none of the six attending directors expressing dissenting opinions, and the remainder all affirming the content of this Statement.

Ablerex Electronics Company Limited

Steven Hsu
Chairman and President

ABLEREX ELECTRONICS CO., LTD.
PARENT COMPANY ONLY FINANCIAL
STATEMENTS AND INDEPENDENT AUDITORS’
REPORT
DECEMBER 31, 2020 AND 2019

For the convenience of readers and for information purpose only, the auditors’ report and the accompanying financial statements have been translated into English from the original Chinese version prepared and used in the Republic of China. In the event of any discrepancy between the English version and the original Chinese version or any differences in the interpretation of the two versions, the Chinese-language auditors’ report and financial statements shall prevail.

INDEPENDENT AUDITORS' REPORT TRANSLATED FROM CHINESE

To the Board of Directors and Shareholders of ABLEREX ELECTRONICS CO., LTD.

Opinion

We have audited the accompanying parent company only balance sheets of Ablerex Electronics Co., Ltd. as at December 31, 2020 and 2019, and the related parent company only statements of comprehensive income, of changes in equity and of cash flows for the years then ended, and notes to the parent company only financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying parent company only financial statements present fairly, in all material respects, the financial position of the Company as at December 31, 2020 and 2019, and its financial performance and its cash flows for the years then ended in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers.

Basis for opinion

We conducted our audits in accordance with the Regulations Governing Auditing and Attestation of Financial Statements by Certified Public Accountants and generally accepted auditing standards in the Republic of China. Our responsibilities under those standards are further described in the Auditors' responsibilities for the audit of the parent company only financial statements section of our report. We are independent of the Company in accordance with the Norm of Professional Ethics for Certified Public Accountants of the Republic of China, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key audit matters

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the parent company only financial statements of the current period. These matters were addressed in the context of our audit of the parent company only financial statements as a whole and, in forming our opinion thereon, we do not provide a separate opinion on these matters.

Key audit matters for the Company's 2020 parent company only financial statements of the current period are stated as follows:

Appropriateness of cut-off of project construction revenue

Description

Please refer to Note 4(24) for accounting policy on revenue recognition and Note 6(16) for composition of operating revenue. For the year ended December 31, 2020, the Company's project construction revenue amounted to NT\$979,076 thousand, accounting for 48% of net sales.

The Company's operating revenue is comprised of sales revenue and project construction revenue. The main composition of the project construction revenue is the sale of large equipment and installation related projects. The project needs to be completed through the Company's installation of large-scale equipment, and after the relevant documents are executed by both parties and the client can obtain and consume the benefits provided by the asset, the Company will have deemed to have completed the contractual performance obligations and can recognize the project construction revenue. Due to the fact that the income of the Company's project construction involves manual operation, it may result to inappropriate timing recognition of revenue. Considering that the amount of income recognized by the Company's project construction in a timely manner has a significant impact on the parent company only financial statements, we have deemed the appropriateness of the project construction income as one of the significant audit matters for the year.

How our audit addressed the matter

We performed the following audit procedures in order to assess cut-off of project construction revenue:

1. Assessed and obtained an understanding of the Company's internal control procedures of the project construction revenue recognition, and confirmed the related internal controls were performed effectively.
2. Performed cut-off test on project construction revenue transactions, and selected samples to check that the project construction revenue had been recorded in the proper period accordingly.
3. Tested the accuracy and completeness of project construction list and traced to a related document that can prove revenue in order to confirm that the recognition amount and timing were appropriate.

Valuation of allowance for inventory valuation losses

Description

Please refer to Note 4(10) for accounting policy on inventory valuation, Note 5(2) for accounting estimates and assumption uncertainty in relation to inventory valuation, and Note 6(4) for the details of allowance for inventory valuation losses. Also, please refer to Note 4(11) for accounting policies on investments accounted for using equity method, Note 6(5) for details of investments accounted for using equity method, and Note 13(3) for disclosure of investments accounted for using equity method.

As of December 31 2020, the Company's inventories and allowance for inventory valuation losses amounted to \$813,842 thousand and \$83,091 thousand, respectively, and the Company's investments accounted for using equity method amounted to \$666,834 thousand, of which the Company's wholly-owned subsidiary, Ablerex Electronics (Suzhou) Co., Ltd, of \$429,977 thousand was the major operating entity. The Company and its directly wholly-owned subsidiary, Ablerex Electronics (Suzhou) Co., Ltd, are engaged in the design, manufacture and sales of uninterruptible power supply systems, equipment to power quality devices and others. Due to the rapid technological innovations and the competitive nature of the market, there is a higher risk of inventory losses due to the market value decline or obsolescence. The Company recognises inventories at the lower of cost and net realisable value. Obsolete or slow-moving inventories were assessed individually. The Company's and its subsidiary's estimation and determination of the net realizable value of inventories are subjected to management's judgement, involves a high level of uncertainty. Considering that the inventories and inventory valuation loss of the Company and its directly wholly-owned subsidiary, Ablerex Electronics (Suzhou) Co., Ltd, which is accounted for using equity method, were significant to the parent company only financial statements, it was identified as a key audit matter.

How our audit addressed the matter

We performed the following audit procedures in order to assess the adequacy of the measurement of net realisable value and provision on allowance for inventory valuation losses:

1. Assessed the reasonableness of policies relating to the provision of allowance for inventory valuation losses and procedures based on our understanding of the Company's and its subsidiary's operation and industry.
2. Verified the accuracy of the inventory aging report and net realisable value report in order to confirm that the information in the reports were consistent with the Company's and its subsidiary's

inventory policies.

3. Checked the appropriateness of the estimation basis adopted by the Company and its subsidiary for the evaluation of the net realizable value, verified the accuracy of inventory selling and purchase prices, and recalculated and evaluated the reasonableness of allowance for inventory valuation losses.

Responsibilities of management and those charged with governance for the consolidated financial statements

Management is responsible for the preparation and fair presentation of the parent company only financial statements in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers, and for such internal control as management determines is necessary to enable the preparation of parent company only financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the parent company only financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the company or to cease operations, or has no realistic alternative but to do so.

Those charged with governance, including the audit committee, are responsible for overseeing the Company's financial reporting process.

Auditors' responsibilities for the audit of the parent company only financial statements

Our objectives are to obtain reasonable assurance about whether the parent company only financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the generally accepted auditing standards in the Republic of China will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these parent company only financial statements.

As part of an audit in accordance with the generally accepted auditing standards in the Republic of China, we exercise professional judgement and maintain professional skepticism throughout the audit. We also:

1. Identify and assess the risks of material misstatement of the parent company only financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
2. Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
3. Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
4. Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the parent company only financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Company to cease to continue as a going concern.
5. Evaluate the overall presentation, structure and content of the parent company only financial statements, including the disclosures, and whether the parent company only financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
6. Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Company to express an opinion on the parent company only financial statements. We are responsible for the direction, supervision and performance of the company audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the parent company only financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditors' report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Chou, Hsiao-Tzu

ABLEREX ELECTRONICS CO., LTD.
NOTES TO THE PARENT COMPANY ONLY FINANCIAL STATEMENTS
DECEMBER 31, 2020 AND 2019

(Expressed in thousands of New Taiwan dollars, except as otherwise indicated)

1. History and Organization

(1) Ablere Electronics Co., Ltd (the “Company”), formerly UIS Ablere Electronics Co., Ltd., was incorporated under the provisions of the Company Law of the Republic of China (R.O.C.) on April 27, 1998. The Company merged with PEC Technology Co., Ltd. on April 1, 2002, with the Company as the surviving company and was then renamed as Ablere Electronics Co., Ltd. The shares of the Company have been trading on the Taipei Exchange since September 9, 2010.

(2) The Company is primarily engaged in the following business activities:

- A. Manufacturing and sales of uninterruptible power supply systems.
- B. Manufacturing and sales of equipment to power quality devices.
- C. Manufacturing and sales of solar energy equipment.
- D. Maintenance and technical services.

2. The Date of Authorization for Issuance of the Financial Statements and Procedures for Authorization

These parent company only financial statements were authorised for issuance by the Board of Directors on March 19, 2021.

3. Application of New Standards, Amendments and Interpretations

(1) Effect of the adoption of new issuances of or amendments to International Financial Reporting Standards (“IFRS”) as endorsed by the Financial Supervisory Commission (“FSC”)

New standards, interpretations and amendments endorsed by the FSC effective from 2020 are as follows:

New Standards, Interpretations and Amendments	Effective date by International Accounting Standards Board
Amendments to IAS 1 and IAS 8, ‘Disclosure initiative-definition of material’	January 1, 2020
Amendments to IFRS 3, ‘Definition of a business’	January 1, 2020
Amendments to IFRS 9, IAS 39 and IFRS7, ‘Interest rate benchmark reform’	January 1, 2020
Amendment to IFRS 16, ‘Covid- 19- related rent concessions’	June 1, 2020 (Note)

Note : Earlier application from January 1, 2020 is allowed by FSC.

The above standards and interpretations have no significant impact to the Company’s financial condition and financial performance based on the Company’s assessment.

(2) Effect of new issuances of or amendments to IFRSs as endorsed by the FSC but not yet adopted by the Company

New standards, interpretations and amendments endorsed by the FSC effective from 2021 are as follows:

New Standards, Interpretations and Amendments	Effective date by International Accounting Standards Board
Amendments to IFRS 4, ‘Extension of the temporary exemption from applying IFRS 9’	January 1, 2021
Amendments to IFRS 9, IAS 39, IFRS 7, IFRS 4 and IFRS 16, ‘Interest Rate Benchmark Reform— Phase 2’	January 1, 2021

The above standards and interpretations have no significant impact to the Company’s financial condition and financial performance based on the company’s assessment.

(3) IFRSs issued by IASB but not yet endorsed by the FSC

New standards, interpretations and amendments issued by IASB but not yet included in the IFRSs as endorsed by the FSC are as follows:

New Standards, Interpretations and Amendments	Effective date by International Accounting Standards Board
Amendments to IFRS 3, ‘Reference to the conceptual framework’	January 1, 2022
Amendments to IFRS 10 and IAS 28, ‘Sale or contribution of assets between an investor and its associate or joint venture’	To be determined by International Accounting Standards Board
IFRS 17, ‘Insurance contracts’	January 1, 2023
Amendments to IFRS 17, ‘Insurance contracts’	January 1, 2023
Amendments to IAS 1, ‘Classification of liabilities as current or non-current’	January 1, 2023
Amendments to IAS 1, ‘Disclosure of accounting policies’	January 1, 2023
Amendments to IAS 8, ‘Definition of accounting estimates’	January 1, 2023
Amendments to IAS 16, ‘Property, plant and equipment: proceeds before intended use’	January 1, 2022
Amendments to IAS 37, ‘Onerous contracts— cost of fulfilling a contract’	January 1, 2022
Annual improvements to IFRS Standards 2018–2020	January 1, 2022

The above standards and interpretations have no significant impact to the Company’s financial condition and financial performance based on the Company’s assessment.

4. Summary of Significant Accounting Policies

The principal accounting policies applied in the preparation of these parent company only financial statements are set out below. These policies have been consistently applied to all the periods presented, unless otherwise stated.

(1) Compliance statement

The parent company only financial statements of the Company have been prepared in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers.

(2) Basis of preparation

A. Except for the following items, the parent company only financial statements have been prepared under the historical cost convention:

- (a) Financial assets and financial liabilities (including derivative instruments) at fair value through profit or loss.
- (b) Financial assets at fair value through other comprehensive income.
- (c) Defined benefit liabilities recognised based on the net amount of pension fund assets plus less present value of defined benefit obligations.

B. The preparation of financial statements in conformity with International Financial Reporting Standards, International Accounting Standards, IFRIC Interpretations, and SIC Interpretations as endorsed by the FSC (collectively referred herein as the “IFRSs”) requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in the process of applying the Company’s accounting policies. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the parent company only financial statements are disclosed in Note 5.

(3) Foreign currency translation

Items included in the financial statements of the Company’s entities are measured using the currency of the primary economic environment in which the entity operates (the “functional currency”). The parent company only financial statements are presented in New Taiwan Dollars, which is the Company’s functional currency.

A. Foreign currency transactions and balances

- (a) Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions or valuation where items are remeasured. Foreign exchange gains and losses resulting from the settlement of such transactions are recognised in profit or loss in the period in which they arise.
- (b) Monetary assets and liabilities denominated in foreign currencies at the period end are re-translated at the exchange rates prevailing at the balance sheet date. Exchange differences arising upon re-translation at the balance sheet date are recognised in profit or loss.
- (c) Non-monetary assets and liabilities denominated in foreign currencies held at fair value through profit or loss are re-translated at the exchange rates prevailing at the balance sheet

date; their translation differences are recognised in profit or loss. Non-monetary assets and liabilities denominated in foreign currencies held at fair value through other comprehensive income are re-translated at the exchange rates prevailing at the balance sheet date; their translation differences are recognised in other comprehensive income. However, non-monetary assets and liabilities denominated in foreign currencies that are not measured at fair value are translated using the historical exchange rates at the dates of the initial transactions.

- (d) All foreign exchange gains and losses are presented in the statement of comprehensive income within 'other gains and losses' based on transaction nature.

B. Translation of foreign operations

- (a) The operating results and financial position of all the group entities, associates and joint arrangements that have a functional currency different from the presentation currency are translated into the presentation currency as follows:
 - i. Assets and liabilities for each balance sheet presented are translated at the closing exchange rate at the date of that balance sheet;
 - ii. Income and expenses for each statement of comprehensive income are translated at average exchange rates of that period; and
 - iii. All resulting exchange differences are recognised in other comprehensive income.
- (b) When the foreign operation partially disposed of or sold is a subsidiary, cumulative exchange differences that were recorded in other comprehensive income are proportionately transferred to the non-controlling interest in this foreign operation. In addition, even when the Company retains partial interest in the former foreign subsidiary after losing control of the former foreign subsidiary, such transactions should be accounted for as disposal of all interest in the foreign operation.

(4) Classification of current and non-current items

- A. Assets that meet one of the following criteria are classified as current assets; otherwise they are classified as non-current assets:
 - (a) Assets arising from operating activities that are expected to be realised, or are intended to be sold or consumed within the normal operating cycle;
 - (b) Assets held mainly for trading purposes;
 - (c) Assets that are expected to be realised within twelve months from the balance sheet date;
 - (d) Cash and cash equivalents, excluding restricted cash and cash equivalents and those that are to be exchanged or used to settle liabilities more than twelve months after the balance sheet date.
- B. Liabilities that meet one of the following criteria are classified as current liabilities; otherwise they are classified as non-current liabilities:
 - (a) Liabilities that are expected to be settled within the normal operating cycle;
 - (b) Liabilities arising mainly from trading activities;

- (c) Liabilities that are to be settled within twelve months from the balance sheet date;
- (d) Liabilities for which the repayment date cannot be extended unconditionally to more than twelve months after the balance sheet date. Terms of a liability that could, at the option of the counterparty, result in its settlement by the issue of equity instruments do not affect its classification.

(5) Cash equivalents

Cash equivalents refer to short-term, highly liquid investments that are readily convertible to known amount of cash and subject to an insignificant risk of changes in value. Time deposits that meet the above criteria and are held for the purpose of meeting short-term cash commitment in operations are classified as cash equivalents.

(6) Financial assets at fair value through other comprehensive income

A. Financial assets at fair value through other comprehensive income comprise equity securities which are not held for trading, and for which the Company has made an irrevocable election at initial recognition to recognise changes in fair value in other comprehensive income and debt instruments which meet all of the following criteria:

- (a) The objective of the Company's business model is achieved both by collecting contractual cash flows and selling financial assets; and
- (b) The assets' contractual cash flows represent solely payments of principal and interest.

B. On a regular way purchase or sale basis, financial assets at fair value through other comprehensive income are recognised and derecognised using trade date accounting.

C. At initial recognition, the Company measures the financial assets at fair value plus transaction costs. The Company subsequently measures the financial assets at fair value:

- (a) The changes in fair value of equity investments that were recognised in other comprehensive income are reclassified to retained earnings and are not reclassified to profit or loss following the derecognition of the investment. Dividends are recognised as revenue when the right to receive payment is established, future economic benefits associated with the dividend will flow to the Company and the amount of the dividend can be measured reliably.
- (b) Except for the recognition of impairment loss, interest income and gain or loss on foreign exchange which are recognised in profit or loss, the changes in fair value of debt instruments are taken through other comprehensive income. When the financial asset is derecognised, the cumulative gain or loss previously recognised in other comprehensive income is reclassified from equity to profit or loss.

(7) Accounts and notes receivable

A. Accounts and notes receivable entitle the Company a legal right to receive consideration in exchange for transferred goods or rendered services.

B. The short-term accounts and notes receivable without bearing interest are subsequently measured at initial invoice amount as the effect of discounting is immaterial.

(8) Impairment of financial assets

For debt instruments measured at fair value through other comprehensive income and financial assets at amortised cost, at each reporting date, the Company recognises the impairment provision for 12 months expected credit losses if there has not been a significant increase in credit risk since initial recognition or recognises the impairment provision for the lifetime expected credit losses (ECLs) if such credit risk has increased since initial recognition after taking into consideration all reasonable and verifiable information that includes forecasts. On the other hand, for accounts receivable or contract assets that do not contain a significant financing component, the Company recognises the impairment provision for lifetime ECLs.

(9) Derecognition of financial assets

The Company derecognises a financial asset when the contractual rights to receive the cash flows from the financial asset expire.

(10) Inventories

Inventories are stated at the lower of cost and net realisable value. Cost is determined using the weighted-average method. The cost of finished goods and work in process comprises raw materials, direct labour, other direct costs and related production overheads (allocated fixed production overheads based on normal capacity). It excludes borrowing costs. The item by item approach is used in applying the lower of cost and net realisable value. Net realisable value is the estimated selling price in the ordinary course of business, less the estimated cost of completion and applicable variable selling expenses.

(11) Investments accounted for using the equity method - subsidiaries

- A. Subsidiaries are all entities (including structured entities) controlled by the Company. The Company controls an entity when the Company is exposed, or has rights, to variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity.
- B. Unrealised profit (loss) from the transactions between the Company and subsidiaries have been offset. The accounting policies of the subsidiaries have been adjusted to be consistent with the Company's accounting policies.
- C. The Company's share of its subsidiaries' post-acquisition profits or losses is recognised in profit or loss, and its share of post-acquisition movements in other comprehensive income is recognised in other comprehensive income. When the Company's share of losses in a subsidiary equals or exceeds its interest in the subsidiary, the Company continues to recognise losses proportionate to its ownership.
- D. If changes in the Company's shares in subsidiaries do not result in loss in control (transactions with non-controlling interest), transactions shall be considered as equity transactions, which are transactions between owners. Difference of adjustment of non-controlling interest and fair value of consideration paid or received is recognised in equity.
- E. When the Company loses control of a subsidiary, the Company remeasures any investment

retained in the former subsidiary at its fair value. That fair value is regarded as the fair value on initial recognition of a financial asset or the cost on initial recognition of the associate or joint venture. Any difference between fair value and carrying amount is recognised in profit or loss. All amounts previously recognised in other comprehensive income in relation to the subsidiary are reclassified to profit or loss on the same basis as would be required if the related assets or liabilities were disposed of. That is, when the Company loses control of a subsidiary, all gains or losses previously recognised in other comprehensive income in relation to the subsidiary should be reclassified from equity to profit or loss, if such gains or losses would be reclassified to profit or loss when the related assets or liabilities are disposed of.

- F. Pursuant to the Regulations Governing the Preparation of Financial Reports by Securities Issuers, profit (loss) of the current period and other comprehensive income in the parent company only financial statements shall be equal to the amount attributable to owners of the parent in the parent company only financial statements. Owners' equity in the parent company only financial statements shall be equal to equity attributable to owners of the parent in the parent company only financial statements.

(12) Property, plant and equipment

- A. Property, plant and equipment are initially recorded at cost. Borrowing costs incurred during the construction period are capitalised.
- B. Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably. The carrying amount of the replaced part is derecognised. All other repairs and maintenance are charged to profit or loss during the financial period in which they are incurred.
- C. Land is not depreciated. Other property, plant and equipment apply cost model and are depreciated using the straight-line method to allocate their cost over their estimated useful lives. Each part of an item of property, plant, and equipment with a cost that is significant in relation to the total cost of the item must be depreciated separately.
- D. The assets' residual values, useful lives and depreciation methods are reviewed, and adjusted if appropriate, at each balance sheet date. If expectations for the assets' residual values and useful lives differ from previous estimates or the patterns of consumption of the assets' future economic benefits embodied in the assets have changed significantly, any change is accounted for as a change in estimate under IAS 8, 'Accounting Policies, Changes in Accounting Estimates and Errors', from the date of the change. The estimated useful lives of property, plant and equipment are as follows:

Buildings and structures	10~35 years
Machinery and equipment	5~10 years
Transportation equipment	5 years
Office equipment	5 years
Leasehold improvements	10 years

(13) Leasing arrangements (lessee) – right-of-use assets/ lease liabilities

A. Leases are recognised as a right-of-use asset and a corresponding lease liability at the date at which the leased asset is available for use by the Company. For short-term leases or leases of low-value assets, lease payments are recognised as an expense on a straight-line basis over the lease term.

B. Lease liabilities include the net present value of the remaining lease payments at the commencement date, discounted using the incremental borrowing interest rate. Lease payments are mainly fixed payments, less any lease incentives receivable.

The Company subsequently measures the lease liability at amortised cost using the interest method and recognises interest expense over the lease term. The lease liability is remeasured and the amount of remeasurement is recognised as an adjustment to the right-of-use asset when there are changes in the lease term or lease payments and such changes do not arise from contract modifications.

C. At the commencement date, the right-of-use asset is stated at cost and the cost is mainly the amount of the initial measurement of lease liability.

The right-of-use asset is measured subsequently using the cost model and is depreciated from the commencement date to the earlier of the end of the asset's useful life or the end of the lease term. When the lease liability is remeasured, the amount of remeasurement is recognised as an adjustment to the right-of-use asset.

(14) Intangible assets

A. Trademark right and patent rights

Trademark right and patent rights are stated at cost, have a finite useful life and are amortised on a straight-line basis over its estimated useful life of 5 years.

B. Computer software

Computer software is stated at cost and amortised on a straight-line basis over its estimated useful life of 3~5 years.

C. Goodwill

Goodwill arises in a business combination accounted for by applying the acquisition method.

(15) Impairment of non-financial assets

A. The Company assesses at each balance sheet date the recoverable amounts of those assets where there is an indication that they are impaired. An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs to sell or value in use. Except for goodwill, when the circumstances or reasons for recognising impairment loss for an asset in prior years no longer exist or diminish, the impairment is reversed. The increased carrying amount due to reversal should not be more than what the depreciated or amortised historical cost would have been if the impairment had not been recognised.

B. The recoverable amounts of goodwill shall be evaluated periodically. An impairment loss is

recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. Impairment loss of goodwill previously recognised in profit or loss shall not be reversed in the following years.

- C. For the purpose of impairment testing, goodwill acquired in a business combination is allocated to each of the cash-generating units, or groups of cash-generating units, that is/are expected to benefit from the synergies of the business combination. Each unit or group of units to which the goodwill is allocated represents the lowest level within the entity at which the goodwill is monitored for internal management purposes. Goodwill is monitored at the operating segment level.

(16) Borrowings

Borrowings comprise short-term bank borrowings. Borrowings are recognised initially at fair value, net of transaction costs incurred. Borrowings are subsequently stated at amortised cost; any difference between the proceeds (net of transaction costs) and the redemption value is recognised in profit or loss over the period of the borrowings using the effective interest method.

(17) Notes and accounts payable

A. Accounts payable are liabilities for purchases of raw materials, goods or services and notes payable are those resulting from operating and non-operating activities.

B. The short-term notes and accounts payable without bearing interest are subsequently measured at initial invoice amount as the effect of discounting is immaterial.

(18) Derecognition of financial liabilities

A financial liability is derecognised when the obligation under the liability specified in the contract is discharged or cancelled or expires.

(19) Provisions

Provisions (primarily warranties) are recognised when the Company has a present legal or constructive obligation as a result of past events, and it is probable that an outflow of economic resources will be required to settle the obligation and the amount of the obligation can be reliably estimated.

Provisions are measured at the present value of the expenditures expected to be required to settle the obligation on the balance sheet date, which is discounted using a pre-tax discount rate that reflects the current market assessments of the time value of money and the risks specific to the obligation. When discounting is used, the increase in the provision due to passage of time is recognised as interest expense. Provisions are not recognised for future operating losses.

(20) Employee benefits

A. Short-term employee benefits

Short-term employee benefits are measured at the undiscounted amount of the benefits expected to be paid in respect of service rendered by employees in a period and should be recognised as expense in that period when the employees render service.

B. Pensions

(a) Defined contribution plans

For defined contribution plans, the contributions are recognised as pension expense when they are due on an accrual basis. Prepaid contributions are recognised as an asset to the extent of a cash refund or a reduction in the future payments.

(b) Defined benefit plans

- i. Net obligation under a defined benefit plan is defined as the present value of an amount of pension benefits that employees will receive on retirement for their services with the Group in current period or prior periods. The liability recognised in the balance sheet in respect of defined benefit pension plans is the present value of the defined benefit obligation at the balance sheet date less the fair value of plan assets, together with adjustments for unrecognised past service costs. The net defined benefit obligation is calculated annually by independent actuaries using the projected unit credit method. The rate used to discount is determined by using interest rates of government bonds (at the balance sheet date) of a currency and term consistent with the currency and term of the employment benefit obligations.
- ii. Remeasurement arising on defined benefit plans are recognised in other comprehensive income in the period in which they arise and are recorded as retained earnings.
- iii. Past service costs are recognised immediately in profit or loss.

C. Termination benefits

Termination benefits are employee benefits provided in exchange for the termination of employment as a result from the Company's decision to terminate an employee's employment before the normal retirement date, or an employee's decision to accept an offer of redundancy benefits in exchange for the termination of employment. The Company recognises termination benefits when it is demonstrably committed to a termination, when it has a detailed formal plan to terminate the employment of current employees and when it can no longer withdraw the plan. In the case of an offer made by the Company to encourage voluntary termination of employment, the termination benefits are recognised as expenses only when it is probable that the employees are expected to accept the offer and the number of the employees taking the offer can be reliably estimated. Benefits falling due more than 12 months after balance sheet date are discounted to their present value.

D. Employees', directors' and supervisors' remuneration

Employees', directors' and supervisors' remuneration are recognised as expense and liability, provided that such recognition is required under legal or constructive obligation and those amounts can be reliably estimated. Any difference between the resolved amounts and the subsequently actual distributed amounts is accounted for as changes in estimates. If employee compensation is distributed by shares, the Company calculates the number of shares based on the closing price at the previous day of the board meeting resolution.

(21) Income tax

- A. The tax expense for the period comprises current and deferred tax. Tax is recognised in profit or loss, except to the extent that it relates to items recognised in other comprehensive income or items recognised directly in equity, in which cases the tax is recognised in other comprehensive income or equity.
- B. The current income tax charge is calculated on the basis of the tax laws enacted or substantively enacted at the balance sheet date in the countries where the Company and its subsidiaries operate and generate taxable income. Management periodically evaluates positions taken in tax returns with respect to situations in accordance with applicable tax regulations. It establishes provisions where appropriate based on the amounts expected to be paid to the tax authorities. An additional 10% tax is levied on the unappropriated retained earnings and is recorded as income tax expense in the year the stockholders resolve to retain the earnings.
- C. Deferred income tax is recognised, using the balance sheet liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the parent company only financial statements. However, the deferred income tax is not accounted for if it arises from initial recognition of goodwill or of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting nor taxable profit or loss. Deferred income tax is provided on temporary differences arising on investments in subsidiaries, except where the timing of the reversal of the temporary difference is controlled by the Company and it is probable that the temporary difference will not reverse in the foreseeable future. Deferred income tax is determined using tax rates (and laws) that have been enacted or substantially enacted by the balance sheet date and are expected to apply when the related deferred income tax asset is realised or the deferred income tax liability is settled.
- D. Deferred income tax assets are recognised only to the extent that it is probable that future taxable profit will be available against which the temporary differences can be utilised. At each balance sheet date, unrecognised and recognised deferred income tax assets are reassessed.
- E. Current income tax assets and liabilities are offset and the net amount reported in the balance sheet when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis or realise the asset and settle the liability simultaneously. Deferred income tax assets and liabilities are offset on the balance sheet when the entity has the legally enforceable right to offset current tax assets against current tax liabilities and they are levied by the same taxation authority on either the same entity or different entities that intend to settle on a net basis or realise the asset and settle the liability simultaneously.

(22) Share capital

Ordinary shares are classified as equity. Incremental costs directly attributable to the issue of new shares or stock options are shown in equity as a deduction, net of tax, from the proceeds.

(23) Dividends

Dividends are recorded in the Company's financial statements in the period in which they are approved by the Company's shareholders. Cash dividends are recorded as liabilities; stock

dividends are recorded as stock dividends to be distributed and are reclassified to ordinary shares on the effective date of new shares issuance.

(24) Revenue recognition

A. Sales revenue

- (a) The Company manufactures and sells uninterrupted power supply equipment and system, improved power quality system and equipment and solar energy equipment and other related products. Sales are recognised when control of the products has transferred, being when the products are delivered to the wholesaler, the wholesaler has full discretion over the channel and price to sell the products, and there is no unfulfilled obligation that could affect the wholesaler's acceptance of the products. Delivery occurs when the products have been shipped to the specific location, the risks of obsolescence and loss have been transferred to the wholesaler, and either the wholesaler has accepted the products in accordance with the sales contract, or the Company has objective evidence that all criteria for acceptance have been satisfied.
- (b) The Company's obligation to provide a repair for faulty products under the standard warranty terms is recognised as a provision.
- (c) A receivable is recognised when the goods are delivered as this is the point in time that the consideration is unconditional because only the passage of time is required before the payment is due.

B. Sale of goods—Project construction

- (a) The Company provides sales services related to uninterruptible power system and equipment, improved power quality system and equipment and solar energy system and equipment. The project construction revenue includes equipment sales and installation services, and the contract involves and provides integrated services. Therefore, the equipment and installation are indistinguishable and are regarded as a single performance obligation. The Company installs equipment, the customer performs the acceptance procedure, and the Company opens the warranty book. The customer obtains the control of the equipment and the benefits arising therefrom. When all the acceptance criteria are met, the Company completes the contractual performance obligated of contract to recognize revenue.
- (b) The Company's obligation to provide a repair for project construction under the standard warranty terms is recognised as a provision.
- (c) A receivable is recognized when the project construction is completed and the warranty book is delivered to the customer. As this is the point in time that the consideration is unconditional because only the passage of time is required before the payment is due.

C. Service revenue

The Company provides related services of maintaining uninterruptible power supply equipment, improved power quality system and equipment and solar energy system and equipment. Service

revenue is recognized as income during the financial reporting period in which the services are provided to customers. Revenue from fixed price contracts is recognised as a percentage of the number of months of service actually provided on the balance sheet date. The customer pays the contract price in accordance with the payment schedule agreed upon, and is recognized as a contract assets when the services provided by the Company exceed the customers' payables, and are recognized as contract liabilities if the customer pays more than the services provided by the Company.

D. Costs of obtaining a customer contract

Given that the contractual period lasts less than one year, the Company recognises the incremental costs of obtaining a contract as an expense when incurred although the Company expects to recover those costs.

5. Critical Accounting Judgements, Estimates and Key Sources of Assumption Uncertainty

The preparation of these parent company only financial statements requires management to make critical judgements in applying the Company's accounting policies and make critical assumptions and estimates concerning future events. Assumptions and estimates may differ from the actual results and are continually evaluated and adjusted based on historical experience and other factors. Such assumptions and estimates have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year; and the related information is addressed below:

(1) Critical judgements in applying the Company's accounting policies

None.

(2) Critical accounting estimates and assumptions

A. Evaluation of inventories

Evaluation of inventories are stated at the lower of cost and net realisable value, the Company must determine the net realisable value of inventories on balance sheet date using judgements and estimates. Due to the rapid technology innovation, the Company evaluates the amounts of normal inventory consumption, obsolete inventories or inventories without market selling value on balance sheet date, and writes down the cost of inventories to the net realisable value. Such an evaluation of inventories is principally based on the demand for the products within the specified period in the future. Therefore, there might be material changes to the evaluation.

As of December 31, 2020, the Company's carrying amount of inventories was \$730,751.

B. Estimation of provisions for liabilities

The sale of goods requires consideration of the cost incurred or to be incurred in connection with the transaction. Therefore, the Company formulates the proposed policy for the determination of the warranty for the sale of the product, which is used to measure the actual operating profit and loss of the company. The Company's liability determination is based on the Company's policy based on the historical warranty data of the product as the basis for the assessment, and the related product warranty liabilities are estimated to estimate the future maintenance costs.

As of December 31, 2020, the Company estimated the liability provision to be \$47,720.

6. Details of Significant Accounts

(1) Cash and cash equivalents

	<u>December 31, 2020</u>	<u>December 31, 2019</u>
Cash on hand and revolving funds	\$ 395	\$ 399
Checking accounts and demand deposits	124,332	118,982
Time deposits	<u>194</u>	<u>194</u>
	124,921	119,575
Transferred to 'Other current assets'	(194)	(194)
	<u>\$ 124,727</u>	<u>\$ 119,381</u>

A. The Company transacts with a variety of financial institutions all with high credit quality to disperse credit risk, so it expects that the probability of counterparty default is remote.

B. For details on cash and cash equivalents provided as a pledge or collateral, please refer to Note 8.

(2) Financial assets at fair value through other comprehensive income

<u>Items</u>	<u>December 31, 2020</u>	<u>December 31, 2019</u>
Non-current items:		
Equity instruments		
Unlisted stocks	<u>\$ 81,000</u>	<u>\$ 81,000</u>

A. The Company has elected to classify equity instruments that are considered to be strategic investments as financial assets at fair value through other comprehensive income. The fair value of such investments all amounted to \$81,000, as at December 31, 2020 and 2019, respectively.

B. Amounts recognised in profit or loss and other comprehensive income in relation to the financial assets at fair value through other comprehensive income are \$162 and \$0 for the years ended December 31, 2020 and 2019, respectively.

C. As at December 31, 2020 and 2019, without taking into account any collateral held or other credit enhancements, the maximum exposure to credit risk in respect of the amount that best represents the financial assets at fair value through other comprehensive income held by the Company was all \$81,000.

D. Information relating to price risk of financial assets at fair value through other comprehensive income is provided in Note 12(2)(3).

(3) Notes and accounts receivable

	<u>December 31, 2020</u>	<u>December 31, 2019</u>
Notes receivable	\$ 13,999	\$ 31,496
Accounts receivable	\$ 319,810	\$ 384,810
Less: Allowance for bad debts — accounts receivable	(4,269)	(9,738)
	<u>\$ 315,541</u>	<u>\$ 375,072</u>

A. The ageing analysis of accounts receivable and notes receivable is as follows:

	<u>December 31, 2020</u>		<u>December 31, 2019</u>	
	Accounts receivable	Notes receivable	Accounts receivable	Notes receivable
Within 120 days	\$ 305,678	\$ 13,999	\$ 348,406	\$ 30,621
121 to 180 days	9,460	-	13,700	-
181 to 360 days	4,039	-	17,118	-
Over 361 days	633	-	5,586	875
	<u>\$ 319,810</u>	<u>\$ 13,999</u>	<u>\$ 384,810</u>	<u>\$ 31,496</u>

The above ageing analysis was based on invoice date.

- B. As at December 31, 2020 and 2019, accounts receivable and notes receivable were all from contracts with customers. And as of January 1, 2019, the balance of receivables from contracts with customers amounted to \$413,533.
- C. As at December 31, 2020 and 2019, without taking into account any collateral held or other credit enhancements, the maximum exposure to credit risk in respect of the amount that best represents the Company's notes and accounts receivable was \$13,999 and \$31,496; \$315,541 and \$375,072, respectively.
- D. The Company does not hold any collateral as security.
- E. Information relating to credit risk of accounts receivable and notes receivable is provided in Note 12(2).

(4) Inventories

	December 31, 2020		
	Cost	Allowance for valuation loss	Book value
Raw materials	\$ 92,156	(\$ 32,426)	\$ 59,730
Work in process	27,913	(1,618)	26,295
Semi-finished goods	113,509	(30,402)	83,107
Finished goods	81,646	(6,163)	75,483
Goods	76,426	(12,482)	63,944
Goods in transit	35,181	-	35,181
Unfinished constructions	387,011	-	387,011
	<u>\$ 813,842</u>	<u>(\$ 83,091)</u>	<u>\$ 730,751</u>

	December 31, 2019		
	Cost	Allowance for valuation loss	Book value
Raw materials	\$ 90,589	(\$ 35,501)	\$ 55,088
Work in process	19,615	(2,519)	17,096
Semi-finished goods	129,067	(30,869)	98,198
Finished goods	53,140	(6,412)	46,728
Goods	38,051	(8,020)	30,031
Goods in transit	58,638	-	58,638
Unfinished constructions	319,622	-	319,622
	<u>\$ 708,722</u>	<u>(\$ 83,321)</u>	<u>\$ 625,401</u>

The cost of inventories recognised as expense for the year:

	2020	2019
Cost of goods sold	\$ 1,625,545	\$ 1,716,296
Maintenance cost	43,328	33,248
(Gain on reversal of) loss on decline in market value	(230)	4,033
Others	13,858	25,829
	<u>\$ 1,682,501</u>	<u>\$ 1,779,406</u>

For the year ended December 31, 2020, the Company reversed a previous inventory write-down because the inventories were subsequently disposed or sold.

(5) Investments accounted for using equity method

	<u>December 31, 2020</u>	<u>December 31, 2019</u>
Ablerex Electronics (Samoa) Co., Ltd.	\$ 473,807	\$ 469,926
Joint Rewards Trading Corp.	-	30
Ablerex Corporation	48,190	43,566
Ablerex International Co., Ltd.	29,418	30,116
Ablerex Electronics (S) Pte. Ltd.	92,782	88,776
Wada Denki Co., Ltd.	9,961	2,922
Ablerex Electronics U.K.Ltd.	12,676	5,148
	<u>\$ 666,834</u>	<u>\$ 640,484</u>

Please refer to Note 4(3) in the consolidated financial statements for the year ended December 31, 2019 for the information regarding the Company's subsidiaries.

(6) Property, plant and equipment

A. The abovementioned equipment are all assets for its own use.

B. The significant components of buildings include buildings, air conditioners, elevators and utility construction. Buildings are depreciated over 26 to 35 years, and others are depreciated over 10 years.

C. There were no borrowing costs capitalised as part of property, plant and equipment.

(7) Leasing arrangements – lessee

A. The Company leases various assets including buildings (including land), transportation equipment and office equipment. Rental contracts are typically made for periods of 1 to 5 years. Lease terms are negotiated on an individual basis and contain a wide range of different terms and conditions. The lease agreements do not impose covenants, but leased assets may not be used as security for borrowing purposes.

B. Short-term leases with a lease term of 12 months or less comprise parking spaces. Low-value assets comprise office equipment. On December 31, 2020 and 2019, payments of lease commitments for short-term leases amounted to \$492 and \$180, respectively.

C. The carrying amount of right-of-use assets and the depreciation charge are as follows:

	<u>December 31, 2020</u>	<u>December 31, 2019</u>
	<u>Carrying amount</u>	<u>Carrying amount</u>
Buildings (including land)	\$ 2,129	\$ 7,240
Transportation equipment	271	812
Office equipment	313	571
	<u>\$ 2,713</u>	<u>\$ 8,623</u>
	<u>2020</u>	<u>2019</u>
	<u>Depreciation charge</u>	<u>Depreciation charge</u>
Buildings (including land)	\$ 5,692	\$ 5,718
Transportation equipment	541	691
Office equipment	257	269
	<u>\$ 6,490</u>	<u>\$ 6,678</u>

D. For the years ended December 31, 2020 and 2019, the additions to right-of-use assets were \$698 and \$689, respectively.

E. The information on profit and loss accounts relating to lease contracts is as follows:

	<u>2020</u>	<u>2019</u>
<u>Items affecting profit or loss</u>		
Interest expense on lease liabilities	\$ 97	\$ 188
Expense on short-term lease contracts	492	180
Expense on leases of low-value assets	217	132

F. For the years ended December 31, 2020 and 2019, the Company's total cash outflow for leases were \$7,272 and \$7,113, respectively.

(8) Other non-current assets

	<u>December 31, 2020</u>	<u>December 31, 2019</u>
Overdue receivable	\$ 33,884	\$ 28,415
Allowance for bad debts	(33,884)	(28,415)
– overdue receivable		
Prepayments for equipment	2,880	1,724
Guarantee deposits	10,491	9,975
Deferred expenses	6,562	9,709
	<u>\$ 19,933</u>	<u>\$ 21,408</u>

(9) Short-term borrowings

<u>Type of borrowings</u>	<u>December 31, 2020</u>	<u>Interest rate range</u>	<u>Collateral</u>
Bank borrowings			
Unsecured borrowings	\$ <u>362,000</u>	0.95% ~ 1.01%	None

<u>Type of borrowings</u>	<u>December 31, 2019</u>	<u>Interest rate range</u>	<u>Collateral</u>
Bank borrowings			
Unsecured borrowings	\$ <u>384,767</u>	0.97% ~ 1.00%	None

For collaterals on bank borrowings and book value information, please refer to Note 7.

(10) Other payables

	<u>December 31, 2020</u>	<u>December 31, 2019</u>
Year-end bonus payable	\$ 34,742	\$ 33,614
Wages and salaries payable	16,507	16,269
Employees' compensation and directors' remuneration payables	6,327	8,319
Payable for other short-term employee benefits	5,971	7,408
Others	<u>31,827</u>	<u>30,432</u>
	<u>\$ 95,374</u>	<u>\$ 96,042</u>

(11) Provisions for liabilities -current

	<u>2020</u>	<u>2019</u>
Warranty:		
At January 1	\$ 40,441	\$ 31,959
Additional provisions	13,858	24,508
Used during the period	(<u>6,579</u>)	(<u>16,026</u>)
At December 31	<u>\$ 47,720</u>	<u>\$ 40,441</u>

The Company's provisions for warranties are primarily for uninterruptible power supplies and solar energy related products. The provisions for warranties are estimated based on historical warranty data of uninterruptible power supplies and solar energy related products.

(12) Pensions

A. (a) The Company has a defined benefit pension plan in accordance with the Labor Standards Law, covering all regular employees' service years prior to the enforcement of the Labor Pension Act on July 1, 2005 and service years thereafter of employees who chose to continue to be subject to the pension mechanism under the Law. Under the defined benefit pension plan, two units are accrued for each year of service for the first 15 years and one unit for each additional year thereafter, subject to a maximum of 45 units. Pension benefits are based on the number of units accrued and the average monthly salaries and wages of the last 6 months prior to retirement. The Company and its domestic subsidiaries contribute monthly an amount equal to 2% of the employees' monthly salaries and wages to the

retirement fund deposited with Bank of Taiwan, the trustee, under the name of the independent retirement fund committee. Also, the Company and its domestic subsidiaries would assess the balance in the aforementioned labor pension reserve account by December 31, every year. If the account balance is insufficient to pay the pension calculated by the aforementioned method of the employees expected to qualify for retirement in the following year, the Company will make contributions to cover the deficit by next March.

(b) The amounts recognised in the balance sheet are as follows:

	<u>December 31, 2020</u>	<u>December 31, 2019</u>
Present value of funded defined benefit obligations	(\$ 57,019)	(\$ 56,160)
Fair value of plan assets	<u>34,444</u>	<u>32,746</u>
Net defined benefit liability	<u>(\$ 22,575)</u>	<u>(\$ 23,414)</u>

(c) Movements in net defined benefit liabilities are as follows:

	<u>2020</u>		
	<u>Present value of defined benefit obligations</u>	<u>Fair value of plan assets</u>	<u>Net defined benefit liability</u>
At January 1	(\$ 56,160)	\$ 32,746	(\$ 23,414)

(d) The Bank of Taiwan was commissioned to manage the Fund of the Company's defined benefit pension plan in accordance with the Fund's annual investment and utilisation plan and the "Regulations for Revenues, Expenditures, Safeguard and Utilisation of the Labor Retirement Fund" (Article 6: The scope of utilisation for the Fund includes deposit in domestic or foreign financial institutions, investment in domestic or foreign listed, over-the-counter, or private placement equity securities, investment in domestic or foreign real estate securitization products, etc.). With regard to the utilisation of the Fund, its minimum earnings in the annual distributions on the final financial statements shall be no less than the earnings attainable from the amounts accrued from two-year time deposits with the interest rates offered by local banks. If the earnings is less than aforementioned rates, government shall make payment for the deficit after being authorized by the Regulator. The Company and its domestic subsidiaries have no right to participate in managing and operating that fund and hence the Company and its domestic subsidiaries are unable to disclose the classification of plan assets fair value in accordance with IAS 19 paragraph 142. The composition of fair value of plan assets as of December 31, 2020 and 2019 is given in the Annual Labor Retirement Fund Utilisation Report announced by the government.

(e) The principal actuarial assumptions used were as follows:

	2020	2019
Discount rate	0.30%	0.75%
Future salary increases	2.00%	2.00%

Assumptions regarding future mortality experience are set based on the fifth Taiwan Standard Ordinary Experience Mortality Table (2012 TSO).

Because the main actuarial assumption changed, the present value of defined benefit obligation is affected. The analysis is as follows:

	<u>Discount rate</u>		<u>Future salary increases</u>	
	<u>Increase 0.25%</u>	<u>Decrease 0.25%</u>	<u>Increase 0.25%</u>	<u>Decrease 0.25%</u>
December 31, 2020				
Effect on present value of defined benefit	<u>(\$ 1,529)</u>	<u>\$ 1,590</u>	<u>\$ 1,559</u>	<u>(\$ 1,507)</u>
December 31, 2019				
Effect on present value of defined benefit	<u>(\$ 1,566)</u>	<u>\$ 1,630</u>	<u>\$ 1,606</u>	<u>(\$ 1,551)</u>

The sensitivity analysis above is based on one assumption which changed while the other conditions that remain unchanged. In practice, more than one assumption may change all at once. The method of analysing sensitivity and the method of calculating net pension liability in the balance sheet are the same. The methods and types of assumptions used in preparing the sensitivity analysis did not change compared to the previous period.

- (f) Expected contributions to the defined benefit pension plans of the Company for the year ending December 31, 2021 amount to \$928.
- (g) As of December 31, 2020, the weighted average duration of the retirement plan is 10 years. The analysis of timing of the future pension payment was as follows:

Within 1 year	\$	2,034
1-2 year(s)		1,652
3-5 years		4,743
Over 5 years		50,208
	<u>\$</u>	<u>58,637</u>

- B. (a) Effective July 1, 2005, the Company has established a defined contribution pension plan (the “New Plan”) under the Labour Pension Act (the “Act”), covering all regular employees with R.O.C. nationality. Under the New Plan, the Company contributes monthly an amount based on 6% of the employees’ monthly salaries and wages to the employees’ individual pension accounts at the Bureau of Labour Insurance. The benefits accrued are paid monthly or in lump sum upon termination of employment.
- (b) The pension costs under the defined contribution pension plans of the Company for the years ended December 31, 2020 and 2019 were \$11,265 and \$10,549, respectively.

(13) Share capital

As of December 31, 2020, the Company’s authorised capital was \$800,000, consisting of 80 million shares of ordinary stock, and the paid-in capital was \$450,000 with a par value of \$10 (in dollars) per share. All proceeds from shares issued have been collected. The Company’s ordinary shares at the beginning of the period are the same with the outstanding shares at the end of the period.

(14) Capital surplus

- A. Pursuant to the R.O.C. Company Act, capital surplus arising from paid-in capital in excess of par value on issuance of common stocks and donations can be used to cover accumulated deficit or to issue new stocks or cash to shareholders in proportion to their share ownership, provided that the Company has no accumulated deficit. Further, the R.O.C. Securities and Exchange Law requires that the amount of capital surplus to be capitalized mentioned above should not exceed 10% of the paid-in capital each year. However, capital surplus should not be used to cover accumulated deficit unless the legal reserve is insufficient.
- B. The shareholders resolved to appropriate capital surplus in cash at their meeting on June 19, 2020:

	<u>Year ended December 31, 2019</u>	
	<u>Amount</u>	<u>Cash per share (in dollars)</u>
Capital surplus appropriated in cash	<u>\$ 13,500</u>	<u>\$ 0.30</u>

The cash appropriation of capital surplus is in agreement with the proposal submitted by the Board of Directors.

(15) Retained earnings

- A. Under the Company's Articles of Incorporation, the current year's earnings, if any, shall first be used to pay all taxes and offset prior years' operating losses and then 10% of the remaining amount shall be set aside as legal reserve unless the accumulated legal reserve has reached the total capital stock balance. Special reserve shall be appropriated in accordance with related regulations promulgated by competent authorities, and the special reserve along with the accumulated unappropriated retained earnings from previous years is considered as the distributable earnings. The remainder, if any, after considering the operating status, and through a proposition by the Board of Directors and a resolution by the shareholders, shall be retained.
- B. The Company's dividend policy is based on the Company's current operation status, future capital requirements, long-term operation plan, shareholders' benefits, balanced dividends and the Company's long-term financial plan, etc. The appropriation is proposed by the Board of Directors and then approved by the shareholders during their meeting. Cash dividends shall not be less than 20% of the total dividends distributed to shareholders.
- C. Except for covering accumulated deficit or issuing new stocks or cash to shareholders in proportion to their share ownership, the legal reserve shall not be used for any other purpose. The use of legal reserve for the issuance of stocks or cash to shareholders in proportion to their share ownership is permitted, provided that the distribution of the reserve is limited to the portion in excess of 25% of the Company's paid-in capital.
- D. In accordance with the regulations, the Company shall set aside special reserve from the debit balance on other equity items at the balance sheet date before distributing earnings. When the debit balance on other equity items is reversed subsequently, the reversed amount may be

included in the distributable earnings.

- E. The appropriation of 2019 earnings as proposed by the shareholders on June 19, 2020 and the appropriation of 2018 earnings as resolved by the shareholders on June 18, 2019 are as follows:

	Year ended December 31, 2019		Year ended December 31, 2018	
	Amount	Dividend per share	Amount	Dividend per share
		(in dollars)		(in dollars)
Legal reserve	\$ 3,639		\$ 7,316	
Special reserve	17,841		4,907	
Cash dividends	31,500	\$ 0.70	67,500	\$ 1.50

(16) Sales revenue

	2020	2019
Sales revenue	\$ 956,182	\$ 1,099,525
Project construction revenue	979,076	961,371
Service revenue	89,510	74,738
	<u>\$ 2,024,768</u>	<u>\$ 2,135,634</u>

A. Disaggregation of revenue from contracts with customers

The Company derives revenue from the transfer of goods and services over time and at a point in time in the following:

Year ended December 31, 2020	First Business Division	Second Business Division	Technical Services Division	Energy Division	Total
Total segment revenue	\$ 660,612	\$ 888,857	\$ 219,391	\$ 255,908	\$ 2,024,768
Timing of revenue recognition					
At a point in time	\$ 660,612	\$ 888,857	\$ 150,659	\$ 244,595	\$ 1,944,723

B. Contract liabilities

The Company has recognised the following revenue-related contract liabilities:

	<u>December 31, 2020</u>	<u>December 31, 2019</u>	<u>January 1, 2019</u>
Contract liabilities:			
Contract liabilities			
– advance receipts for construction	\$ 195,375	\$ 163,135	\$ 234,440
Contract liabilities			
– advance sales receipts	<u>17,991</u>	<u>6,550</u>	<u>5,910</u>
	<u>\$ 213,366</u>	<u>\$ 169,685</u>	<u>\$ 240,350</u>

(a) Significant changes in contract liabilities

None.

(b) Revenue recognised that was included in the contract liability balance at the beginning of the period

	<u>2020</u>	<u>2019</u>
Revenue recognised that was included in the contract liability balance at the beginning of the period		
Sales revenue	<u>\$ 143,287</u>	<u>\$ 154,388</u>

(17) Interest income

	<u>2020</u>	<u>2019</u>
Interest income from bank deposits	<u>\$ 352</u>	<u>\$ 659</u>

(18) Other income

	<u>2020</u>	<u>2019</u>
Dividend income	\$ 162	\$ -
Other income, others	<u>2,524</u>	<u>4,204</u>
	<u>\$ 2,686</u>	<u>\$ 4,204</u>

(19) Other gains and losses

	<u>2020</u>	<u>2019</u>
Loss on disposal of investments	(\$ 19)	\$ -
Foreign exchange gain	2,843	1,280
Others	-	(325)
	<u>\$ 2,824</u>	<u>\$ 955</u>

(20) Finance costs

	<u>2020</u>	<u>2019</u>
Interest expense	<u>\$ 3,555</u>	<u>\$ 2,845</u>

(21) Expenses by nature

By function By nature	2020			2019		
	Operating costs	Operating expenses	Total	Operating costs	Operating expenses	Total
Employee benefit expense	\$ 73,986	\$ 209,741	\$ 283,727	\$ 70,698	\$ 203,063	\$ 273,761
Depreciation charges	14,113	23,026	37,139	14,036	23,643	37,679
Amortization charges	338	8,359	8,697	145	8,805	8,950

(22) Employee benefit expense

	2020	2019
Wages and salaries	\$ 241,005	\$ 232,792
Labor and health insurance fees	21,630	20,644
Pension costs	10,983	10,841
Directors' remuneration	1,297	874
Other personnel expenses	8,812	8,610
	<u>\$ 283,727</u>	<u>\$ 273,761</u>

A. In accordance with the Articles of Incorporation of the Company, a ratio of distributable profit of the current year, after covering accumulated losses, shall be distributed as employees' compensation and directors' and supervisors' remuneration. The ratio shall be 6% to 10% for employees' compensation and shall not be higher than 2% for directors' and supervisors' remuneration.

B. For the years ended December 31, 2020 and 2019, employees' compensation was accrued at \$3,263 and \$2,717, respectively; while directors' and supervisors' remuneration was accrued at \$1,088 and \$906, respectively. The aforementioned amounts were recognized in salary expenses. The employees' compensation and directors' and supervisors' remuneration were estimated and accrued based on 6% and 2% of distributable profit of current year for the year ended December 31, 2020.

The difference of \$113 between employees' compensation (directors' and supervisors' remuneration) as resolved by the Board of Directors and the amount recognised in the 2019 financial statements of \$2,717, \$906 had been adjusted in profit or loss for 2020. The appropriation was in the form of cash.

Information about the appropriation of employees' compensation (bonus) and directors' and supervisors' remuneration by the Company as proposed by the Board of Directors and resolved will be posted in the "Market Observation Post System" at the website of the Taiwan Stock Exchange.

(23) Income tax

A. Income tax expense

(a) Components of income tax expense:

	<u>2020</u>	<u>2019</u>
Current tax:		
Current tax on profit for the period	\$ 5,027	\$ 8,644
Prior year income tax overestimation	(1,341)	(3,601)
Total current tax	<u>3,686</u>	<u>5,043</u>
Deferred tax:		
Origination and reversal of temporary differences	4,434	(4,300)
Income tax expense	<u>\$ 8,120</u>	<u>\$ 743</u>

(b) The income tax (charge)/credit relating to components of other comprehensive income are as follows:

	<u>2020</u>	<u>2019</u>
Currency translation differences	\$ 43	(\$ 4,460)
Remeasurement of defined benefit obligations	35	(331)
	<u>\$ 78</u>	<u>(\$ 4,791)</u>

B. Reconciliation between income tax expense and accounting profit:

	<u>2020</u>	<u>2019</u>
Tax calculated based on profit before tax and statutory tax rate	\$ 10,007	\$ 8,049
Expenses that should be excluded according to tax laws	(17)	-
Income exempted according to tax law	(32)	-
Effect from tax credit of investment	(497)	(3,705)

Ablerex Latam Corporation (Ablerex-Latam) (Note)	The Company's second-tier company
Ablerex Electronics (Suzhou) Co., Ltd. (Ablerex-SZ)	The Company's third-tier company
Ablerex Electronics (Beijing) Co.,Ltd. (Ablerex-BJ)	The Company's third-tier company
Eco Energy Corporation	Other related party
Directors, supervisors, general manager and vice general manager	The Group's key management

Note: Joint Rewards Trading Corp. (Joint) completed the cancellation of registration on September 28, 2020.

(2) Significant related party transactions and balances

A. Sales revenue

	2020	2019
Subsidiary	\$ 376,413	\$ 374,332
Entities with significant influence to the Group	145	165,930
Other related parties	-	1,001
	<u>\$ 376,558</u>	<u>\$ 541,263</u>

(a) Except for goods sold to a subsidiary, Ablerex-SZ, that were through Ablerex-HK at no price

difference, transaction prices to remaining subsidiaries were based on mutual agreement. The credit term to subsidiaries is 120 days after monthly billings, excluding 90 days after monthly billings to AblereX-SZ, and the credit terms to customers are 60 to 120 days after monthly billings.

- (b) The transaction prices and terms of the Company to United Integrated Services Co., Ltd. and other related parties are in accordance with the agreed contracts.

B. Purchases

	<u>2020</u>	<u>2019</u>
AblereX-HK	\$ 639,304	\$ 905,611
AblereX-SZ	247,229	216,104
Subsidiary	-	28
	<u>\$ 886,533</u>	<u>\$ 1,121,743</u>

- (a) The Company acquired midget uninterruptible power equipment from AblereX-SZ through AblereX-HK. AblereX-HK acquired the equipment from AblereX-SZ based on the agreed price and then resold to the Company at the same price. The payment term is 60 days after monthly billings. The payment terms to non-related parties are 90 to 150 days after monthly billings.

- (b) In addition, the Company directly acquired midget uninterruptible power equipment from AblereX-SZ based on the agreed price, and the payment term is 60 days after monthly billings.

C. Leasing arrangements - lessee

- (a) The Company leased office and plant from United Integrated Services Co., Ltd. Rental contracts are typically made for periods from 2019 to 2020. Rents are paid at the end of each month.

- (b) Acquisition of right-of-use assets - On January 1, 2019 (the date of initial application of IFRS 16), the Company increased right-of-use assets by \$10,340.

(c) Lease liabilities

	<u>\$ 45,290</u>	<u>\$ 30,733</u>

Information on purchases on behalf of Ablerex-HK and Ablerex-SZ and capital requirements of Ablerex-Latam is provided in Notes 7(2) G and 13(1)A, respectively.

F. Payables to related parties

	<u>December 31, 2020</u>	<u>December 31, 2019</u>
Ablerex-HK	\$ 159,956	\$ 117,307
Ablerex-SZ	<u>41,114</u>	<u>82,935</u>
	<u>\$ 201,070</u>	<u>\$ 200,242</u>

G Material and equipment purchased on behalf of others

- (a) The Company purchased the critical raw materials on behalf of Ablerex-SZ through Ablerex-HK's transshipment. The Company resold these critical raw materials to Ablerex-HK under a transaction price calculated based on purchasing costs plus agreed-upon processing fee, and then Ablerex-HK resold the material to Ablerex-SZ at the same price. No sales revenue and cost arising from this transaction were recognised.
- (b) The Company directly purchased the critical raw materials on behalf of Ablerex-SZ, and the transaction price was calculated based on purchasing costs plus agreed-upon processing fee. No sales revenue and cost arising from this transaction were recognised.
- (c) Details of processing revenue (shown as miscellaneous income) derived from purchasing materials and equipment on behalf of Ablerex-SZ as abovementioned are as follows:

	<u>December 31, 2020</u>	<u>December 31, 2019</u>
Materials purchased on behalf of		
AblereX-SZ		
AblereX-SZ	\$ 24,356	\$ 16,925
AblereX-HK	-	19,945
	<u>\$ 24,356</u>	<u>\$ 36,870</u>
Miscellaneous income		
AblereX-SZ	\$ 1,537	\$ 1,683
AblereX-HK	-	1,586
	<u>\$ 1,537</u>	<u>\$ 3,269</u>

H. Supervision fee revenue (recognised as deduction in operating expenses-administrative expenses)

- (a) The Company provided management services to AblereX-SZ, and received the management fee revenue based on the agreed consideration through Joint. For the years ended December 31, 2020 and 2019, management fee revenue was recognised amounting to \$0 and \$6,486, respectively, and was recorded as deduction in operating expenses-administrative expenses.
- (b) The Company provided management services to AblereX-USA. For the years ended December 31, 2020 and 2019, management fee revenue was recognised amounting to \$2,134 and \$2,223, respectively, and was recorded as deduction in operating expenses-administrative expenses. The credit term is 90 days after monthly billings. As of December 31, 2020, and 2019, other receivables amounted to \$342 and \$540, respectively.

I. Sales service fee (shown as operating expenses- selling expenses)

AblereX-IT provided business connection and order taking service of certain foreign customers to the Company, and the Company paid an agreed percentage of sales revenue to AblereX-IT as a service fee. For the years ended December 31, 2020 and 2019, the Company recognised sales service fee in the amounts of \$9,109 and \$8,934, respectively, and the credit term is 120 days after monthly billings.

J. Endorsements and guarantees

- (a) As of December 31, 2020 and 2019, unsecured bank borrowings amounted to \$362,000 and \$384,767, respectively. The Company's key management is the joint guarantor.
- (b) As of December 31, 2020 and 2019, the Company provided guarantee for AblereX-HK's bank borrowing credit line amounting to US\$7,500 thousand for both years. As of December 31, 2020 and 2019, the borrowings of AblereX-HK amounted to US\$2,400 thousand and US\$850 thousand. For the year ended December 31, 2020, information on the endorsement and guarantee transaction is provided in Note 13(1) B.

K. Commitments

As of December 31, 2020 and 2019, details of notes issued for providing performance guarantee for sales warranty and leasing contracts are as follows:

	<u>December 31, 2020</u>	<u>December 31, 2019</u>
Entities with significant influence to the Company	\$ <u>11,056</u>	\$ <u>11,532</u>

(3) Key management compensation

	<u>2020</u>	<u>2019</u>
Salaries and other short-term employee benefits	\$ 22,633	\$ 19,375
Termination benefits	705	601
	\$ <u>23,338</u>	\$ <u>19,976</u>

8. Pledged Assets

The Company's assets pledged as collateral are as follows:

<u>Pledged assets</u>	<u>Book value</u>		<u>Purpose</u>
	<u>December 31, 2020</u>	<u>December 31, 2019</u>	
Other current assets — time deposits	\$ 194	\$ 194	Performance guarantee for contracts

9. Significant Contingent Liabilities and Unrecognized Contract Commitments

(1) Contingencies

None.

(2) Commitments

A. As of December 31, 2020 and 2019, other than the details of contingencies and commitments between the Company and related parties as provided in Note 7(2) L, contingencies and commitments between the Company and third parties are as follows:

Capital expenditure contracted for at the balance sheet date but not yet incurred

	<u>December 31, 2020</u>	<u>December 31, 2019</u>
Intangible assets	\$ <u>95</u>	\$ <u>381</u>

Warranty and performance guarantee

As of December 31, 2020 and 2019, promissory notes issued for the warranty and performance guarantee of sales amounted to \$92,039 and \$82,229, respectively.

B. Details of endorsements/guarantees provided by the Company to subsidiaries are provided in Note 13(1) B.

10. Significant Disaster Loss

None.

11. Significant Events after the Balance Sheet Date

- (1) The appropriations of 2020 earnings had been proposed by the Board of Directors on March 19, 2021. Details are summarized below:

	2020	
	Amount	Dividends per share
Legal reserve	\$ 4,204	
Special reserve	(173)	
Cash dividends	4,500	\$ 1.00

As of March 19, 2021, the appropriations of 2020 earnings has not been resolved at the stockholders' meeting.

12. Others

(1) Capital management

The Company's objectives when managing capital are to safeguard the Company's ability to continue as a going concern in order to provide returns for shareholders and to maintain an optimal capital structure with reasonable cost of funds. In order to maintain or adjust the capital structure, the Company may adjust the amount of dividends paid to shareholders, return capital to shareholders, issue new shares or sell assets to reduce debt. The Company monitors capital on the basis of the gearing ratio. This ratio is calculated as total liabilities divided by total assets.

In 2020, the Company's strategy, which was unchanged from 2019, was to maintain the gearing ratio of about 40%. The gearing ratios at December 31, 2020 and 2019 were as follows:

	December 31, 2020	December 31, 2019
Total liabilities	\$ 1,245,938	\$ 1,215,472
Total equity	1,465,903	1,468,689
Total assets	\$ 2,711,841	\$ 2,684,161
Gearing ratio	46%	45%

(2) Financial instruments

A. Financial instruments by category

	December 31, 2020	December 31, 2019
<u>Financial assets</u>		
Financial assets at amortised cost		
Cash and cash equivalents	\$ 124,727	\$ 119,381
Notes receivable	13,999	31,496
Accounts receivable (including related parties)	428,874	508,665
Other receivables (including related parties)	45,408	30,733
Guarantee deposits paid	10,491	9,975
Other financial assets	194	194
	<u>\$ 623,693</u>	<u>\$ 700,444</u>

	<u>December 31, 2020</u>	<u>December 31, 2019</u>
<u>Financial liabilities</u>		
Financial liabilities at amortised cost through profit or loss		
Short-term borrowings	\$ 362,000	\$ 384,767
Notes payable	3,936	7,006
Accounts payable(including related parties)	407,984	398,892
Other accounts payable	<u>95,374</u>	<u>96,042</u>
	<u>\$ 869,294</u>	<u>\$ 886,707</u>
Lease liability (including related parties)	<u>\$ 2,802</u>	<u>\$ 8,688</u>

B. Financial risk management policies

- (a) The Company's activities expose it to a variety of financial risks: market risk (including foreign exchange risk, interest rate risk and price risk), credit risk and liquidity risk. To minimise any adverse effects on the financial performance of the Company, derivative financial instruments, such as foreign exchange forward contracts and foreign currency option contracts are used to hedge certain exchange rate risk, and interest rate swaps are used to fix variable future cash flows. Derivatives are used exclusively for hedging purposes and not as trading or speculative instruments.
- (b) Risk management is carried out by a central treasury department (Company treasury) under policies approved by the board of directors. Company treasury identifies, evaluates and hedges financial risks in close cooperation with the Company's operating units. The Board provides written principles for overall risk management, as well as written policies covering specific areas and matters, such as foreign exchange risk, interest rate risk, credit risk, use of derivative financial instruments and non-derivative financial instruments, and investment of excess liquidity.

C. Significant financial risks and degrees of financial risks

(a) Market risk

Foreign exchange risk

- i. The Company operates internationally and is exposed to foreign exchange risk arising from various currency exposures, primarily with respect to the RMB. Foreign exchange rate risk arises from future commercial transactions and recognised assets and liabilities.
- ii. Management has set up a policy to require group companies to manage their foreign exchange risk against their functional currency. The companies are required to hedge their entire foreign exchange risk exposure with the Company treasury. Exchange rate risk is measured through a forecast of highly probable USD and RMB expenditures. Forward foreign exchange contracts are adopted to minimise the volatility of the exchange rate affecting cost of forecast inventory purchases.
- iii. The Company use forward foreign exchange contracts to hedge exchange rate risk.

However, these forward foreign exchange contracts are not accounted for under hedge accounting.

- iv The Company's businesses involve some non-functional currency operations (the Company's functional currency: NTD). The information on assets and liabilities denominated in foreign currencies whose values would be materially affected by the exchange rate fluctuations is as follows:

(Foreign currency: Functional currency)	December 31, 2020			2020		
	Foreign currency amount (In thousands)	Exchange rate	Book value (NTD)	Sensitivity Analysis		
				Degree of variation	Effect on profit or loss before tax	Effect on other comprehensive income
<u>Financial assets</u>						
<u>Monetary items</u>						
USD:NTD	\$ 10,311	28.480	\$ 293,657	1%	\$ 2,937	\$ -
RMB:NTD	6,476	4.377	28,345	1%	283	-
JPY:NTD	10,465	0.276	2,891	1%	29	-
<u>Long-term equity investment accounted for using equity method</u>						
USD:NTD	\$ 22,319	28.480	\$ 635,645	1%	-	6,356
<u>Financial liabilities</u>						
<u>Monetary items</u>						
USD:NTD	\$ 9,033	28.480	\$ 257,260	1%	\$ 2,573	\$ -
(Foreign currency: Functional currency)	December 31, 2019			2019		
	Foreign currency amount (In thousands)	Exchange rate	Book value (NTD)	Sensitivity Analysis		
				Degree of variation	Effect on profit or loss before tax	Effect on other comprehensive income
<u>Financial assets</u>						
<u>Monetary items</u>						
USD:NTD	\$ 10,705	29.980	\$ 320,936	1%	\$ 3,209	\$ -
RMB:NTD	7,761	4.305	33,411	1%	334	-
JPY:NTD	22,733	0.276	6,274	1%	63	-
<u>Long-term equity investment accounted for using equity method</u>						
USD:NTD	\$ 20,796	29.980	\$ 623,464	1%	-	6,235
<u>Financial liabilities</u>						
<u>Monetary items</u>						
USD:NTD	\$ 8,560	29.980	\$ 256,629	1%	\$ 2,566	\$ -

- iv. The total exchange gain arising from significant foreign exchange variation on the monetary items held by the Company for the years ended December 31, 2020 and 2019, amounted to \$2,843 and \$1,280, respectively.

Price risk

- i. The Company's equity securities, which are exposed to price risk, are the held financial assets at fair value through profit or loss and financial assets at fair value through other

comprehensive income. To manage its price risk arising from investments in equity securities, the Company diversifies its portfolio. Diversification of the portfolio is done in accordance with the limits set by the Company.

- ii. The Company's investments in equity securities comprise unlisted shares issued by the domestic companies. The prices of equity securities would change due to the change of the future value of investee companies. If the prices of these equity securities had increased/decreased by 1% with all other variables held constant, other components of equity would have increased/decreased by both \$810, as a result of other comprehensive income classified as equity investment at fair value through other comprehensive income.

Cash flow and fair value interest rate risk

The Company's borrowings are mostly with fixed interest rate and maturity within one year. Therefore, the Company does not expect to be exposed to significant interest rate risk.

(b) Credit risk

- i. Credit risk refers to the risk of financial loss to the Company arising from default by the clients on the contract obligations. The main factor is that counterparties could not repay in full the contract cash flows of accounts receivable, notes receivable and amortized cost financial assets based on the agreed terms.
- ii. The Company manages their credit risk taking into consideration the entire Company's concern. For banks and financial institutions, only independently rated parties with a minimum rating of investment grade or above are accepted. According to the Company's credit policy, each local entity in the Company is responsible for managing and analysing the credit risk for each of their new clients before standard payment and delivery terms and conditions are offered. Internal risk control assesses the credit quality of the customers, taking into account their financial position, past experience and other factors. Individual risk limits are set based on internal or external ratings in accordance with limits set by the management. The utilisation of credit limits is regularly monitored. The main credit risk arises from customers, including outstanding receivables.
- iii. The Company adopts the assumptions under IFRS 9, there has been a significant increase in credit risk on that instrument since initial recognition, when the contract payments were past due over 30 days.
- iv. The Company adopts the assumptions under IFRS 9, the default occurs when the contract payments are past due over 90 days.
- v. The following indicators are used to determine whether the credit impairment of debt instruments has occurred:
 - (i) It becomes probable that the issuer will enter bankruptcy or other financial reorganization due to their financial difficulties;

- (ii) Default or delinquency in interest or principal repayments;
 - (iii) Adverse changes in national or regional economic conditions that are expected to cause a default.
- vi. The Company classifies customers' accounts receivable in accordance with sales area. The Company applies the modified approach using provision matrix to estimate expected credit loss under the provision matrix basis.
- vii. The Company wrote-off the financial assets, which cannot be reasonably expected to be recovered, after initiating recourse procedures. However, the Company will continue executing the recourse procedures to secure their rights. On December 31, 2020 and 2019, the Company's written-off financial assets that are still under recourse procedures amounted to \$33,884 and \$28,415, respectively.
- viii. The Company used the forecastability of Taiwan Institute of Economic Research boom observation report to adjust historical and timely information to assess the default possibility of accounts receivable. On December 31, 2020 and 2019, the provision matrix is as follows:

	Not overdue	Overdue within 30 days	Overdue within 60 days	Overdue within 90 days	Overdue for more than 90 days	Total
<u>At December 31, 2020</u>						
Expected loss rate	0.03%	1.91%	78.08%	81.47%	100.00%	
Total book value	\$ 311,967	\$ 3,068	\$ 95	\$ 3,436	\$ 1,244	\$ 319,810
Loss allowance	\$ 94	\$ 58	\$ 74	\$ 2,799	\$ 1,244	\$ 4,269
<u>At December 31, 2019</u>						
Expected loss rate	0.03%	1.28%	44.50%	60.00%	60.14%	
Total book value	\$ 364,972	\$ 2,433	\$ 5,561	\$ -	\$ 11,844	\$ 384,810
Loss allowance	\$ 109	\$ 31	\$ 2,475	\$ -	\$ 7,123	\$ 9,738

- ix. Movements in relation to the Company applying the modified approach to provide loss allowance for accounts receivable are as follows:

	<u>2020</u>	
	<u>Accounts receivable</u>	<u>Overdue receivable</u>
At January 1	\$ 9,738	\$ 28,415
Transfer	(5,469)	5,469
At December 31	<u>\$ 4,269</u>	<u>\$ 33,884</u>
	<u>2019</u>	
	<u>Accounts receivable</u>	<u>Overdue receivable</u>
At January 1 (at December 31)	<u>\$ 9,738</u>	<u>\$ 28,415</u>

(c) Liquidity risk

- i. Cash flow forecasting is performed by the Company's treasury. Company treasury

monitors rolling forecasts of the Company's liquidity requirements to ensure it has sufficient cash to meet operational needs.

- ii. When surplus cash held by the Company over and above balance required for working capital management, Company treasury invests surplus cash in interest bearing current accounts or other cash equivalent, choosing instruments with appropriate maturities or sufficient liquidity to provide sufficient head-room as determined by the above-mentioned forecasts.
- iii. The Company has the following undrawn borrowing facilities:

	December 31, 2020	December 31, 2019
Fixed rate:		
Expiring within one year	\$ 771,920	\$ 685,154

- iv. The table below analyses the Company's non-derivative financial liabilities into relevant maturity groupings based on the remaining period at the balance sheet date to the contractual maturity date. The amounts disclosed in the table are the contractual undiscounted cash flows.

Non-derivative financial liabilities

December 31, 2020	Less than 3 months	Between 3 months and 1 year		Over 1 year	Book value
Short-term borrowings	\$ 362,394	\$ -	\$ -	\$ -	\$ 362,394
Notes payable	3,936	-	-	-	3,936
Accounts payable	196,427	10,487	-	-	206,914
Accounts payable - related parties	201,070	-	-	-	201,070
Other payables	81,029	8,701	5,644	-	95,374
Lease liability	1,535	1,128	156	-	2,819

December 31, 2019	Less than 3 months	Between 3 months and 1 year		Over 1 year	Book value
Short-term borrowings	\$ 385,258	\$ -	\$ -	\$ -	\$ 385,258
Notes payable	7,006	-	-	-	7,006
Accounts payable	189,507	9,143	-	-	198,650
Accounts payable - related parties	200,242	-	-	-	200,242
Other payables	85,680	10,362	-	-	96,042
Lease liability	1,562	4,528	2,705	-	8,795

- v. The Company does not expect the timing of occurrence of the cash flows estimated through the maturity date analysis will be significantly earlier, nor expect the actual cash flow amount will be significantly different.

(3) Fair value information

A. The different levels that the inputs to valuation techniques are used to measure fair value of financial and non-financial instruments have been defined as follows:

Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date. A market is regarded as active where a market in which transactions for the asset or liability take place with sufficient frequency and volume to provide pricing information on an ongoing basis.

Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly.

Level 3: Unobservable inputs for the asset or liability.

B. Financial instruments not measured at fair value.

The Company's carrying amounts of cash and cash equivalents, notes receivable, accounts receivable, other receivables, accounts payable and other payables are approximate to their fair values. The carrying amounts are provided in Note 12(2) A.

C. The related information of financial and non-financial instruments measured at fair value by level on the basis of the nature, characteristics and risks of the assets and liabilities is as follows:

The related information of natures of the assets and liabilities is as follows:

<u>December 31, 2020</u>	<u>Level 1</u>	<u>Level 2</u>	<u>Level 3</u>	<u>Total</u>
Assets				
<u>Recurring fair value measurements</u>				
Financial assets at fair value through other comprehensive income				
Equity securities	<u>\$ -</u>	<u>\$ -</u>	<u>\$ 81,000</u>	<u>\$ 81,000</u>
<u>December 31, 2019</u>	<u>Level 1</u>	<u>Level 2</u>	<u>Level 3</u>	<u>Total</u>
Assets				
<u>Recurring fair value measurements</u>				
Financial assets at fair value through other comprehensive income				
Equity securities	<u>\$ -</u>	<u>\$ -</u>	<u>\$ 81,000</u>	<u>\$ 81,000</u>

D. The methods and assumptions the Company used to measure fair value are as follows:

(a) When assessing non-standard and low-complexity financial instruments, for example, debt instruments without active market, interest rate swap contracts, foreign exchange swap contracts and options, the Company adopts valuation technique that is widely used by market participants. The inputs used in the valuation method to measure these financial instruments are normally observable in the market.

(b) The valuation of derivative financial instruments is based on valuation model widely

accepted by market participants, such as present value techniques and option pricing models. Forward exchange contracts are usually valued based on the current forward exchange rate.

- E. For the years ended December 31, 2020 and 2019, there was no transfer between Level 1 and Level 2.
- F. For the years ended December 31, 2020 and 2019, there was no transfer into or out from Level 3.
- G. Financial segment is in charge of valuation procedures for fair value measurements being categorized within Level 3, which is to verify independent fair value of financial instruments. Such assessment is to ensure the valuation results are reasonable by applying independent information to make results close to current market conditions, confirming the resource of information is independent, reliable and in line with other resources and represented as the exercisable price, and frequently calibrating valuation model, performing back-testing, updating inputs used to the valuation model and making any other necessary adjustments to the fair value.
- H. The following is the qualitative information of significant unobservable inputs and sensitivity analysis of changes in significant unobservable inputs to valuation model used in Level 3 fair value measurement:

	Fair value at December 31, 2020	Valuation technique	Significant unobservable input	Range (weighted average)	Relationship of inputs to fair value
Non-derivative equity instrument: Unlisted shares	\$ 81,000	Market comparable companies	Discount for lack of marketability	30%	The higher the discount for lack of marketability, the lower the fair value
	Fair value at December 31, 2019	Valuation technique	Significant unobservable input	Range (weighted average)	Relationship of inputs to fair value
Non-derivative equity instrument: Unlisted shares	\$ 81,000	Market comparable companies	Discount for lack of marketability	25%	The higher the discount for lack of marketability, the lower the fair value

13. Supplementary Disclosures

(1) Significant transaction information

The Company discloses related information of the following for the year ended December 31,

2020:

- A. Loans to others: Please refer to table 1.
- B. Provision of endorsements and guarantees to others: Please refer to table 2.
- C. Holding of marketable securities at the end of the period (not including subsidiaries, associates and joint ventures): Please refer to table 3.
- D. Acquisition or sale of the same security with the accumulated cost exceeding \$300 million or 20% of the Company's paid-in capital: None.
- E. Acquisition of real estate reaching \$300 million or 20% of paid-in capital or more: None.
- F. Disposal of real estate reaching \$300 million or 20% of paid-in capital or more: None.
- G. Purchases or sales of goods from or to related parties reaching \$100 million or 20% of paid-in capital or more: Please refer to table 4.
- H. Receivables from related parties reaching \$100 million or 20% of paid-in capital or more: Please refer to table 5.
- I. Derivative financial instruments undertaken for the year ended December 31, 2020: None.
- J. Significant inter-company transactions for the year ended December 31, 2020: Please refer to table 6.

(2) Information on investees (not including investees in Mainland China)

Please refer to table 7.

(3) Information on investments in Mainland China

- A. Basic information: Please refer to table 8.
- B. Significant transactions, either directly or indirectly through a third area, with investee companies in the Mainland Area:
 - (a) Purchasing amount and percentage and related receivables' percentage and balance at December 31, 2020: Please refer to tables 6 and 9.
 - (b) Selling amount and percentage and related receivables' percentage and balance at December 31, 2020: Please refer to tables 6 and 9.
 - (c) Property transaction amounts and gains and loss arising from them: None.
 - (d) Balance and purpose of provision of endorsements/guarantees or collaterals at December 31, 2020: None.
 - (e) Maximum balance, ending balance, interest rate range and interest for financing during the year ended and at December 31, 2020: Please refer to table 1.
 - (f) Other significant transactions that affected the gains and loss or financial status for the period, i.e. rendering/receiving of service: Please refer to table 9.

(4) Major shareholders information

Major shareholders information: Please refer to table 10.

14. Segment Information

Not applicable.

**ABLEREX ELECTRONICS CO., LTD. AND
SUBSIDIARIES
CONSOLIDATED FINANCIAL STATEMENTS AND
INDEPENDENT AUDITORS' REPORT
DECEMBER 31, 2020 AND 2019**

For the convenience of readers and for information purpose only, the auditors' report and the accompanying financial statements have been translated into English from the original Chinese version prepared and used in the Republic of China. In the event of any discrepancy between the English version and the original Chinese version or any differences in the interpretation of the two versions, the Chinese-language auditors' report and financial statements shall prevail.

INDEPENDENT AUDITORS' REPORT TRANSLATED FROM CHINESE

To the Board of Directors and Shareholders of ABLEREX ELECTRONICS CO., LTD.

Opinion

We have audited the accompanying consolidated balance sheets of Ablere Electronics Co., Ltd. and its subsidiaries (the "Group") as at December 31, 2020 and 2019, and the related consolidated statements of comprehensive income, of changes in equity and of cash flows for the years then ended, and notes to the consolidated financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying consolidated financial statements present fairly, in all material respects, the consolidated financial position of the Group as at December 31, 2020 and 2019, and its consolidated financial performance and its consolidated cash flows for the years then ended in accordance with the "Regulations Governing the Preparation of Financial Reports by Securities Issuers" and the International Financial Reporting Standards, International Accounting Standards, IFRIC Interpretations, and SIC Interpretations as endorsed by the Financial Supervisory Commission.

Basis for opinion

We conducted our audits in accordance with the Regulations Governing Auditing and Attestation of Financial Statements by Certified Public Accountants and generally accepted auditing standards in the Republic of China. Our responsibilities under those standards are further described in the Auditors' responsibilities for the audit of the consolidated financial statements section of our report. We are independent of the Group in accordance with the Norm of Professional Ethics for Certified Public Accountants of the Republic of China, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key audit matters

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the consolidated financial statements of the current period. These matters were addressed in the context of our audit of the consolidated financial statements as a whole and, in forming our opinion thereon, we do not provide a separate opinion on these matters.

Key audit matters for the Group's consolidated financial statements of the current period are stated as follows:

Appropriateness of cut-off of project construction revenue

Description

Please refer to Note 4(25) for accounting policy on revenue recognition, Note 6(17) for composition of operating revenue and Note 14(5) for information on products and services. For the year ended December 31, 2020, the Group's project construction revenue amounted to NT\$979,076 thousand, accounting for 41% of consolidated net sales.

The Group's operating revenue is comprised of sales revenue and project construction revenue. The main composition of the project construction revenue is the sale of large equipment and installation related projects. The project needs to be completed through the Group's installation of large-scale equipment, and after the relevant documents are executed by both parties and the client can obtain and consume the benefits provided by the asset, the Group will have deemed to have completed the contractual performance obligations and can recognize the project construction revenue. Due to the fact that the income of the Group's project construction involves manual operation, it may result to inappropriate timing recognition of revenue. Considering that the amount of income recognized by the Group's project construction in a timely manner has a significant impact on the consolidated financial statements, we have deemed the appropriateness of the project construction income as one of the significant audit matters for the year.

How our audit addressed the matter

We performed the following audit procedures in order to assess cut-off of project construction revenue:

1. Assessed and obtained an understanding of the Group's internal control procedures of the project construction revenue recognition, and confirmed the related internal controls were performed effectively.
2. Performed cut-off test on project construction revenue transactions, and selected samples to check that the project construction revenue had been recorded in the proper period accordingly.
3. Tested the accuracy and completeness of project construction list and traced to a related document that can prove revenue in order to confirm that the recognition amount and timing were appropriate.

Valuation of allowance for inventory valuation losses

Description

Please refer to Note 4(12) for accounting policy on inventory valuation, Note 5(2) for accounting estimates and assumption uncertainty in relation to inventory valuation, and Note 6(5) for the details of allowance for inventory valuation losses. As of December 31, 2020, the Group's inventories and allowance for inventory valuation losses amounted to NT \$1,261,358 thousand and NT \$142,108 thousand, respectively.

The Group is engaged in the design, manufacture and sales of uninterruptible power supply systems, equipment to power quality devices and others. Due to the rapid technological innovations and the competitive nature of the market, there is a higher risk of inventory losses due to the market value decline or obsolescence. The Group recognises inventories at the lower of cost and net realisable value. Obsolete or slow-moving inventories were assessed individually. The Group's estimation and determination of the net realizable value of inventories are subjected to management's judgement, involves a high level of uncertainty and has a material effect on the financial statements. Therefore, it was identified as a key audit matter.

How our audit addressed the matter

We performed the following audit procedures in order to assess the adequacy of the measurement of net realisable value and provision on allowance for inventory valuation losses:

1. Assessed the reasonableness of policies relating to the provision of allowance for inventory valuation losses and procedures based on our understanding of the Group's operation and industry.
2. Verified the accuracy of the inventory aging report and net realisable value report in order to confirm that the information in the reports were consistent with the Group's inventory policies.
3. Checked the appropriateness of the estimation basis adopted by the Group for the evaluation of the net realizable value, verified the accuracy of inventory selling and purchase prices, and recalculated and evaluated the reasonableness of allowance for inventory valuation losses.

Other matter – Parent company only financial reports

We have audited and expressed an unqualified opinion on the parent company only financial statements of Ablerex Electronics Co., Ltd. as at and for the years ended December 31, 2020 and 2019.

Responsibilities of management and those charged with governance for the consolidated financial statements

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with the “Regulations Governing the Preparation of Financial Reports by Securities Issuers” and the International Financial Reporting Standards, International Accounting Standards, IFRIC Interpretations, and SIC Interpretations as endorsed by the Financial Supervisory Commission, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing the Group’s ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Group or to cease operations, or has no realistic alternative but to do so. Those charged with governance, including the audit committee, are responsible for overseeing the Group’s financial reporting process.

Auditor’s responsibilities for the audit of the consolidated financial statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor’s report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the generally accepted auditing standards in the Republic of China will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with the generally accepted auditing standards in the Republic of China, we exercise professional judgement and maintain professional skepticism throughout the audit. We also:

1. Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
2. Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control.
3. Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
4. Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to cease to continue as a going concern.
5. Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
6. Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Chou, Hsiao-Tzu

ABLEREX ELECTRONICS CO., LTD. AND SUBSIDIARIES
NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

DECEMBER 31, 2020 AND 2019

(Expressed in thousands of New Taiwan dollars, except as otherwise indicated)

1. History and Organization

(1) Ablere Electronics Co.,Ltd (the “Company”), formerly UIS Abler Electronics Co., Ltd., was incorporated under the provisions of the Company Law of the Republic of China (R.O.C.) on April 27, 1998. The Company merged with PEC Technology Co., Ltd. on April 1, 2002, with the Company as the surviving company and was then renamed as Ablere Electronics Co.,Ltd. The shares of the Company have been trading on the Taipei Exchange since September 9, 2010.

(2) The Company and its subsidiaries (collectively referred herein as the “Group”) are primarily engaged in the following business activities:

- (a) Manufacturing and sales of uninterruptible power supply systems.
- (b) Manufacturing and sales of equipment to power quality devices.
- (c) Manufacturing and sales of solar energy equipment.
- (d) Maintenance and technical services.

2. The Date of Authorization for Issuance of the Financial Statements and Procedures for Authorization

These consolidated financial statements were authorized for issuance by the Board of Directors on March 19, 2021.

3. Application of New Standards, Amendments and Interpretations

(1) Effect of the adoption of new issuances of or amendments to International Financial Reporting Standards (“IFRS”) as endorsed by the Financial Supervisory Commission (“FSC”)

New standards, interpretations and amendments endorsed by the FSC effective from 2020 are as follows:

New Standards, Interpretations and Amendments	Effective date by International Accounting Standards Board
Amendments to IAS 1 and IAS 8, ‘Disclosure initiative-definition of material’	January 1, 2020
Amendments to IFRS 3, ‘Definition of a business’	January 1, 2020
Amendments to IFRS 9, IAS 39 and IFRS 7, ‘Interest rate benchmark reform’	January 1, 2020
Amendment to IFRS 16, ‘Covid- 19- related rent concessions’	June 1, 2020 (Note)
Note : Earlier application from January 1, 2020 is allowed by FSC.	

Except for the following, the above standards and interpretations have no significant impact to the Group’s financial condition and financial performance based on the Group’s assessment.

(2) Effect of new issuances of or amendments to IFRSs as endorsed by the FSC but not yet adopted by the Group

New standards, interpretations and amendments endorsed by the FSC effective from 2021 are as follows:

<u>New Standards, Interpretations and Amendments</u>	<u>Effective date by International Accounting Standards Board</u>
Amendments to IFRS 4, ‘Extension of the temporary exemption from applying IFRS 9’	January 1, 2021
Amendments to IFRS 9, IAS 39, IFRS 7, IFRS 4 and IFRS 16, ‘Interest Rate Benchmark Reform— Phase 2’	January 1, 2021

Except for the following, the above standards and interpretations have no significant impact to the Group’s financial condition and financial performance based on the Group’s assessment.

(3) IFRSs issued by IASB but not yet endorsed by the FSC

New standards, interpretations and amendments issued by IASB but not yet included in the IFRSs as endorsed by the FSC are as follows:

<u>New Standards, Interpretations and Amendments</u>	<u>Effective date by International Accounting Standards Board</u>
Amendments to IFRS 3, ‘Reference to the conceptual framework’	January 1, 2022
Amendments to IFRS 10 and IAS 28, ‘Sale or contribution of assets between an investor and its associate or joint venture’	To be determined by International Accounting Standards Board
IFRS 17, ‘Insurance contracts’	January 1, 2023
Amendments to IFRS 17, ‘Insurance contracts’	January 1, 2023
Amendments to IAS 1, ‘Classification of liabilities as current or non-current’	January 1, 2023
Amendments to IAS 1, ‘Disclosure of accounting policies’	January 1, 2023
Amendments to IAS 8, ‘Definition of accounting estimates’	January 1, 2023
Amendments to IAS 16, ‘Property, plant and equipment: proceeds before intended use’	January 1, 2022
Amendments to IAS 37, ‘Onerous contracts— cost of fulfilling a contract’	January 1, 2022
Annual improvements to IFRS Standards 2018–2020	January 1, 2022

Except for the following, the above standards and interpretations have no significant impact to the Group’s financial condition and financial performance based on the Group’s assessment.

4. Summary of Significant Accounting Policies

The principal accounting policies applied in the preparation of these consolidated financial statements are set out below. These policies have been consistently applied to all the periods presented, unless otherwise stated.

(1) Compliance statement

The consolidated financial statements of the Group have been prepared in accordance with the “Regulations Governing the Preparation of Financial Reports by Securities Issuers”, International Financial Reporting Standards, International Accounting Standards, IFRIC Interpretations, and SIC Interpretations as endorsed by the FSC (collectively referred herein as the “IFRSs”).

(2) Basis of preparation

A. Except for the following items, the consolidated financial statements have been prepared under the historical cost convention:

- (a) Financial assets and financial liabilities (including derivative instruments) at fair value through profit or loss.
- (b) Financial assets at fair value through other comprehensive income.
- (c) Defined benefit liabilities recognised based on the net amount of pension fund assets plus less present value of defined benefit obligations.

B. The preparation of financial statements in conformity with International Financial Reporting Standards, International Accounting Standards, IFRIC Interpretations, and SIC Interpretations as endorsed by the FSC (collectively referred herein as the “IFRSs”) requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in the process of applying the Group’s accounting policies. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the consolidated financial statements are disclosed in Note 5.

(3) Basis of consolidation

A. Basis for preparation of consolidated financial statements:

- (a) All subsidiaries are included in the Group’s consolidated financial statements. Subsidiaries are all entities (including structured entities) controlled by the Group. The Group controls an entity when the Group is exposed, or has rights, to variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. Consolidation of subsidiaries begins from the date the Group obtains control of the subsidiaries and ceases when the Group loses control of the subsidiaries.
- (b) Inter-company transactions, balances and unrealised gains or losses on transactions between companies within the Group are eliminated. Accounting policies of subsidiaries have been adjusted where necessary to ensure consistency with the policies adopted by the Group.
- (c) Profit or loss and each component of other comprehensive income are attributed to the owners of the parent and to the non-controlling interests. Total comprehensive income is attributed to the owners of the parent and to the non-controlling interests even if this results in the non-controlling interests having a deficit balance.
- (d) Changes in a parent’s ownership interest in a subsidiary that do not result in the parent losing control of the subsidiary (transactions with non-controlling interests) are accounted for as equity transactions, i.e. transactions with owners in their capacity as owners. Any difference between the amount by which the non-controlling interests are adjusted and the fair value of

the consideration paid or received is recognised directly in equity.

- (e) When the Group loses control of a subsidiary, the Group remeasures any investment retained in the former subsidiary at its fair value. That fair value is regarded as the fair value on initial recognition of a financial asset or the cost on initial recognition of the associate or joint venture. Any difference between fair value and carrying amount is recognised in profit or loss. All amounts previously recognised in other comprehensive income in relation to the subsidiary are reclassified to profit or loss on the same basis as would be required if the related assets or liabilities were disposed of. That is, when the Group loses control of a subsidiary, all gains or losses previously recognised in other comprehensive income in relation to the subsidiary should be reclassified from equity to profit or loss, if such gains or losses would be reclassified to profit or loss when the related assets or liabilities are disposed of.

B. Subsidiaries included in the consolidated financial statements:

Name of investor	Name of subsidiary	Main business activities	Ownership (%)			Description
			December 31, 2020	December 31, 2019	December 31, 2019	
The Company	Ablerex Electronics (Samoa) Co., Ltd. (Ablerex Samoa)	Investment holdings	100	100	100	Note 1
The Company	Joint Rewards Trading Corp. (Joint)	Management service	0	100	100	Note 1, 4
The Company	Ablerex Corporation (Ablerex-USA)	Sales of uninterruptible power supply systems and solar energy equipment and others	100	100	100	Note 1
The Company	Ablerex International Co., Ltd. (Ablerex-HK)	Sales of uninterruptible power supply systems and solar energy equipment and others	100	100	100	Note 1
The Company	Ablerex Electronics (S) Pte. Ltd. (Ablerex-SG)	Sales of uninterruptible power supply systems and solar energy equipment and others	100	100	100	Note 1
The Company	Ablerex Electronics U.K. Ltd. (Ablerex-UK)	Investment holdings	100	100	100	Note 1
The Company	Wada Denki Co., Ltd. (Ablerex-JP)	Sales of uninterruptible power supply systems and solar energy equipment and others	99	100	100	Note 1, 3
Ablerex Electronics U.K. Ltd.	Ablerex Electronics Italy S.R.L. (Ablerex-IT)	Sales of uninterruptible power supply systems and solar energy equipment and others	100	100	100	Note 1
Ablerex Electronics (Samoa) Co., Ltd.	Ablerex Overseas Co., Ltd. (Ablerex-Overseas)	Investment holdings	100	100	100	Note 1
Ablerex Overseas Co., Ltd.	Ablerex Electronics (Suzhou) Co., Ltd. (Ablerex-SZ)	Manufacturing and sales of uninterruptible power supply systems and solar energy equipment and others	100	100	100	Note 1

Name of investor	Name of subsidiary	Main business activities	Ownership (%)			Description
			December 31, 2020	December 31, 2019	December 31, 2019	
Ablerex Overseas Co., Ltd.	Ablerex Electronics (Beijing) Co., Ltd. (Ablerex-BJ)	Sales of uninterruptible power supply systems and solar energy equipment and others	80	80	80	Note 1
Ablerex Electronics (S) Pte. Ltd.	Ablerex Electronics (Thailand) Co., Ltd. (Ablerex-TH)	Sales of uninterruptible power supply systems and solar energy equipment and others	70	70	70	Note 1
Ablerex Corporation	Ablerex Latam Corporation (Ablerex-Latam)	Sales of uninterruptible power supply systems and solar energy equipment and others	86	86	86	Note 1, 2

Note 1: The information included in these consolidated financial statements as at December 31, 2020 and 2019 is based on the audited financial statement of the investee.

Note 2: The consideration for acquiring the ownership of AblerexLatam Corporation was remitted on November 28, 2018. The investee was included in these consolidated financial statements thereafter. In addition, Ablerex-Latam increased its capital to employees on February 7, 2019. As a result, the Company decreased its share interest to 86%.

Note3: The Group sold 1% of its shares in the subsidiary Ablerex-JP on May 28, 2020, and the shareholding ratio was reduced to 99%.

Note4: Joint Rewards Trading Corp. (Joint) completed the cancellation of registration on September 28, 2020

C. Subsidiaries not included in the consolidated financial statements: None.

D. Adjustments for subsidiaries with different balance sheet dates: None.

E. Significant restrictions

Cash and short-term deposits of \$88,308 deposited in Mainland China are under local foreign exchange control which restricts the capital to be remitted outside the borders (except for normal dividend distribution).

F. Subsidiaries that have non-controlling interests that are material to the Group: None.

(4) Foreign currency translation

Items included in the financial statements of each of the Group's entities are measured using the currency of the primary economic environment in which the entity operates (the "functional currency"). The consolidated financial statements are presented in New Taiwan Dollars, which is the Company's functional and the Group's presentation currency.

A. Foreign currency transactions and balances

(a) Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions or valuation where items are remeasured. Foreign exchange gains and losses resulting from the settlement of such transactions are

recognised in profit or loss in the period in which they arise.

- (b) Monetary assets and liabilities denominated in foreign currencies at the period end are re-translated at the exchange rates prevailing at the balance sheet date. Exchange differences arising upon re-translation at the balance sheet date are recognised in profit or loss.
- (c) Non-monetary assets and liabilities denominated in foreign currencies held at fair value through profit or loss are re-translated at the exchange rates prevailing at the balance sheet date; their translation differences are recognised in profit or loss. Non-monetary assets and liabilities denominated in foreign currencies held at fair value through other comprehensive income are re-translated at the exchange rates prevailing at the balance sheet date; their translation differences are recognised in other comprehensive income. However, non-monetary assets and liabilities denominated in foreign currencies that are not measured at fair value are translated using the historical exchange rates at the dates of the initial transactions.
- (d) All foreign exchange gains and losses are presented in the statement of comprehensive income within 'other gains and losses'.

B. Translation of foreign operations

- (a) The operating results and financial position of all the group entities associates and joint arrangements that have a functional currency different from the presentation currency are translated into the presentation currency as follows:
 - i. Assets and liabilities for each balance sheet presented are translated at the closing exchange rate at the date of that balance sheet;
 - ii. Income and expenses for each statement of comprehensive income are translated at average exchange rates of that period; and
 - iii. All resulting exchange differences are recognised in other comprehensive income.
- (b) When the foreign operation partially disposed of or sold is a subsidiary, cumulative exchange differences that were recorded in other comprehensive income are proportionately transferred to the non-controlling interest in this foreign operation. In addition, even when the Group retains partial interest in the former foreign subsidiary after losing control of the former foreign subsidiary, such transactions should be accounted for as disposal of all interest in the foreign operation.

(5) Classification of current and non-current items

- A. Assets that meet one of the following criteria are classified as current assets; otherwise they are classified as non-current assets:
 - (a) Assets arising from operating activities that are expected to be realised, or are intended to be sold or consumed within the normal operating cycle;
 - (b) Assets held mainly for trading purposes;
 - (c) Assets that are expected to be realised within twelve months from the balance sheet date;
 - (d) Cash and cash equivalents, excluding restricted cash and cash equivalents and those that are to

be exchanged or used to settle liabilities more than twelve months after the balance sheet date.

B. Liabilities that meet one of the following criteria are classified as current liabilities; otherwise they are classified as non-current liabilities:

- (a) Liabilities that are expected to be settled within the normal operating cycle;
- (b) Liabilities arising mainly from trading activities;
- (c) Liabilities that are to be settled within twelve months from the balance sheet date;
- (d) Liabilities for which the repayment date cannot be extended unconditionally to more than twelve months after the balance sheet date. Terms of a liability that could, at the option of the counterparty, result in its settlement by the issue of equity instruments do not affect its classification.

(6) Cash equivalents

Cash equivalents refer to short-term, highly liquid investments that are readily convertible to known amount of cash and subject to an insignificant risk of changes in value. Time deposits that meet the above criteria and are held for the purpose of meeting short-term cash commitment in operations are classified as cash equivalents.

(7) Financial assets at fair value through other comprehensive income

A. Financial assets at fair value through other comprehensive income comprise equity securities which are not held for trading, and for which the Group has made an irrevocable election at initial recognition to recognise changes in fair value in other comprehensive income and debt instruments which meet all of the following criteria:

- (a) The objective of the Group's business model is achieved both by collecting contractual cashflows and selling financial assets; and
- (b) The assets' contractual cash flows represent solely payments of principal and interest.

B. On a regular way purchase or sale basis, financial assets at fair value through other comprehensive income are recognised and derecognised using trade date accounting.

C. At initial recognition, the Group measures the financial assets at fair value plus transaction costs. The Group subsequently measures the financial assets at fair value:

- (a) The changes in fair value of equity investments that were recognised in other comprehensive income are reclassified to retained earnings and are not reclassified to profit or loss following the derecognition of the investment. Dividends are recognised as revenue when the right to receive payment is established, future economic benefits associated with the dividend will flow to the Group and the amount of the dividend can be measured reliably.
- (b) Except for the recognition of impairment loss, interest income and gain or loss on foreign exchange which are recognised in profit or loss, the changes in fair value of debt instruments are taken through other comprehensive income. When the financial asset is derecognised, the cumulative gain or loss previously recognised in other comprehensive income is reclassified from equity to profit or loss.

(8) Financial assets at amortised cost

- A. Financial assets at amortised cost are those that meet all of the following criteria:
- (a) The objective of the Group's business model is achieved by collecting contractual cash flows.
 - (b) The assets' contractual cash flows represent solely payments of principal and interest.
- B. On a regular way purchase or sale basis, financial assets at amortised cost are recognised and derecognised using trade date accounting.
- C. At initial recognition, the Group measures the financial assets at fair value plus transaction costs. Interest income from these financial assets is included in finance income using the effective interest method. A gain or loss is recognised in profit or loss when the asset is derecognised or impaired.
- D. The Group's time deposits which do not fall under cash equivalents are those with a short maturity period and are measured at initial investment amount as the effect of discounting is immaterial.

(9) Accounts and notes receivable

- A. Accounts and notes receivable entitle the Group a legal right to receive consideration in exchange for transferred goods or rendered services.
- B. The short-term accounts and notes receivable without bearing interest are subsequently measured at initial invoice amount as the effect of discounting is immaterial.

(10) Impairment of financial assets

For debt instruments measured at fair value through other comprehensive income and financial assets at amortised cost, at each reporting date, the Group recognises the impairment provision for 12 months expected credit losses if there has not been a significant increase in credit risk since initial recognition or recognises the impairment provision for the lifetime expected credit losses (ECLs) if such credit risk has increased since initial recognition after taking into consideration all reasonable and verifiable information that includes forecasts. On the other hand, for accounts receivable or contract assets that do not contain a significant financing component, the Group recognises the impairment provision for lifetime ECLs.

(11) Derecognition of financial assets

The Group derecognises a financial asset when the contractual rights to receive the cash flows from the financial asset expire.

(12) Inventories

Inventories are stated at the lower of cost and net realisable value. Cost is determined using the weighted-average method. The cost of finished goods and work in process comprises raw materials, direct labour, other direct costs and related production overheads (allocated fixed production overheads based on normal capacity). It excludes borrowing costs. The item by item approach is used in applying the lower of cost and net realisable value. Net realisable value is the estimated selling price in the ordinary course of business, less the estimated cost of completion and applicable

variable selling expenses.

(13) Property, plant and equipment

- A. Property, plant and equipment are initially recorded at cost. Borrowing costs incurred during the construction period are capitalised.
- B. Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably. The carrying amount of the replaced part is derecognised. All other repairs and maintenance are charged to profit or loss during the financial period in which they are incurred.
- C. Land is not depreciated. Other property, plant and equipment apply cost model and are depreciated using the straight-line method to allocate their cost over their estimated useful lives. Each part of an item of property, plant, and equipment with a cost that is significant in relation to the total cost of the item must be depreciated separately.
- D. The assets' residual values, useful lives and depreciation methods are reviewed, and adjusted if appropriate, at each balance sheet date. If expectations for the assets' residual values and useful lives differ from previous estimates or the patterns of consumption of the assets' future economic benefits embodied in the assets have changed significantly, any change is accounted for as a change in estimate under IAS 8, 'Accounting Policies, Changes in Accounting Estimates and Errors', from the date of the change. The estimated useful lives of property, plant and equipment are as follows:

Buildings and structures	10~50 years
Machinery and equipment	5~10 years
Transportation equipment	5 years
Office equipment	5~10 years
Leasehold improvements	10 years

(14) Leasing arrangements (lessee) – right-of-use assets/ lease liabilities

- A. Leases are recognised as a right-of-use asset and a corresponding lease liability at the date at which the leased asset is available for use by the Group. For short-term leases or leases of low-value assets, lease payments are recognised as an expense on a straight-line basis over the lease term.
- B. Lease liabilities include the net present value of the remaining lease payments at the commencement date, discounted using the incremental borrowing interest rate. Lease payments are mainly fixed payments, less any lease incentives receivable.
The Group subsequently measures the lease liability at amortised cost using the interest method and recognises interest expense over the lease term. The lease liability is remeasured and the amount of remeasurement is recognised as an adjustment to the right-of-use asset when there are changes in the lease term or lease payments and such changes do not arise from contract modifications.
- C. At the commencement date, the right-of-use asset is stated at cost and the cost is mainly the

amount of the initial measurement of lease liability.

The right-of-use asset is measured subsequently using the cost model and is depreciated from the commencement date to the earlier of the end of the asset's useful life or the end of the lease term.

When the lease liability is remeasured, the amount of remeasurement is recognised as an adjustment to the right-of-use asset.

(15) Intangible assets

A. Trademark right and patent rights

Trademark right and patent rights are stated at cost, have a finite useful life and are amortised on a straight-line basis over its estimated useful life of 5 years.

B. Computer software

Computersoftwareis stated at cost and amortisedon a straight-line basis over its estimated useful life of 3~5 years.

C. Goodwill

Goodwill arises in a business combination accounted for by applying the acquisition method.

(16) Impairmentof non-financial assets

A. The Group assesses at each balance sheet date the recoverable amounts of those assets where there is an indication that they are impaired. An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs to sell or value in use. Except for goodwill, when the circumstances or reasons for recognising impairment loss for an asset in prior years no longer exist or diminish, the impairment is reversed. The increased carrying amount due to reversal should not be more than what the depreciated or amortised historical cost would have been if the impairment had not been recognised.

B. The recoverable amounts of goodwill shall be evaluated periodically. An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. Impairment loss of goodwill previously recognised in profit or loss shall not be reversed in the following years.

C. For the purpose of impairment testing, goodwill acquired in a business combination is allocated to each of the cash-generating units, or groups of cash-generating units, that is/are expected to benefit from the synergies of the business combination. Each unit or group of units to which the goodwill is allocated represents the lowest level within the entity at which the goodwill is monitored for internal management purposes. Goodwill is monitored at the operating segment level.

(17) Borrowings

Borrowings comprise long-term and short-term bank borrowings. Borrowings are recognised initially at fair value, net of transaction costs incurred. Borrowings are subsequently stated at amortised cost; any difference between the proceeds (net of transaction costs) and the redemption value is recognised in profit or loss over the period of the borrowings using the effective interest method.

(18) Notes and accounts payable

- A. Accounts payable are liabilities for purchases of raw materials, goods or services and notes payable are those resulting from operating and non-operating activities.
- B. The short-term notes and accounts payable without bearing interest are subsequently measured at initial invoice amount as the effect of discounting is immaterial.

(19) Derecognition of financial liabilities

A financial liability is derecognised when the obligation under the liability specified in the contract is discharged or cancelled or expires.

(20) Provisions

Provisions (primarily warranties) are recognised when the Group has a present legal or constructive obligation as a result of past events, and it is probable that an outflow of economic resources will be required to settle the obligation and the amount of the obligation can be reliably estimated.

Provisions are measured at the present value of the expenditures expected to be required to settle the obligation on the balance sheet date, which is discounted using a pre-tax discount rate that reflects the current market assessments of the time value of money and the risks specific to the obligation. When discounting is used, the increase in the provision due to passage of time is recognised as interest expense. Provisions are not recognised for future operating losses.

(21) Employee benefits

A. Short-term employee benefits

Short-term employee benefits are measured at the undiscounted amount of the benefits expected to be paid in respect of service rendered by employees in a period and should be recognised as expense in that period when the employees render service.

B. Pensions

(a) Defined contribution plans

For defined contribution plans, the contributions are recognised as pension expense when they are due on an accrual basis. Prepaid contributions are recognised as an asset to the extent of a cash refund or a reduction in the future payments.

(b) Defined benefit plans

- i. Net obligation under a defined benefit plan is defined as the present value of an amount of pension benefits that employees will receive on retirement for their services with the Group in current period or prior periods. The liability recognised in the balance sheet in respect of defined benefit pension plans is the present value of the defined benefit obligation at the balance sheet date less the fair value of plan assets, together with adjustments for unrecognised past service costs. The net defined benefit obligation is calculated annually by independent actuaries using the projected unit credit method. The rate used to discount is determined by using interest rates of government bonds (at the balance sheet date) of a currency and term consistent with the currency and term of the employment benefit obligations.

- ii. Remeasurement arising on defined benefit plans are recognised in other comprehensive income in the period in which they arise and are recorded as retained earnings.
- iii. Past service costs are recognised immediately in profit or loss.

C. Termination benefits

Termination benefits are employee benefits provided in exchange for the termination of employment as a result from the Group's decision to terminate an employee's employment before the normal retirement date, or an employee's decision to accept an offer of redundancy benefits in exchange for the termination of employment. The Group recognises termination benefits when it is demonstrably committed to a termination, when it has a detailed formal plan to terminate the employment of current employees and when it can no longer withdraw the plan. In the case of an offer made by the Group to encourage voluntary termination of employment, the termination benefits are recognised as expenses only when it is probable that the employees are expected to accept the offer and the number of the employees taking the offer can be reliably estimated. Benefits falling due more than 12 months after balance sheet date are discounted to their present value.

D. Employees', directors' and supervisors' remuneration

Employees', directors' and supervisors' remuneration are recognised as expense and liability, provided that such recognition is required under legal or constructive obligation and those amounts can be reliably estimated. Any difference between the resolved amounts and the subsequently actual distributed amounts is accounted for as changes in estimates. If employee compensation is distributed by shares, the Group calculates the number of shares based on the closing price at the previous day of the board meeting resolution.

(22) Income tax

- A. The tax expense for the period comprises current and deferred tax. Tax is recognised in profit or loss, except to the extent that it relates to items recognised in other comprehensive income or items recognised directly in equity, in which cases the tax is recognised in other comprehensive income or equity.
- B. The current income tax charge is calculated on the basis of the tax laws enacted or substantively enacted at the balance sheet date in the countries where the Company and its subsidiaries operate and generate taxable income. Management periodically evaluates positions taken in tax returns with respect to situations in accordance with applicable tax regulations. It establishes provisions where appropriate based on the amounts expected to be paid to the tax authorities. An additional 10% tax is levied on the unappropriated retained earnings and is recorded as income tax expense in the year the stockholders resolve to retain the earnings.
- C. Deferred income tax is recognised, using the balance sheet liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the consolidated financial statements. However, the deferred income tax is not accounted for if it arises from initial recognition of goodwill or of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting nor taxable profit or loss. Deferred income tax is provided on temporary differences arising on investments in subsidiaries, except where the timing of the reversal of the temporary difference is controlled by the Group and it is probable that the temporary difference will not reverse in the foreseeable

future. Deferred income tax is determined using tax rates (and laws) that have been enacted or substantially enacted by the balance sheet date and are expected to apply when the related deferred income tax asset is realised or the deferred income tax liability is settled.

- D. Deferred income tax assets are recognised only to the extent that it is probable that future taxable profit will be available against which the temporary differences can be utilised. At each balance sheet date, unrecognised and recognised deferred income tax assets are reassessed.
- E. Current income tax assets and liabilities are offset and the net amount reported in the balance sheet when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis or realise the asset and settle the liability simultaneously. Deferred income tax assets and liabilities are offset on the balance sheet when the entity has the legally enforceable right to offset current tax assets against current tax liabilities and they are levied by the same taxation authority on either the same entity or different entities that intend to settle on a net basis or realise the asset and settle the liability simultaneously.

(23) Sharecapital

Ordinary shares are classified as equity. Incremental costs directly attributable to the issue of new shares or stock options are shown in equity as a deduction, net of tax, from the proceeds.

(24) Dividends

Dividends are recorded in the Company's financial statements in the period in which they are approved by the Company's shareholders. Cash dividends are recorded as liabilities; stock dividends are recorded as stock dividends to be distributed and are reclassified to ordinary shares on the effective date of new shares issuance.

(25) Revenuerecognition

A. Sales revenue

- (a) The Group manufactures and sells uninterrupted power supply equipment and system, improved power quality system and equipment and solar energy equipment and other related products. Sales are recognised when control of the products has transferred, being when the products are delivered to the wholesaler, the wholesaler has full discretion over the channel and price to sell the products, and there is no unfulfilled obligation that could affect the wholesaler's acceptance of the products. Delivery occurs when the products have been shipped to the specific location, the risks of obsolescence and loss have been transferred to the wholesaler, and either the wholesaler has accepted the products in accordance with the sales contract, or the Group has objective evidence that all criteria for acceptance have been satisfied.
- (b) The Group's obligation to provide a repair for faulty products under the standard warranty terms is recognised as a provision.
- (c) A receivable is recognised when the goods are delivered as this is the point in time that the consideration is unconditional because only the passage of time is required before the payment is due.

B. Sale of goods—Project construction

- (a) The Group provides sales services related to uninterruptible power system and equipment, improved power quality system and equipment and solar energy system and equipment. The project construction revenue includes equipment sales and installation services, and the contract involves and provides integrated services. Therefore, the equipment and installation are indistinguishable and are regarded as a single performance obligation. The Group installs equipment, the customer performs the acceptance procedure, and the Group opens the warranty book. The customer obtains the control of the equipment and the benefits arising therefrom. When all the acceptance criteria are met, the Group completes the contractual performance obligated of contract to recognize revenue.
- (b) The Group's obligation to provide a repair for project construction under the standard warranty terms is recognised as a provision.
- (c) A receivable is recognized when the project construction is completed and the warranty book is delivered to the customer. As this is the point in time that the consideration is unconditional because only the passage of time is required before the payment is due.

C. Service revenue

The Group provides related services of maintaining uninterruptible power supply equipment, improved power quality system and equipment and solar energy system and equipment. Service revenue is recognized as income during the financial reporting period in which the services are provided to customers. Revenue from fixed price contracts is recognised as a percentage of the number of months of service actually provided on the balance sheet date. The customer pays the contract price in accordance with the payment schedule agreed upon, and is recognized as a contract assets when the services provided by the Group exceed the customers' payables, and are recognized as contract liabilities if the customer pays more than the services provided by the Group.

D. Costs of obtaining a customer contract

Given that the contractual period lasts less than one year, the Group recognises the incremental costs of obtaining a contract as an expense when incurred although the Group expects to recover those costs.

(26) Operating segments

Operating segments are reported in a manner consistent with the internal reporting provided to the Chief Operating Decision-Maker. The Group's Chief Operating Decision-Maker, who is responsible for allocating resources and assessing performance of the operating segments, has been identified as the Board of Directors that makes strategic decisions.

5. Critical Accounting Judgements, Estimates and Key Sources of Assumption Uncertainty

The preparation of these consolidated financial statements requires management to make critical judgements in applying the Group's accounting policies and make critical assumptions and estimates

concerning future events. Assumptions and estimates may differ from the actual results and are continually evaluated and adjusted based on historical experience and other factors. Such assumptions and estimates have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year; and the related information is addressed below:

(1) Critical judgements in applying the Group's accounting policies

None.

(2) Critical accounting estimates and assumptions

A. Evaluation of inventories

Evaluation of inventories are stated at the lower of cost and net realisable value, the Group must determine the net realisable value of inventories on balance sheet date using judgements and estimates. Due to the rapid technology innovation, the Group evaluates the amounts of normal inventory consumption, obsolete inventories or inventories without market selling value on balance sheet date, and writes down the cost of inventories to the net realisable value. Such an evaluation of inventories is principally based on the demand for the products within the specified period in the future. Therefore, there might be material changes to the evaluation.

As of December 31, 2020, the Group's carrying amount of inventories was \$1,119,250.

B. Estimation of provisions for liabilities

The sale of goods requires consideration of the cost incurred or to be incurred in connection with the transaction. Therefore, the Group formulates the proposed policy for the determination of the warranty for the sale of the product, which is used to measure the actual operating profit and loss of the company. The Group's liability determination is based on the Group's policy based on the historical warranty data of the product as the basis for the assessment, and the related product warranty liabilities are estimated to estimate the future maintenance costs.

As of December 31, 2020, the Group estimated the liability provision to be \$47,720.

6. Details of Significant Accounts

(1) Cash and cash equivalents

	<u>December 31, 2020</u>	<u>December 31, 2019</u>
Cash on hand and revolving funds	\$ 883	\$ 876
Checking accounts and demand deposits	284,106	211,864
Time deposits	<u>12,084</u>	<u>11,929</u>
	297,073	224,669
Transferred to 'Other current assets'	<u>(194)</u>	<u>(194)</u>
	<u>\$ 296,879</u>	<u>\$ 224,475</u>

A. The Group transacts with a variety of financial institutions all with high credit quality to disperse credit risk, so it expects that the probability of counterparty default is remote.

B. For details on cash and cash equivalents provided as a pledge or collateral, please refer to Note 8.

(2) Financial assets at fair value through other comprehensive income

<u>Items</u>	<u>December 31, 2020</u>	<u>December 31, 2019</u>
Non-current items:		
Equity instruments		
Unlisted stocks	\$ <u>81,000</u>	\$ <u>81,000</u>

- A. The Group has elected to classify equity instruments that are considered to be strategic investments as financial assets at fair value through other comprehensive income. The fair value of such investments all amounted to \$81,000, as at December 31, 2020 and 2019.
- B. Amounts recognised in profit or loss and other comprehensive income in relation to the financial assets at fair value through other comprehensive income are \$162 and \$0 for the years ended December 31, 2020 and 2019, respectively.
- C. As at December 31, 2020 and 2019, without taking into account any collateral held or other credit enhancements, the maximum exposure to credit risk in respect of the amount that best represents the financial assets at fair value through other comprehensive income held by the Group was all \$81,000.
- D. Information relating to price risk of financial assets at fair value through other comprehensive income is provided in Note 12(2)(3).

(3) Financial assets at amortised cost

<u>Items</u>	<u>December 31, 2020</u>	<u>December 31, 2019</u>
Current items:		
Time deposits expiring beyond three months	\$ <u>13,131</u>	\$ <u>12,915</u>

- A. Amounts recognised in profit or loss in relation to financial assets at amortised cost are listed below:

	<u>2020</u>	<u>2019</u>
Interest income	\$ <u>-</u>	\$ <u>280</u>

- B. As at December 31, 2020 and 2019, without taking into account any collateral held or other credit enhancements, the maximum exposure to credit risk in respect of the amount that best represents the financial assets at amortised cost held by the Group was \$13,131 and \$12,915, respectively.
- C. The Group has not pledged financial assets at amortised cost to others as collateral.
- D. Information relating to credit risk and fair value of financial assets at amortised cost is provided in Note 12(2)(3).

(4) Notes and accounts receivable

	<u>December 31, 2020</u>	<u>December 31, 2019</u>
Notes receivable	\$ 17,395	\$ 32,715
Accounts receivable	\$ 492,499	\$ 537,255
Less: Allowance for bad debts — accounts receivable	(8,331)	(13,900)
	<u>\$ 484,168</u>	<u>\$ 523,355</u>

A. The ageing analysis of accounts receivable and notes receivable is as follows:

	<u>December 31, 2020</u>		<u>December 31, 2019</u>	
	<u>Accounts receivable</u>	<u>Notes receivable</u>	<u>Accounts receivable</u>	<u>Notes receivable</u>
Within 120 days	\$ 444,191	\$ 16,547	\$ 486,992	\$ 31,840
121 to 180 days	28,561	438	23,564	-
181 to 360 days	14,770	410	18,580	-
Over 361 days	4,977	-	8,119	875
	<u>\$ 492,499</u>	<u>\$ 17,395</u>	<u>\$ 537,255</u>	<u>\$ 32,715</u>

The above ageing analysis was based on invoice date.

- B. As at December 31, 2020 and 2019, accounts receivable and notes receivable were all from contracts with customers. And as of January 1, 2019, the balance of receivables from contracts with customers amounted to \$571,004.
- C. As at December 31, 2020 and 2019, without taking into account any collateral held or other credit enhancements, the maximum exposure to credit risk in respect of the amount that best represents the Group's notes and accounts receivable was \$17,395 and \$32,715; \$484,168 and \$523,355, respectively.
- D. The Group does not hold any collateral as security.
- E. Information relating to credit risk of accounts receivable and notes receivable is provided in Note 12(2).

(5) Inventories

	<u>December 31, 2020</u>		
	<u>Cost</u>	<u>Allowance for valuation loss</u>	<u>Book value</u>
Raw materials	\$ 275,299	(\$ 69,440)	\$ 205,859
Work in process	87,753	(5,090)	82,663
Semi-finished goods	184,888	(38,494)	146,394
Finished goods	122,501	(8,110)	114,391
Goods	168,131	(20,974)	147,157
Goods in transit	35,775	-	35,775
Unfinished constructions	387,011	-	387,011
	<u>\$ 1,261,358</u>	<u>(\$ 142,108)</u>	<u>\$ 1,119,250</u>

	December 31, 2019		
	Cost	Allowance for valuation loss	Book value
Raw materials	\$ 263,913	(\$ 69,003)	\$ 194,910
Work in process	78,191	(6,030)	72,161
Semi-finished goods	189,546	(37,048)	152,498
Finished goods	85,831	(7,748)	78,083
Goods	140,779	(15,355)	125,424
Goods in transit	58,857	-	58,857
Unfinished constructions	319,622	-	319,622
	<u>\$ 1,136,739</u>	<u>(\$ 135,184)</u>	<u>\$ 1,001,555</u>

The cost of inventories recognised as expense for the year:

	2020	2019
Cost of goods sold	\$ 1,713,844	\$ 1,810,796
Maintenance cost	43,328	33,248
Loss on decline in market value	5,880	13,075
Others	22,049	31,338
	<u>\$ 1,785,101</u>	<u>\$ 1,888,457</u>

(6) Property, plant and equipment

	2020							
	Land	Buildings	Machinery	Transportation equipment	Office equipment	Leasehold improvements	Others	Total

- A. The abovementioned equipment are all assets for its own use.
- B. The significant components of buildings include buildings, air conditioners, elevators and utility construction. Buildings are depreciated over 26 to 50 years, and others are depreciated over 10 to 20 years.
- C. Information about the property, plant and equipment that were pledged to others as collaterals is provided in Note 8.
- D. There were no borrowing costs capitalised as part of property, plant and equipment.

(7) Leasing arrangements – lessee

- A. The Group leases various assets including land, buildings (including land), transportation equipment and office equipment. Rental contracts are typically made for periods of 1 to 5 years. Lease terms are negotiated on an individual basis and contain a wide range of different terms and conditions. The lease agreements do not impose covenants, but leased assets may not be used as security for borrowing purposes.

- B. Short-term leases with a lease term of 12 months or less comprise buildings. Low-value assets comprise office equipment. On December 31, 2020 and 2019, payments of lease commitments for short-term leases amounted to \$492 and \$180, respectively.
- C. The carrying amount of right-of-use assets and the depreciation charge are as follows:

	<u>December 31, 2020</u>	<u>December 31, 2019</u>
	<u>Depreciation charge</u>	<u>Depreciation charge</u>
Land	\$ 889	\$ 901
Buildings (including land)	7,167	13,983
Transportation equipment	271	812
Office equipment	313	571
	<u>\$ 8,640</u>	<u>\$ 16,267</u>
	<u>2020</u>	<u>2019</u>
	<u>Depreciation charge</u>	<u>Depreciation charge</u>
Land	\$ 26	\$ 28
Buildings (including land)	10,904	11,122
Transportation equipment	541	691
Office equipment	258	269
	<u>\$ 11,729</u>	<u>\$ 12,110</u>

- D. For the years ended December 31, 2020 and 2019, the additions to right-of-use assets were \$4,770 and \$4,038, respectively.
- E. The information on profit and loss accounts relating to lease contracts is as follows:

	<u>2020</u>	<u>2019</u>
<u>Items affecting profit or loss</u>		
Interest expense on lease liabilities	\$ 503	\$ 742
Expense on short-term lease contracts	492	180
Expense on leases of low-value assets	216	132

- F. For the years ended December 31, 2020 and 2019, the Group's total cash outflow for leases were \$12,892 and \$12,884, respectively.
- G. Information about the right-of-use assets - land use right that were pledged to others as collateral is provided in Note 8.

(8) Other non-current assets

	<u>December 31, 2020</u>	<u>December 31, 2019</u>
Overdue receivable	\$ 41,372	\$ 35,228
Allowance for bad debts – overdue receivable	(41,372)	(35,228)
Prepayments for equipment	2,880	1,724
Guarantee deposits	12,273	11,221
Others	11,920	16,861
	<u>\$ 27,073</u>	<u>\$ 29,806</u>

(9) Short-term borrowings

<u>Type of borrowings</u>	<u>December 31, 2020</u>	<u>Interest rate range</u>	<u>Collateral</u>
Bank borrowings			
Unsecured borrowings	\$ 430,352	0.95% ~ 1.01%	None
Secured borrowings	<u>24,611</u>	3.45%	Please refer to Note 8
	<u>\$ 454,963</u>		
<u>Type of borrowings</u>	<u>December 31, 2019</u>	<u>Interest rate range</u>	<u>Collateral</u>
Bank borrowings			
Unsecured borrowings	\$ 410,250	0.97% ~ 2.75%	None
Secured borrowings	<u>21,525</u>	4.35%	Please refer to Note 8
	<u>\$ 431,775</u>		

(10) Long-term borrowings

<u>Type of borrowings</u>	<u>Borrowing period and repayment term</u>	<u>Interest rate range</u>	<u>Collateral</u>	<u>December 31, 2020</u>
Bank borrowings	Borrowing period is from May 22, 2020 to May 21, 2022, no need to repay if the exemption conditions are met.(Note 1)	1.00%	None	\$ 2,108
Installment-repayment borrowings				
Unsecured EUR borrowings	Borrowing period is from September 27, 2019 to September 27, 2021; interest is repayable monthly; principal is repayable in 24 installments from October 27, 2019.(Note 2)	0.40%	None	12,486

<u>Type of borrowings</u>	<u>Borrowing period and repayment term</u>	<u>Interest rate range</u>	<u>Collateral</u>	<u>December 31, 2020</u>
Unsecured EUR borrowings	Borrowing period is from July 3, 2020 to July 3, 2024; interest is repayable monthly; principal is repayable in 36 installments from August 3, 2021.(Note 3)	1.00%	None	12,257
Unsecured EUR borrowings	Borrowing period is from October 27, 2020 to December 31, 2026; interest is repayable half monthly from June 30, 2021; principal is repayable in 8 installments from June 30, 2023.(Note 4)	0.74%	None	3,425
Less: Current portion (shown as "other current liabilities")				(7,585)
				<u>\$ 22,691</u>

<u>Type of borrowings</u>	<u>Borrowing period and repayment term</u>	<u>Interest rate range</u>	<u>Collateral</u>	<u>December 31, 2019</u>
Installment-repayment borrowings				
Unsecured EUR borrowings	Borrowing period is from September 27, 2019 to September 27, 2021; interest is repayable monthly; principal is repayable in 24 installments from October 27, 2019.	0.40%	None	\$ 13,233
Less: Current portion (shown as "other current liabilities")				(7,550)
				<u>\$ 5,683</u>

Note 1:Ablerex-LATAM, a subsidiary of the Group, is eligible for Small and Medium Enterprise (SME) financing in the United States of America, and approved for Paycheck Protection Program (PPP) from local bank.

Note 2:Ablerex-IT, a subsidiary of the Group, received a bank notice in March 2020.Due to the COVID-19 pandemic, the bank suspended the instalments until September 2020 for a total of 7 instalments and the next repayment date was October 2020.

Note 3:Ablerex-IT, a subsidiary of the Group, was approved to apply for relief loan from the Italian government due to the impact of the COVID-19 pandemic.

Note 4:Ablerex-IT, a subsidiary of the Group, was approved to apply for a loan from the Italian government. This loan is provided by the Italian government to encourage the internationalization of Italian companies,the total amount of funding is EUR\$163,000, of which EUR\$65,200 are government grants.

(11) Other payables

	<u>December 31, 2020</u>	<u>December 31, 2019</u>
Payable for year-end bonus	\$ 44,649	\$ 40,920
Payable for wages and salaries	25,812	25,991
Payable for other short-term employee benefits	15,139	17,024
Compensation due to employee, directors and supervisors	8,394	8,618
Others	36,897	36,731
	<u>\$ 130,891</u>	<u>\$ 129,284</u>

(12) Provisions for liabilities -current

	<u>2020</u>	<u>2019</u>
Warranty:		
At January 1	\$ 40,441	\$ 31,959
Additional provisions	13,858	24,508
Used during the period	(6,579)	(16,026)
At December 31	<u>\$ 47,720</u>	<u>\$ 40,441</u>

The Group's provisions for warranties are primarily for uninterruptible power supplies and solar energy related products. The provisions for warranties are estimated based on historical warranty data of uninterruptible power supplies and solar energy related products.

(13) Pensions

A. (a) The Company has a defined benefit pension plan in accordance with the Labor Standards Law, covering all regular employees' service years prior to the enforcement of the Labor Pension Act on July 1, 2005 and service years thereafter of employees who chose to continue to be subject to the pension mechanism under the Law. Under the defined benefit pension plan, two units are accrued for each year of service for the first 15 years and one unit for each additional year thereafter, subject to a maximum of 45 units. Pension benefits are based on the number of units accrued and the average monthly salaries and wages of the last 6 months prior to retirement. The Company and its domestic subsidiaries contribute monthly an amount equal to 2% of the employees' monthly salaries and wages to the retirement fund deposited with Bank of Taiwan, the trustee, under the name of the independent retirement fund committee. Also, the Company and its domestic subsidiaries would assess the balance in the aforementioned labor pension reserve account by December 31, every year. If the account balance is insufficient to pay the pension calculated by the aforementioned method of the employees expected to qualify for retirement in the following year, the Company will make contributions to cover the deficit by next March.

(b) The amounts recognised in the balance sheet are as follows:

	<u>December 31, 2020</u>	<u>December 31, 2019</u>
Present value of funded defined benefit obligations	\$ (57,019)	\$ (56,160)
Fair value of plan assets	<u>34,444</u>	<u>32,746</u>
Net defined benefit liability	<u>(\$ 22,575)</u>	<u>(\$ 23,414)</u>

(c) Movements in net defined benefit liabilities are as follows:

	<u>2020</u>		
	<u>Present value of defined benefit obligations</u>	<u>Fair value of plan assets</u>	<u>Net defined benefit liability</u>
At January 1	\$ (56,160)	\$ 32,746	\$ (23,414)
Current service cost	(217)	-	(217)
Interest (expense) income	(417)	245	(172)
Upfront service cost	671	-	671
	<u>(56,123)</u>	<u>32,991</u>	<u>(23,132)</u>
Remeasurements:			
Return on plan assets (excluding amounts included in interest income or expense)	-	1,073	1,073
Change in demographic assumptions	(5)	-	(5)

Financial assumptions change	(1,561)	-	(1,561)
Experience adjustments	(1,070)	-	(1,070)
	<u>(2,754)</u>	<u>1,096</u>	<u>(1,658)</u>
Pension fund contribution	-	297	297
At December 31	<u>(\$ 56,160)</u>	<u>\$ 32,746</u>	<u>(\$ 23,414)</u>

(c) The Bank of Taiwan was commissioned to manage the Fund of the Company's defined benefit pension plan in accordance with the Fund's annual investment and utilisation plan and the "Regulations for Revenues, Expenditures, Safeguard and Utilisation of the Labor Retirement Fund" (Article 6: The scope of utilisation for the Fund includes deposit in domestic or foreign financial institutions, investment in domestic or foreign listed, over-the-counter, or private placement equity securities, investment in domestic or foreign real estate securitization products, etc.). With regard to the utilisation of the Fund, its minimum earnings in the annual distributions on the final financial statements shall be no less than the earnings attainable from the amounts accrued from two-year time deposits with the interest rates offered by local banks. If the earnings is less than aforementioned rates, government shall make payment for the deficit after being authorized by the Regulator. The Company and its domestic subsidiaries have no right to participate in managing and operating that fund and hence the Company and its domestic subsidiaries are unable to disclose the classification of plan assets fair value in accordance with IAS 19 paragraph 142. The composition of fair value of plan assets as of December 31, 2020 and 2019 is given in the Annual Labor Retirement Fund Utilisation Report announced by the government.

(d) The principal actuarial assumptions used were as follows:

	2020	2019
Discount rate	0.30%	0.75%
Future salary increases	2.00%	2.00%

Assumptions regarding future mortality experience are set based on the fifth Taiwan Standard Ordinary Experience Mortality Table (2012 TSO).

Because the main actuarial assumption changed, the present value of defined benefit obligation is affected. The analysis is as follows:

	Discount rate		Future salary increases	
	Increase 0.25%	Decrease 0.25%	Increase 0.25%	Decrease 0.25%
December 31, 2020				
Effect on present value of defined benefit	(\$ 1,529)	\$ 1,590	\$ 1,559	(\$ 1,507)
December 31, 2019				
Effect on present value of defined benefit	(\$ 1,566)	(\$ 1,630)	\$ 1,606	(\$ 1,551)

The sensitivity analysis above is based on one assumption which changed while the other conditions that remain unchanged. In practice, more than one assumption may change all at once. The method of analysing sensitivity and the method of calculating net pension liability in the balance sheet are the same. The methods and types of assumptions used in preparing the sensitivity analysis did not change compared to the previous period.

- (e) Expected contributions to the defined benefit pension plans of the Group for the year ending December 31, 2021 amount to \$928.
- (f) As of December 31, 2020, the weighted average duration of the retirement plan is 10 years. The analysis of timing of the future pension payment was as follows:

Within 1 year	\$ 2,034
1-2 year(s)	1,652
3-5 years	4,743
Over 5 years	50,208
	\$ 58,637

- B. (a) Effective July 1, 2005, the Company has established a defined contribution pension plan (the “New Plan”) under the Labour Pension Act (the “Act”), covering all regular employees with R.O.C. nationality. Under the New Plan, the Company contributes monthly an amount based on 6% of the employees’ monthly salaries and wages to the employees’ individual pension accounts at the Bureau of Labour Insurance. The benefits accrued are paid monthly or in lump sum upon termination of employment.
- (b) The Company’s mainland China indirect subsidiaries, Ablere Electronics (Suzhou) Co., Ltd. and Ablere Electronics (Beijing) Corporation Limited, have a defined contribution plan. Monthly contributions to an independent fund administered by the government in accordance with the pension regulations in the People’s Republic of China (PRC) are based on a certain percentage of employees’ monthly salaries and wages. The contribution percentage for the years ended December 31, 2020 and 2019 was both 20%. Other than the monthly contributions, the Group has no further obligations. Ablere Corporation,

AblerexLatamCorporation, Ablere Electronics (S) Pte. Ltd., Ablere Electronics (Thailand) Co Ltd., Ablere Electronics Italy S.R.L and Wada Denki Co., Ltd. have a defined contribution plan under the local regulations and have no further obligations. Other consolidated subsidiaries do not have any employees.

(c) The pension costs under the defined contribution pension plans of the Group for the years ended December 31, 2020 and 2019 were \$17,237 and \$26,470, respectively.

(14) Share capital

As of December 31, 2020, the Company’s authorised capital was \$800,000, consisting of 80 million shares of ordinary stock, and the paid-in capital was \$450,000 with a par value of \$10 (in dollars) per share. All proceeds from shares issued have been collected. The Group’s ordinary shares at the beginning of the period are the same with the outstanding shares at the end of the period.

(15) Capital surplus

A. Pursuant to the R.O.C. Company Act, capital surplus arising from paid-in capital in excess of par value on issuance of common stocks and donations can be used to cover accumulated deficit or to issue new stocks or cash to shareholders in proportion to their share ownership, provided that the Company has no accumulated deficit. Further, the R.O.C. Securities and Exchange Law requires that the amount of capital surplus to be capitalized mentioned above should not exceed 10% of the paid-in capital each year. However, capital surplus should not be used to cover accumulated deficit unless the legal reserve is insufficient.

B. The shareholders resolved to appropriate capital surplus in cash at their meeting on June 19, 2020:

	Year ended December 31, 2019	
	Amount	Cash per share (in dollars)
Capital surplus appropriated in cash	\$ 13,500	\$ 0.30

The cash appropriation of capital surplus is in agreement with the proposal submitted by the Board of Directors.

(16) Retained earnings

A. Under the Company’s Articles of Incorporation, the current year’s earnings, if any, shall first be used to pay all taxes and offset prior years’ operating losses and then 10% of the remaining amount shall be set aside as legal reserve unless the accumulated legal reserve has reached the total capital stock balance. Special reserve shall be appropriated in accordance with related regulations promulgated by competent authorities, and the special reserve along with the accumulated unappropriated retained earnings from previous years is considered as the distributable earnings. The remainder, if any, after considering the operating status, and through a proposition by the Board of Directors and a resolution by the shareholders, shall be retained.

B. The Company’s dividend policy is based on the Company’s current operation status, future capital requirements, long-term operation plan, shareholders’ benefits, balanced dividends and the Company’s long-term financial plan, etc. The appropriation is proposed by the Board of Directors and then approved by the shareholders during their meeting. Cash dividends shall not

be less than 20% of the total dividends distributed to shareholders.

- C. Except for covering accumulated deficit or issuing new stocks or cash to shareholders in proportion to their share ownership, the legal reserve shall not be used for any other purpose. The use of legal reserve for the issuance of stocks or cash to shareholders in proportion to their share ownership is permitted, provided that the distribution of the reserve is limited to the portion in excess of 25% of the Company's paid-in capital.
- D. In accordance with the regulations, the Company shall set aside special reserve from the debit balance on other equity items at the balance sheet date before distributing earnings. When the debit balance on other equity items is reversed subsequently, the reversed amount may be included in the distributable earnings.
- E. The appropriation of 2019 earnings as proposed by the shareholders on June 19, 2020 and the appropriation of 2018 earnings as resolved by the shareholders on June 18, 2019 are as follows:

	Year ended December 31, 2019		Year ended December 31, 2018	
	Amount	Dividend per share (in dollars)	Amount	Dividend per share (in dollars)
Legal reserve	\$ 3,639		\$ 7,316	
Special reserve	17,841		4,907	
Cash dividends	31,500	\$ 0.70	67,500	\$ 1.50

(17) Sales revenue

	2020	2019
Sales revenue	\$ 1,293,337	\$ 1,428,842
Project construction revenue	979,076	958,810
Service revenue	89,510	74,738
	<u>\$ 2,361,923</u>	<u>\$ 2,462,390</u>

A. Disaggregation of revenue from contracts with customers

The Group derives revenue from the transfer of goods and services over time and at a point in time in the following:

Year ended December 31, 2020	First Business Division	Second Business Division	Technical Services Division	Energy Division	Reconciliation and elimination	Total
Revenue from external customer contracts	\$ 826,251	\$ 1,060,372	\$ 219,392	\$ 255,908	\$ -	\$ 2,361,923
Inter-segment revenue	88,276	1,943,214	-	-	(2,031,490)	-

Others	(474)	(946)
	<u>(\$ 5,050)</u>	<u>\$ 9,705</u>

(21) Finance costs

	<u>2020</u>	<u>2019</u>
Interest expense	\$ 6,143	\$ 5,497

(22) Expenses by nature

By function \ By nature	2020			2019		
	Operating costs	Operating expenses	Total	Operating costs	Operating expenses	Total
Employee benefit expense	\$ 188,432	\$ 330,412	\$ 518,844	\$ 216,349	\$ 328,337	\$ 544,686
Depreciation charges	33,169	32,771	65,940	37,263	34,363	71,626
Amortization charges	338	9,266	9,604	145	9,738	9,883

(23) Employee benefit expense

	<u>2020</u>	<u>2019</u>
Wages and salaries	\$ 447,561	\$ 459,445
Labor and health insurance fees	38,617	41,320
Pension costs	16,955	26,762
Directors' remuneration	1,460	874
Other personnel expenses	14,251	16,285
	<u>\$ 518,844</u>	<u>\$ 544,686</u>

A. In accordance with the Articles of Incorporation of the Company, a ratio of distributable profit of the current year, after covering accumulated losses, shall be distributed as employees' compensation and directors' and supervisors' remuneration. The ratio shall be 6% to 10% for

employees compensation and shall not be higher than 2% for directors' and supervisors' remuneration.

- B. For the years ended December 31, 2020 and 2019, employees' compensation was accrued at \$3,263 and \$2,717, respectively; while directors' and supervisors' remuneration was accrued at \$1,088 and \$906, respectively. The aforementioned amounts were recognized in salary expenses. The employees' compensation and directors' and supervisors' remuneration were estimated and accrued based on 6% and 2% of distributable profit of current year for the year ended December 31, 2020.

The difference of \$113 between employees' compensation (directors' and supervisors' remuneration) as resolved by the Board of Directors and the amount recognised in the 2019 financial statements of \$2,717, \$906 had been adjusted in profit or loss for 2020. The appropriation was in the form of cash.

Information about the appropriation of employees' compensation (bonus) and directors' and supervisors' remuneration by the Company as proposed by the Board of Directors and resolved will be posted in the "Market Observation Post System" at the website of the Taiwan Stock Exchange.

(24) Income tax

A. Income tax expense

(a) Components of income tax expense:

	2020	2019
Current tax:		
Current tax on profit for the period	\$ 15,867	\$ 11,423
Prior year income tax overestimation	(2,238)	(4,333)
Total current tax	13,629	7,090
Deferred tax:		
Origination and reversal of temporary differences	4,434	(4,300)
Income tax expense	\$ 18,063	\$ 2,790

- (b) The income tax (charge)/credit relating to components of other comprehensive income are as follows:

	2020	2019
Currency translation differences	\$ 43	(\$ 4,460)
Remeasurement of defined benefit obligations	35	(331)
Impact of change in tax rate	-	-
	\$ 78	(\$ 4,791)

B. Reconciliation between income tax expense and accounting profit:

	<u>2020</u>	<u>2019</u>
Tax calculated based on profit before tax and statutory tax rate	\$ 20,847	\$ 10,828
Expenses that should be excluded according to tax laws	(17)	-

Employees' compensation	-	118	
Profit attributable to ordinary shareholders of the parent plus assumed conversion of all dilutive potential ordinary shares	\$ 39,500	45,118	\$ 0.88

(26) Transactions with non-controlling interest

A. Disposal of equity interest in a subsidiary (that did not result in a loss of control)

On May 28, 2020, the Group disposed of 1% of its shares of its subsidiary—AblereX-JP for a total cash consideration of \$83. The carrying amount of non-controlling interest in AblereX-JP was \$102 at the disposal date. This transaction resulted in an increase in the non-controlling interest by \$19 and a decrease in the equity attributable to owners of the parent by \$19. The effect of changes in interests in AblereX-JP on the equity attributable to owners of the parent for the year ended December 31, 2020 is shown below:

	December 31, 2020
Carrying amount of non-controlling interest disposed	\$ 102
Consideration received from non-controlling interest	(83)
Capital surplus	
- recognition of changes in ownership interest in subsidiaries	\$ 19

B. Subsidiary, AblereX-Latam, of the Group increased its capital to employees on February 7, 2019.

As a result, the Group decreased its share interest by 14%. The transaction increased non-controlling interest by \$1,784 and decreased the equity attributable to owners of parent by \$1,784.

(27) Changes in liabilities from financing activities

8. Pledged Assets

The Group's assets pledged as collateral are as follows:

<u>Pledged assets</u>	<u>Book value</u>		<u>Purpose</u>
	<u>December 31, 2020</u>	<u>December 31, 2019</u>	
Other current assets	\$ 194	\$ 194	Performance guarantee for contracts
– time deposits			
Property, plant and equipment	111,726	115,203	Short-term borrowings or guarantee for line of credit
– land and buildings			
Right-of-use assets			Short-term borrowings or guarantee for line of credit
– land use rights	889	901	
	<u>\$ 112,809</u>	<u>\$ 116,298</u>	

9. Significant Contingent Liabilities and Unrecognized Contract Commitments

(1) Contingencies

None.

(2) Commitments

A. As of December 31, 2020 and 2019, other than the details of contingencies and commitments between the Group and related parties as provided in Note 7(2) E, contingencies and commitments between the Group and third parties are as follows:

Capital expenditure contracted for at the balance sheet date but not yet incurred

	<u>December 31, 2020</u>	<u>December 31, 2019</u>
Intangible assets	\$ 95	\$ 381

Warranty and performance guarantee

As of December 31, 2020 and 2019, promissory notes issued for the warranty and performance guarantee of sales amounted to \$92,039 and \$82,229, respectively.

B. Details of endorsements/guarantees provided by the Company to subsidiaries are provided in Note 13(1) B.

1. Significant Disaster Loss

None.

2. Significant Events after the Balance Sheet Date

(1) The appropriations of 2020 earnings had been proposed by the Board of Directors on March 19, 2021. Details are summarized below:

	2020	
	Amount	Dividends per share
Legal reserve	\$ 4,204	
Special reserve	(173)	
Cash dividends	45,000	\$ 1.00

As of March 19, 2021, the appropriations of 2020 earnings has not been resolved at the stockholders' meeting.

3. Others

(1) Capital management

The Group's objectives when managing capital are to safeguard the Group's ability to continue as a going concern in order to provide returns for shareholders and to maintain an optimal capital structure with reasonable cost of funds. In order to maintain or adjust the capital structure, the Group may adjust the amount of dividends paid to shareholders, return capital to shareholders, issue new shares or sell assets to reduce debt. The Group monitors capital on the basis of the gearing ratio. This ratio is calculated as total liabilities divided by total assets.

In 2020, the Group's strategy, which was unchanged from 2019, was to maintain the gearing ratio of about 40%. The gearing ratios at December 31, 2020 and 2019 were as follows:

	December 31, 2020	December 31, 2019
Total liabilities	\$ 1,485,857	\$ 1,372,989
Total equity	1,479,442	1,481,332
Total assets	\$ 2,965,299	\$ 2,854,321
Gearing ratio	50%	48%

(2) Financial instruments

A. Financial instruments by category

	<u>December 31, 2020</u>	<u>December 31, 2019</u>
<u>Financial assets</u>		
Financial assets at amortised cost		
Cash and cash equivalents	\$ 296,879	\$ 224,475
Financial assets at amortised cost	13,131	12,915
Notes receivable	17,395	32,715
Accounts receivable		
(including related parties)	501,173	540,371
Other receivables	9,550	6,495
Guarantee deposits paid	12,273	11,221
Other financial assets	194	194
	<u>\$ 850,595</u>	<u>\$ 828,386</u>
<u>Financial liabilities</u>		
Financial liabilities at amortised cost through profit or loss		
Short-term borrowings	\$ 454,963	\$ 431,775
Notes payable	3,936	7,006
Accounts payable	459,850	440,029
Other accounts payable	130,891	129,284
Long-term borrowings		
(including current portion)	30,276	13,233
Guarantee deposits received	71	70
	<u>\$ 1,079,987</u>	<u>\$ 1,021,397</u>
Lease liability		
(including related parties)	<u>\$ 8,006</u>	<u>\$ 15,606</u>

B. Financial risk management policies

- (a) The Group's activities expose it to a variety of financial risks: market risk (including foreign exchange risk, interest rate risk and price risk), credit risk and liquidity risk. To minimise any adverse effects on the financial performance of the Group, derivative financial instruments, such as foreign exchange forward contracts and foreign currency option contracts are used to hedge certain exchange rate risk, and interest rate swaps are used to fix variable future cash flows. Derivatives are used exclusively for hedging purposes and not as trading or speculative instruments.
- (b) Risk management is carried out by a central treasury department (Group treasury) under policies approved by the board of directors. Group treasury identifies, evaluates and hedges financial risks in close cooperation with the Group's operating units. The Board provides written principles for overall risk management, as well as written policies covering specific areas and matters, such as foreign exchange risk, interest rate risk, credit risk, use of derivative financial instruments and non-derivative financial instruments, and investment of excess liquidity.

C. Significant financial risks and degrees of financial risks

(a) Market risk

Foreign exchange risk

- i. The Group operates internationally and is exposed to foreign exchange risk arising from various currency exposures, primarily with respect to the USD and RMB. Foreign exchange risk arises from future commercial transactions and recognised assets and liabilities.
- ii. Management has set up a policy to require group companies to manage their foreign exchangerisk against their functional currency. The companies are required to hedge their entire foreign exchange risk exposure with the Group treasury. Exchange rate risk is measured through a forecast of highly probable USD and RMB expenditures. Forward foreign exchange contracts are adopted to minimise the volatility of the exchange rate affecting cost of forecast inventory purchases.
- iii. The Group's businesses involve some non-functional currency operations (the Company's functional currency: NTD; other certain subsidiaries' functional currency: USD and RMB). The information on assets and liabilities denominated in foreign currencies whose values would be materially affected by the exchange rate fluctuations is as follows:

	December 31, 2020			2020		
	Foreign currency amount (In thousands)	Exchange rate	Book value (NTD)	Sensitivity Analysis		
				Degree of variation	Effect on profit or loss before tax	Effect on other comprehensive income
(Foreign currency: Functional currency)						
<u>Financial assets</u>						
<u>Monetary items</u>						
USD:NTD	\$ 5,857	28.4800	\$ 166,807	1%	\$ 1,668	\$ -
RMB:NTD	3,102	4.3770	13,577	1%	136	-
JPY:NTD	10,427	0.2763	2,881	1%	29	-
USD:RMB	499	6.5067	14,211	1%	142	-
SGD:USD	1,241	0.7570	26,755	1%	268	-
<u>Financial liabilities</u>						
<u>Monetary items</u>						
USD:NTD	\$ 2,063	28.4800	\$ 58,754	1%	\$ 588	\$ -
USD:RMB	621	6.5067	17,686	1%	177	-
SGD:USD	414	0.7570	8,926	1%	89	-

(Foreign currency: Functional currency)	December 31, 2019			2019		
	Foreign currency amount (In thousands)	Exchange rate	Book value (NTD)	Degree of variation	Effect on profit or loss before tax	Effect on other comprehensive income
<u>Financial assets</u>						
<u>Monetary items</u>						
USD:NTD	\$ 6,307	29.98	\$ 189,084	1%	\$ 1,891	\$ -
RMB:NTD	4,477	4.305	19,273	1%	193	-
JPY:NTD	17,874	0.276	4,933	1%	49	-
USD:RMB	848	6.964	25,423	1%	254	-
SGD:USD	615	0.7432	13,703	1%	137	-
<u>Financial liabilities</u>						
<u>Monetary items</u>						
USD:NTD	\$ 1,883	29.98	\$ 56,452	1%	\$ 565	\$ -
USD:RMB	387	6.964	11,602	1%	116	-
SGD:USD	182	0.7432	4,055	1%	41	-

iv. The total exchange gain arising from significant foreign exchange variation on the monetary items held by the Group for the years ended December 31, 2020 and 2019 amounted to (\$3,998) and \$11,124, respectively.

Price risk

- i. The Group's equity securities, which are exposed to price risk, are the held financial assets at fair value through profit or loss and financial assets at fair value through other comprehensive income. To manage its price risk arising from investments in equity securities, the Group diversifies its portfolio. Diversification of the portfolio is done in accordance with the limits set by the Group.
- ii. The Group's investments in equity securities comprise unlisted shares issued by the domestic companies. The prices of equity securities would change due to the change of the future value of investee companies. If the prices of these equity securities had increased/decreased by 1% with all other variables held constant, other components of equity would have increased/decreased by both \$810, as a result of other comprehensive income classified as equity investment at fair value through other comprehensive income.

Cash flow and fair value interest rate risk

The Group's borrowings are mostly with fixed interest rate and maturity within one year. Therefore, the Group does not expect to be exposed to significant interest rate risk.

(b) Credit risk

- i. Credit risk refers to the risk of financial loss to the Group arising from default by the clients on the contract obligations. The main factor is that counterparties could not repay in full the contract cash flows of accounts receivable, notes receivable and amortized cost financial assets based on the agreed terms.
- ii. The Group manages their credit risk taking into consideration the entire group's concern.

For banks and financial institutions, only independently rated parties with a minimum rating of investment grade or above are accepted. According to the Group's credit policy, each local entity in the Group is responsible for managing and analysing the credit risk for each of their new clients before standard payment and delivery terms and conditions are offered. Internal risk control assesses the credit quality of the customers, taking into account their financial position, past experience and other factors. Individual risk limits are set based on internal or external ratings in accordance with limits set by the management. The utilisation of credit limits is regularly monitored. The main credit risk arises from wholesale and retail customers, including outstanding receivables.

- iii. The Group adopts the assumptions under IFRS 9, there has been a significant increase in credit risk on that instrument since initial recognition, when the contract payments were past due over 30 days.
- iv. The Group adopts the assumptions under IFRS 9, the default occurs when the contract payments are past due over 90 days.
- v. The following indicators are used to determine whether the credit impairment of debt instruments has occurred:
 - (i) It becomes probable that the issuer will enter bankruptcy or other financial reorganization due to their financial difficulties;
 - (ii) Default or delinquency in interest or principal repayments;
 - (iii) Adverse changes in national or regional economic conditions that are expected to cause a default.
- vi. The Group classifies customers' accounts receivable in accordance with sales area. The Group applies the modified approach using provision matrix to estimate expected credit loss under the provision matrix basis.
- vii. The Group wrote-off the financial assets, which cannot be reasonably expected to be recovered, after initiating recourse procedures. However, the Group will continue executing the recourse procedures to secure their rights. On December 31, 2020 and 2019, the Group's written-off financial assets that are still under recourse procedures amounted to \$41,372 and \$35,228, respectively.
- viii. The Group used the forecastability of Taiwan Institute of Economic Research boom observation report to adjust historical and timely information to assess the default possibility of accounts receivable. On December 31, 2020 and 2019, the provision matrix is as follows:

	Not overdue	Overdue within 30 days	Overdue within 60 days	Overdue within 90 days	Overdue for more than 90 days	Total
<u>At December 31, 2020</u>						
Expected loss rate	0.03%	0.11~9.31%	23~49%	24~61%	50~100%	
Total book value	\$ 442,607	\$ 12,636	\$ 11,974	\$ 15,974	\$ 9,308	\$ 492,499
Loss allowance	133	168	1,498	4,080	2,452	8,331
<u>At December 31, 2019</u>						
Expected loss rate	0.03%	0.17~1.28%	37~71%	38~84%	50~100%	
Total book value	\$ 496,139	\$ 12,847	\$ 8,260	\$ 3,584	\$ 16,425	\$ 537,255
Loss allowance	149	164	3,829	1,545	8,213	13,900

ix. Movements in relation to the Group applying the modified approach to provide loss allowance for accounts receivable are as follows:

	2020	
	Accounts receivable	Overdue receivable
At January 1	\$ 13,900	\$ 35,228
Provision for impairment loss	959	-
Effect of foreign exchange	(5)	(379)
Transfer	(6,523)	6,523
At December 31	<u>\$ 8,331</u>	<u>\$ 41,372</u>
	2019	
	Accounts receivable	Overdue receivable
At January 1	\$ 16,063	\$ 35,395
Reversal of impairment loss	(2,033)	-
Effect of foreign exchange	(130)	(167)
At December 31	<u>\$ 13,900</u>	<u>\$ 35,228</u>

(c)Liquidity risk

- i. Cash flow forecasting is performed in the operating entities of the Group and aggregated by Group treasury. Group treasury monitors rolling forecasts of the Group's liquidity requirements to ensure it has sufficient cash to meet operational needs.
- ii. Surplus cash held by the operating entities over and above balance required for working capital management are transferred to the Group treasury. Group treasury invests surplus cash in interest bearing current accounts, time deposits and other cash equivalents, choosing instruments with appropriate maturities or sufficient liquidity to provide sufficient head-room as determined by the above-mentioned forecasts.

iii. The Group has the following undrawn borrowing facilities:

	December 31, 2020	December 31, 2019
Fixed rate:		
Expiring within one year	\$ 903,352	\$ 814,304

iv. The table below analyses the Group's non-derivative financial liabilities into relevant maturity groupings based on the remaining period at the balance sheet date to the contractual maturity date. The amounts disclosed in the table are the contractual undiscounted cash flows.

Non-derivative financial liabilities

December 31, 2020	Less than 3 months	Between 3 months and 1 year	Over 1 year	Book value
Short-term borrowings	\$ 443,051	\$ 12,814	\$ -	\$ 455,865
Notes payable	3,936	-	-	3,936
Accounts payable	444,310	15,540	-	459,850
Other payables	113,764	10,386	6,741	130,891
Lease liability	2,935	3,581	1,698	8,214
Long-term borrowings (including current portion)	190	7,704	22,844	30,738

December 31, 2019	Less than 3 months	Between 3 months and 1 year	Over 1 year	Book value
Short-term borrowings	\$ 411,344	\$ 21,525	\$ -	\$ 432,869
Notes payable	7,006	-	-	7,006
Accounts payable	428,784	11,245	-	440,029
Other payables	116,088	12,212	984	129,284
Lease liability	2,748	7,831	5,558	16,137
Long-term borrowings (including current portion)	1,897	5,753	7,671	15,321

iv. The Group does not expect the timing of occurrence of the cash flows estimated through the maturity date analysis will be significantly earlier, nor expect the actual cash flow amount will be significantly different.

(3) Fair value information

A. The different levels that the inputs to valuation techniques are used to measure fair value of financial and non-financial instruments have been defined as follows:

Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date. A market is regarded as active where a

market in which transactions for the asset or liability take place with sufficient frequency and volume to provide pricing information on an ongoing basis.

Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly.

Level 3: Unobservable inputs for the asset or liability. The fair value of the Group's investment in unlisted stocks is included in Level 3.

B. Financial instruments not measured at fair value.

The Group's carrying amounts of cash and cash equivalents, notes receivable, accounts receivable, other receivables, accounts payable and other payables are approximate to their fair values. The carrying amounts are provided in Note 12(2) A.

C. The related information of financial and non-financial instruments measured at fair value by level on the basis of the nature, characteristics and risks of the assets and liabilities is as follows:

The related information of natures of the assets and liabilities is as follows:

<u>December 31, 2020</u>	<u>Level 1</u>	<u>Level 2</u>	<u>Level 3</u>	<u>Total</u>
Assets				
<u>Recurring fair value measurements</u>				
Financial assets at fair value through other comprehensive income				
Equity securities	\$ -	\$ -	\$ 81,000	\$ 81,000
<hr/>				
<u>December 31, 2019</u>	<u>Level 1</u>	<u>Level 2</u>	<u>Level 3</u>	<u>Total</u>
Assets				
<u>Recurring fair value measurements</u>				
Financial assets at fair value through other comprehensive income				
Equity securities	\$ -	\$ -	\$ 81,000	\$ 81,000

D. The methods and assumptions the Group used to measure fair value are as follows:

(a) When assessing non-standard and low-complexity financial instruments, for example, debt instruments without active market, interest rate swap contracts, foreign exchange swap contracts and options, the Group adopts valuation technique that is widely used by market participants. The inputs used in the valuation method to measure these financial instruments are normally observable in the market.

(b) The valuation of derivative financial instruments is based on valuation model widely accepted by market participants, such as present value techniques and option pricing models. Forward exchange contracts are usually valued based on the current forward exchange rate.

E. For the years ended December 31, 2020 and 2019, there was no transfer between Level 1 and Level 2.

F. For the years ended December 31, 2020 and 2019, there was no transfer into or out from Level 3.

G. Financial segment is in charge of valuation procedures for fair value measurements being

categorized within Level 3, which is to verify independent fair value of financial instruments. Such assessment is to ensure the valuation results are reasonable by applying independent information to make results close to current market conditions, confirming the resource of information is independent, reliable and in line with other resources and represented as the exercisable price, and frequently calibrating valuation model, performing back-testing, updating inputs used to the valuation model and making any other necessary adjustments to the fair value.

H. The following is the qualitative information of significant unobservable inputs and sensitivity analysis of changes in significant unobservable inputs to valuation model used in Level 3 fair value measurement:

	Fair value at December 31, 2020	Valuation technique	Significant unobservable input	Range (weighted average)	Relationship of inputs to fair value
Non-derivative equity instrument: Unlisted shares	\$ 81,000	Market comparable companies	Discount for lack of marketability	30%	The higher the discount for lack of marketability, the lower the fair value
	Fair value at December 31, 2019	Valuation technique	Significant unobservable input	Range (weighted average)	Relationship of inputs to fair value
Non-derivative equity instrument: Unlisted shares	\$ 81,000	Market comparable companies	Discount for lack of marketability	25%	The higher the discount for lack of marketability, the lower the fair value

13. Supplementary Disclosures

(1) Significant transaction information

The Group discloses related information of the following for the year ended December 31, 2020:

A. Loans to others: Please refer to table 1.

B. Provision of endorsements and guarantees to others: Please refer to table 2.

C. Holding of marketable securities at the end of the period (not including subsidiaries, associates and joint ventures): Please refer to table 3.

D. Acquisition or sale of the same security with the accumulated cost exceeding \$300 million or 20% of the Company's paid-in capital: None.

E. Acquisition of real estate reaching \$300 million or 20% of paid-in capital or more: None.

F. Disposal of real estate reaching \$300 million or 20% of paid-in capital or more: None.

G. Purchases or sales of goods from or to related parties reaching \$100 million or 20% of paid-in

capital or more: Please refer to table 4.

H. Receivables from related parties reaching \$100 million or 20% of paid-in capital or more: Please refer to table 5.

I. Derivative financial instruments undertaken for the year ended December 31, 2020: None.

J. Significant inter-company transactions for the year ended December 31, 2020: Please refer to table 6.

(2) Information on investees (not including investees in Mainland China)

Please refer to table 7.

(3) Information on investments in Mainland China

A. Basic information: Please refer to table 8.

B. Significant transactions, either directly or indirectly through a third area, with investee companies in the Mainland Area:

(a) Purchasing amount and percentage and related receivables' percentage and balance at December 31, 2020: Please refer to tables 6 and 9.

(b) Selling amount and percentage and related receivables' percentage and balance at December 31, 2020: Please refer to tables 6 and 9.

(c) Property transaction amounts and gains and loss arising from them: None.

(d) Balance and purpose of provision of endorsements/guarantees or collaterals at December 31, 2020: None.

(e) Maximum balance, ending balance, interest rate range and interest for financing during the year ended and at December 31, 2020: Please refer to table 1.

(f) Other significant transactions that affected the gains and loss or financial status for the period, i.e. rendering/receiving of service: Please refer to table 9.

(4) Major shareholders information

Major shareholders information: Please refer to table 10.

14. Segment Information

(1) General information

Management has determined the reportable operating segments based on the reports reviewed by the Chief Operating Decision-Maker that are used to make strategic decisions. The Group has three reportable operating segments: First Business Division, Second Business Division and Technical Services Division. The primary sources of revenue from products and services are as follows:

First Business Division : Promotes domestic sales of consigned and self-manufactured products

Second Business Division : Responsible for international sales and market promotion of self-manufactured products

Technical Services Division : Responsible for the installation, testing, and warranty of products, as well as development of the repair and maintenance business line, and purchases and sales of spare parts and miscellaneous

Energy Division : Domestic sales and market promotion of self-manufactured energy-related products

(2) Measurement of segment information

The accounting policies for the Group's operating segments are in agreement with the summary of significant accounting policies mentioned in Note 2 of the consolidated financial statements. The Group's Chief Operating Decision-Maker uses income before tax as the basis to evaluate each segment's performance.

(3) Segment information

The segment information provided to the Chief Operating Decision-Maker for the reportable segments is as follows:

	First Business Division	Second Business Division	Technical Services Division	Energy Division	Reconciliation and elimination	Total
<u>2020</u>						
Revenue from external customer contracts	\$ 826,251	\$ 1,060,372	\$ 219,392	\$ 255,908	\$ -	\$ 2,361,923
Inter-segment revenue	88,276	1,943,214	-	-	(2,031,490)	-
Total segment revenue	<u>\$ 914,527</u>	<u>\$ 3,003,586</u>	<u>\$ 219,392</u>	<u>\$ 255,908</u>	<u>(\$ 2,031,490)</u>	<u>\$ 2,361,923</u>
Segment income	<u>\$ 80,930</u>	<u>\$ 93,495</u>	<u>\$ 98,004</u>	<u>\$ 10,002</u>	<u>(\$ 229,478)</u>	<u>\$ 52,953</u>
<u>2019</u>						
Revenue from external customer contracts	\$ 781,386	\$ 1,231,714	\$ 215,480	\$ 233,810	\$ -	\$ 2,462,390
Inter-segment revenue	101,417	2,474,889	6,491	-	(2,582,797)	-
Total segment revenue	<u>\$ 882,803</u>	<u>\$ 3,706,603</u>	<u>\$ 221,971</u>	<u>\$ 233,810</u>	<u>(\$ 2,582,797)</u>	<u>\$ 2,462,390</u>
Segment income/(loss)	<u>\$ 74,246</u>	<u>\$ 73,003</u>	<u>\$ 92,957</u>	<u>\$ 4,677</u>	<u>(\$ 219,019)</u>	<u>\$ 25,864</u>

(4) Reconciliation for segment income (loss)

Sales between segments are carried out at arm's length. The revenue from external customers reported to the Chief Operating Decision-Maker is measured in a manner consistent with that in the statement of comprehensive income.

Reconciliations of reportable segment income to the income before tax from continuing operations for the years ended December 31, 2020 and 2019 are as follows:

	<u>2020</u>	<u>2019</u>
Reportable segments income before tax	\$ 52,953	\$ 25,864
Interest income	926	951
Other income	18,003	12,322
Other gains and losses	(5,050)	9,705
Finance costs	(6,143)	(5,497)
Income before tax from continuing operations	<u>\$ 60,689</u>	<u>\$ 43,345</u>

The Group did not provide the total assets and total liabilities amounts to the Chief Operating Decision-Maker.

(5) Information on products and services

Detailed breakdown of the Group's net sales for the years ended December 31, 2020 and 2019 are as follows:

	<u>2020</u>	<u>2019</u>
Project construction	\$ 979,076	\$ 958,810
Uninterruptible power supplies	805,863	986,409
Active power filters	110,008	124,413
Photovoltaic devices	55,873	32,670
Service revenue	89,510	74,738
Others	321,593	285,350
	<u>\$ 2,361,923</u>	<u>\$ 2,462,390</u>

(6) Geographical information

The Group's geographical information for the years ended December 31, 2020 and 2019 are as follows:

	2020		2019	
	Revenue	Non-current assets	Revenue	Non-current assets
Taiwan	\$ 1,124,709	\$ 753,424	\$ 1,075,536	\$ 790,320
Japan	39,714	1,314	5,660	1,277
Turkey	35,992	-	71,585	-
Italy	219,961	3,640	179,276	6,647
USA	124,967	11,231	59,531	12,609
Germany	60,960	-	84,725	-
Singapore	59,729	54,620	86,991	57,662
Others	695,891	-	889,086	-
	<u>\$ 2,361,923</u>	<u>\$ 824,229</u>	<u>\$ 2,452,390</u>	<u>\$ 868,515</u>

(7) Major customer information

Major customer information of the Group for the years ended December 31, 2020 and 2019 are as follows:

	2020		2019	
	Revenue	Segment	Revenue	Segment
A	\$ 208,669	Second Business Division	\$ 238,692	Second Business Division
F	177,054	First Business Division	101,797	First Business Division
